Software License Agreement

This software is licensed or sub-licensed by Fourth Generation Software Solutions, Inc. This Software License Agreement ("Agreement") may be a legal contract between you, the end user, and Fourth Generation Software Solutions, Inc. ("FGSS"). This Agreement is printed on the software media envelope, and by breaking the seal on the software media envelope, you are agreeing to be bound by this Agreement and all its terms and conditions if you have not negotiated other terms or have executed another software license agreement with FGSS or one of its distributors. If you do not agree to the terms and conditions stated in this Agreement, please return the unopened software media envelope and all companion materials (including written documentation and containers) to where you obtained them within thirty (30) days of purchase for a refund in full.

LICENSES

Fourth Generation Software Solutions grants you the non-exclusive and non-transferable right to use one copy of the standard FGSS software programs ordered ("Software"), and associated user and technical documentation ("Documentation"), on the Designated CPU (the specific computer system identified by you in a purchase order or otherwise.), subject to the terms and conditions of this Agreement and in consideration of payment of FGSS license fees. You may access the Software lawfully licensed to you on any number of terminals connected to the Designated CPU. You may transfer the Software to a single hard disk, provided you keep the original solely for backup or archival purposes. You may modify the software lawfully licensed to you, and/or merge it with other programs for your use in machine-readable object code format on the Designated CPU, but any portion so modified, or merged with other programs, shall continue to be subject to the terms and conditions of this Agreement.

Backup Copy. You may make backup copies of the Software and of any portions thereof which are modified or merged with other programs in accordance with this Agreement. All such backup copies shall also be subject to the terms and conditions of this Agreement. You must maintain an accurate record of the location of the backup copies at all times.

Restrictions. Unless otherwise authorized by FGSS, you may not install, electronically transfer, network or otherwise use the Software on any CPU other than the Designated CPU in a network. The standard FGSS license fees apply only when one CPU functions as both the client CPU and the database server CPU. You may not make any copies of the Documentation except as specifically provided above, you may not make any copies of the Software except as specifically provided above, you may not make alterations to the Software or to the Documentation, or to any part thereof, including, but not limited to, unmodified sub-routines, functions, libraries, or other binary code segments of the Software. You may not rent, sub-license, lease, distribute, or grant other rights to the Software or the Documentation to others. You may not reverse engineer, disassemble, decompile, reverse translate, or in any manner decode the Software in order to derive any source code not licensed by Licensor.

Proprietary Rights and Confidentiality. All title and rights of ownership in the software and Documentation remain with FGSS and are protected by copyright, patent and/or trade secret laws. You agree to take all steps necessary to protect FGSS's proprietary rights in the Software and Documentation including, but not limited to, the proper display of copyright, trademark, trade secret and other proprietary notices on any copies of the Software. You must reproduce and include any copyright, trade secret, trademark or proprietary data notices, and other legends and logos on the backup copies. You will, at your own cost and expense, protect and defend Licensor's and its suppliers' ownership of the Software and Documentation against all claims, liens and legal processes of your creditors and keep the Software and Documentation free and clear of all such claims, liens and processes. You will not disclose or publish to others, and will keep confidential the Software.

Terms and Termination. This Agreement is effective until terminated. You may terminate this Agreement by destroying the Software and Documentation and all copies thereof. FGSS may immediately terminate the Agreement if you breach any representation, warranty, agreement or obligation in the Agreement. Upon termination, you shall either promptly return to FGSS all copies of the Software and Documentation in your possession or destroy all copies of the Software and Documentation, and certify in writing to FGSS that all such copies have been destroyed. Software Generation Tools. If the enclosed Software is a 4GL Software generation tool, then you have a royalty-free right to reproduce and distribute program executable files created using the Software if you agree to indemnify, hold harmless, and defend FGSS from any claims, lawsuits or liabilities, and to pay all expenses and damages including without limitation attorney's fees, that arise from the use, licensing or distribution of your software product. This royalty-free right does not apply to FGSS Menus and FGSS User Control Libraries. Royalties are due FGSS on each application resold, licensed or transferred to a CPU other than the Designated CPU that incorporates FGSS Menus and/or FGSS User Control Libraries.

WARRANTY AND LIMITATIONS

Limited Warranty. FGSS warrants and represents that it is the owner of the Software and/or has the right to license the Software, and that for a period of ninety (90) days after the initial delivery of the Software to you, the latest version of the Software released by FGSS shall substantially perform in accordance with the standard FGSS Documentation. FGSS's entire liability and your exclusive remedy shall be for FGSS, at its option, to either; replace the Software that does not meet FGSS's limited warranty described above and which is returned to FGSS with its original distribution media; or attempt to correct any errors which you find in the Software during this warranty period and which prevent the Software from substantially performing as described in the standard FGSS Documentation. Any replacement Software will be warranted for the remainder of the original warranty period or for thirty (30) days, whichever is longer. Limitations of Warranty. The above warranty is null and void if you modify or change your copy of the Software in any way not authorized by this Agreement, or if failure of the Software has resulted from accident, abuse or misapplication. FGSS does not warrant that the functions contained in the Software will meet your requirements, or that the operation of the Software will be uninterrupted or error free, or that all defects will be corrected. FGSS shall not be required to correct errors during the above described warranty period attributable to equipment malfunction, products other than the Software, use of the Software in conflict with or contravention of the Documentation or the terms of this Agreement; or accident, neglect, misuse, or abuse of the Software.

DISCLAIMER OF WARRANTY FGSS MAKES NO OTHER WARRANTIES REGARDING THE SOFTWARE OR DOCUMENTATION, INCLUDING WITHOUT LIMITATION, EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND ANY OTHER WARRANTY, EXPRESS OR IMPLIED, LIMITATION OF LIABILITY, IN NO EVENT SHALL FGSS BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES LOSS OF BUSINESS LOSS OF PROFITS, LOSS OF GOODWILL, OR TORTIOUS CONDUCT RELATING TO, CAUSED BY OR ARISING OUT OF ANY BREACH OF OBLIGATIONS OR DELAY IN DELIVERY OF SOFTWARE OR DOCUMENTATION UNDER THE AGREEMENT, OR FROM YOUR USE OR INABILITY TO USE THE SOFTWARE, EVEN IF FGSS HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH LOSS OR DAMAGES SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU, ANY IMAGES THAT FGSS IS REQUIRED TO PAY FOR ANY AND ALL CAUSES, WHETHER FOR NEGLIGENCE, BREACH OF CONTRACT, OR OTHERWISE, AND REGARDLESS OF THE FORM OF THE ACTION IN THE AGGREGATE, SHALL BE LIMITED IN AMOUNT TO THE ROYALTIES PAID BY YOU TO FGSS FOR THE SPECIFIC COPY OR COPIES OF SOFTWARE.

Restricted Rights Legend

Use, duplication, or disclosure by the Government is subject to restrictions as set forth in subparagraph (c)(1)(ii) of the Rights in Technical Data and Computer Software clause at DFARS252.227-7013. Fourth Generation Software Solutions, 100 Galleria Parkway, Suite 1020, Atlanta, GA 30339.

General. This Agreement shall be governed by the laws of the State of Georgia, and shall inure to the benefit of Licensor its successors, administrators, heirs and assigns. The United Nations Convention for the International Sale of Goods shall not apply to this Agreement. The parties agree that Cobb County in the State of Georgia shall be the proper forum for any action, including arbitration, brought under this Agreement. No actions, regardless of form, arising from the transactions under the Agreement may be brought by any party hereto more than 2 years after the facts creating the cause of action become known to such party. If any term, provision or part of the Agreement is to any extent held invalid, void or unenforceable by a court of competent jurisdiction the remainder of the Agreement shall not be impaired or affected thereby, and each term provision and part shall continue in full force and effect. The terms, conditions and warranties contained in the Agreement that by their sense and context are intended to survive the termination thereof by the parties hereunder shall so survive the termination of the Agreement. FGSS shall not be in default or liable for any failure in performance or loss or damage under this Agreement due to any cause beyond its control.

CHAPTER 1 - *General Ledger*

Fitrix Accounting Course Workbook

Learning Objectives

- To become familiar with the process by which Fitrix Accounting maintains and updates General Ledger Account Balances.
- To learn the steps for setting up the General Ledger Accounting Module.
- To learn how to record General Ledger documents.
- To complete the steps of Period End transaction processing.
- To print Period End reports and financial statements.

General Ledger Overview

What type of Information is maintained in General Ledger?

The General Ledger will handle all the transactions made by the Fitrix accounting system and organize the data into meaningful information. General Ledger documents can be posted for all accounting activities that are not processed in other source journals.

What Tasks or Activities are performed in General Ledger?

- General Ledger Transactions are recorded for accounting transactions that are not recorded in other source journals.
- Posting General Ledger Activity that updates the ledger account balances.
- Period End Transactions
- Period End Reporting and Financial Statement Analysis

How does Fitrix manage changes to General Ledger entries?

There are 5 different processes that need to be run before an account balance is changed.

Phase 1:

1. A Transaction must be entered as a journal entry.
2. The General Journal Edit List must be printed.
3. The General Journal documents must be posted. They can occur at any time and frequently throughout the accounting period.

Phase 2:

4. The period's activity can now be printed (optional). This shows how each transaction line item has affected the system.
5. Post General Ledger Activity. This posts the data from the activity files into the chart of account balances files.

What Relation does the General Ledger module have to Other Fitrix Modules?

All source journals or other modules post to the General Ledger Activity Tables. When General Ledger Activity is posted, the ledger account balances will be changed. Once the General Ledger Activity is posted, account balance inquiries can be made and end of period financial statements can be printed.

Set Up General Ledger

To view this screen, select **Financial Management > General Ledger > Ledger Setup > Update Ledger Defaults**.

Primary activities for setting up General Ledger include entering G/L defaults, creating batch controls, entering ledger accounts and their beginning balances, and updating source document codes.

Update Ledger Defaults

This is the primary screen for setting up the General Ledger system defaults. Through this screen all period information is specified for the accounting system. General Ledger is the only module with defined accounting periods. During G/L setup period start and end dates are defined.

Enter an account number for the retained earnings account.

OVR

HEADER

Field	Description
Current Accounting Period:	Represents current accounting period. It is the first period coming under G/L control. Transactions can only be posted to periods prior to and subsequent to this period. If there is no period under G/L control that corresponds to this period, then posting to the Ledger will post to the earliest period under G/L control. Transactions in later periods will post only when they become the current period.
Last Purge Date:	This field is not yet functional.
Current Fiscal	The current fiscal year.

Field	Description
Year:	
Retained Earnings Account Numbers:	The default retained earnings account number used by the system to post year end retained earnings.
Recalculate Balances From:	Every time the Post to GL program is run, the program goes back to the GL Set Up Complete date and does a recalculation to verify there have been no postings to prior periods. Set this date if you want the date it goes back to to be more current and therefore not take so long to process.
Direct DB/CR Entry:	If you enter Y here you are allowed access to the DB/CR field when entering journal entries and can change it as needed. If you enter a N here you are not allowed access and have to put a negative sign in front of the number to change a DB to CR and vice versa.
Ledger Setup Complete Date Field:	Date user wants to begin having their documents posted. Needs to be setup prior to processing. Can accept transactions posted prior to the calendar date if the prior period and year are setup and under G/L control.
Ledger Setup Complete:	A "Y" implies that the G/L is in balance. The system will not allow this field to be set to "Y" until all accounts are balanced. Once set to "Y", it cannot be changed. Should be set after the initial balance is correct. All transactions residing in the G/L activity files with a document date prior to the Ledger Setup complete date will not be posted to the Ledger Accounts. They are marked as posted.
Batch Journal?:	A "Y" or "N" field which determines whether all GL entries are batch processed.
Require Approval to Post?:	A "Y" or "N" field which determines whether batches need approval before being processed.
Approval Code:	The approval code which allows a batch to be processed.
Periods Back:	Number of periods previous to the current period that you will allow users to enter transaction in.
Forward:	Number of periods future to the current period that you will allow user to enter transaction in.
Control Password:	Password which allows posting outside of the current period. <i>Note: Once you have entered the password you will be prompted for the existing password any time you need to change the password to another value.</i>

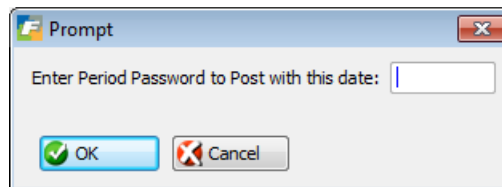

DETAIL - Period Maintenance

Field	Description
Period	The period month and year.
Start Date:	Date the accounting period starts on.
End Date:	Is the date the accounting period ends. There should be no gaps between the Starting and Ending Dates. Defaults to Calendar Periods.
G/L Controlled Field:	System maintained. Indicates whether a given period is under the control of the G/L system or not. Automatically set when the Ledger Setup Complete is set to "Y" and the correct accounting period becomes current.

Backdate Control

Here is an illustration of how the back date control works. The current period is April 2014 (04/01/2014-04/30/2014) and the default has been set up to allow transaction dates one period back and two periods forward. Therefore only transactions with dates of 03/01/2014 through 06/30/2014 can be entered without a password.

In Update General Journal if a date of 02/15/2014 is entered this prompt displays:

The following programs are affected by the back date control functionality.

Accounts Receivable:

- Update Receivable Documents (ar:i_invce)
- Update Non-A/R Cash Receipts (ar:i_cashe)
- Update A/R Cash Receipts (ar:i_arcshe)
- Create Finance Charges (ar:p_fichgr)
- Create Recurring Documents (ar:p_recurr)

Accounts Payable:

- Update Payable Documents (ap:i_invce)
- Create Automatic Checks (ap:p_paydue check run date)
- Update Non-A/P Checks (ap:i_cashe)
- Update AP Checks (ap:i_apcshe)
- Update Void Checks (ap:l_voidck)
- Create Recurring Documents (ar:p_recurr)

Order Entry:

Update Invoices (oe:i_invce)

Inventory Control:

Update Inventory Received (ic:i_purche)
Update Inventory Shipped (ic:i_selle)
Update Inventory Transfers (ic:i_trane)
Adjust Inventory (ic:i_adjust)

Purchasing:

Update Receipts (pu:i_recver)
Update AP Invoices (pu:i_cost)

General Ledger:

Update General Journal
Copy recurring journal entries

Enter Labor Transactions

Batch Control Setup

Batch control is an optional feature which allows different users to independently enter separate batches in the same application at the same time. For example, before entering transactions in General Ledger, user #1 will create a journal entry and a batch ID# will be generated. All data entry, edit list, and posting for user # 1 will be done within this batch. When user #2 enters journal entries in General Ledger, all of these transactions will be entered in a batch created by user # 2. These transactions will post separately from those entered by user # 1.

Activate GL Batch Control

Step	Action
1	Select Update Ledger Defaults from the Ledger Setup menu.
2	In the Batch Journal?: field enter a Y .

Step	Action
3	<p>In the Require Approval to Post?: field, enter a Y (optional).</p> <p>Note: Require Approval To Post - If flag is set to Y, user will be allowed to enter documents and perform any other procedures but will not be allowed to post until batch has been approved for posting. Once a batch has been approved for posting, the user can make no further changes to the batch. If approval is not necessary, the flag should be set to N.</p>
4	<p>In the Approval Code: field, enter an alphanumeric approval code. (used only if Required Approval to Post is set to "Y").</p> <p>Note: Approval Code - Enter approval code needed to approve batches for posting. Code entered will not be visible on screen. This code will be unique to the GL application. If at a later date this code needs to be changed, original code will be needed to access this field. This same code is used in other batch operations such as accessing someone else's batch or selecting all batches.</p>

Update Account Balances

To view this screen, select GL, Ledger Setup, Update Account Balances.

Allows user to set up and maintain the Ledger Accounts Table. Balances can be added to or changed **ONLY** before the SETUP complete is set to "Y". Accounts may be added and the description changed **AFTER** the Setup Complete is "Y". Budget numbers can be entered at any time.

HEADER

Field	Description
Account Number	Nine-digit field that must be unique.
Type	Type of account from Account Number Ranges file, previously set up.
Description	Thirty character alphanumeric field.
Subtotal Code	Is an optional alphanumeric field that identifies the ledger account for postings to be subtotaled and displayed together on Income Statement and Balance Sheet reports.
Increase with Credit	Entry indicates what effect this account has during the posting process. A "Y" indicates this account is increased with a credit, i.e. A/P. An "N" indicates that this account is increased with a debit, i.e. A/R.
Allow Use in Manual Journal Entries?	If this value is set to "N" the user will not be allowed to use this account number in the Update Journal Entries program. <i>Note: There are some account numbers that have their GL</i>

Field	Description
	balance maintained by the system (Example- Trade Accounts Receivable and Trade Accounts Payable) and therefore manual journal entries to these accounts should not be allowed.

DETAIL

Field	Description
Department	Optional three digit alphanumeric code. The Default is 000. Must have previously been entered on Company Information File in Set Up Company.
Period	Displays the accounting period corresponding to the Activity and Balance in the same row. Sorted in descending order.
Year	Displays the accounting year.
Activity	Total Debit or Credit amount posted to the account during a specified period. After setup is complete this field is system maintained.
Balance	Accepts balance for given period. System maintained after setup is completed.
This Period Postings	Represents the amount posted thus far in the current period. This amount is maintained by the system. When period is closed out this amount transfers to activity column.
Amount Budgeted	Represents the amount budgeted for this period. Budgeted numbers can be entered at any time.

Click the Quit button to return to sub menu.

OVR

This file stores source document type codes and their descriptions. These codes are only used when entering journal entries and are informational only. All Fitrix modules will automatically print a source code on GL activity reports (i.e., AP for Accounts Payable Transactions) so codes could be set up for transactions processed outside the Fitrix modules that are being recorded in the Fitrix GL.

Press Quit to return to sub-menu.

Update Account Groups (Optional)

To view this screen, select (g) for **Update Account Groups**. This screen allows users to maintain groups of related accounts under a central group code. This simplifies data entry allowing you to simply enter the code rather than entering the same set of multiple account numbers for transactions when entering journal entries.

Field	Description
Account	Stores previously setup ledger account numbers that will be associated with the account group.
Dept.	Stores previously setup Department Code. Zoom is available.
Description	Displays the description of the ledger account.

Replace GL Account Number

To view this screen,, select (i) for **Replace GL Account Number**. This screen allows users to replace an existing account number with a new account number. The new account number must have been previously set up.

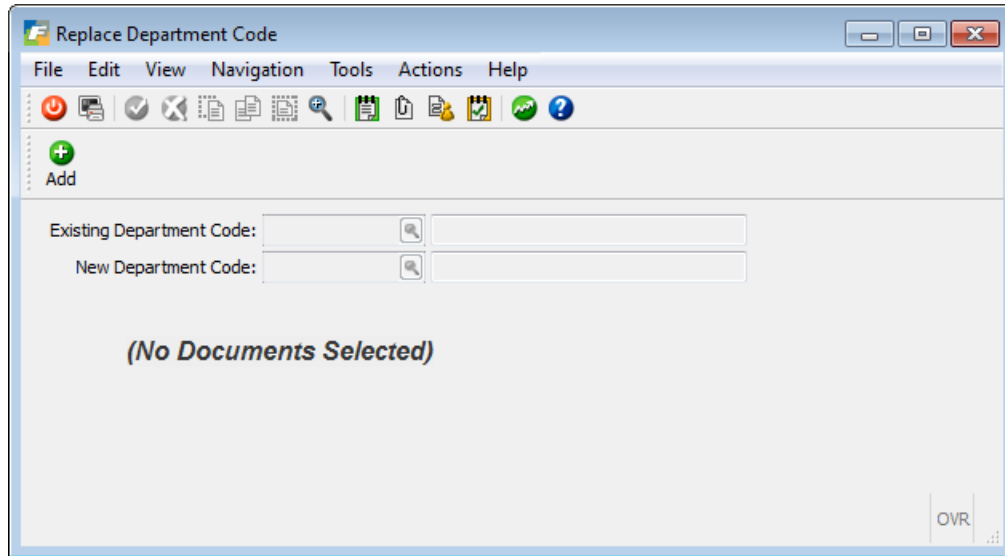

Every table that has the old account number will be updated to the new one and then user is prompted as to whether the old account number should be deleted.

Replace Department Code

To view this screen,, select (j) for **Replace Department Codes**. This screen allows users to replace an existing department code with a new department code. The new department code have been previously set up.

Every table that has the old department code will be updated to the new one and then user is prompted as to whether the old department code should be deleted.

Transaction Processing

In General Ledger a General Ledger Document goes through the following primary steps:

1. Creation of a Document by either
 - adding new document, or
 - copying a recurring document.
2. Print the Edit List to check for errors.
3. Post the General Journal to the G/L Activity.

A General Ledger document begins as an entry made through the Update General Journal or by Copying Recurring documents. If an entry is to be made every month, it may be added through the Updating Recurring Documents menu option and then copied into the Update General Journal input screen automatically. Loading recurring documents is usually done at the end of the period with the Copy Selected Documents option.

Update General Journal

To view this screen, select General Ledger, Ledger Journal, Update General Journal.

General Ledger transactions begin as entries made through the Update General Journal or by Copying Recurring documents.

HEADER

Field	Description
Date	Defaults to system date. Warning given if date is outside of current period. You can enter prior or future dates.
Posted	Displays "Y" or "N". Indicates whether the document has been posted. DISPLAY only.
Description	This is the description of document.
EOP Reverse (Y/N):	"Y" will cause this document to be reversed when a New Period is created. "N" means no reversing entry will be created.

Field	Description
Source:	Source document code. From Source document file. Defaults to GENJRN. (Zoom available). Source document codes are defined in General Ledger Setup.
Source Description:	Display only when Source is entered.
Account Group:	When used, this calls a set of accounts to be used by the system. These must have been previously setup.
Account Group Description:	Displays only when Account Group is entered.
User	User ID of person that entered journal entry will print on General Journal Listing.

DETAIL

Field	Description
Account	Stores Ledger accounts affected by the transaction. ZOOM is available.
Dept.	Department code which is associated with this entry. System defaults to "000".
Description	Displays the description upon entering a valid account number.
Amount	Stores the amount of the transaction to be posted.
Credit/Debit	Stores the amount of the transaction being credited or debited. Also stores whether the line item is DB or CR. If your default flag in GL defaults for Direct DB/CR entry is set to "N", you will have to precede the amount with a "-" sign if you want to credit an account that is usually debited and vice versa.

TOTALS

Field	Description
Debits	Total amount of Debit posting for document.
Credits	Total amount of Credit posting for document.
Difference	Displays difference between credit and debit amounts. Difference must be 0 for documents to post.

Click Exit or press (Q) and then the ESC key until you are returned to the main menu.

Updating Recurring Documents

To view this screen, select **General Ledger > Recurring Documents > Update Recurring Documents**.

General Ledger Documents can also be created by copying all recurring documents or selected recurring documents. Creating recurring documents allows for the easy maintenance of documents that remain virtually unchanged from period to period.

Click Exit or press (Q) and then the ESC key until you are returned to the main menu.

OTHER OPTIONS on SUBMENU:

There are other options on the General Ledger transactions sub-menu worth noting.

Print all recurring documents - Prints a listing of all recurring documents.

Copy all recurring documents - Creates a journal entry for all documents regardless of what copy flag is set to. Once copied a GL edit and posting list must be run for these to post to GL activity.

Print selected documents - prints only those documents selected for copying.

Copy selected documents - creates a journal for all documents marked for copying.

Print all document detail - prints document detail including GL distribution for all recurring documents.

Print selected documents detail – print for selected documents

Press Quit to return to main menu.

Posting General Ledger Documents

Not all documents entered during the current accounting period have to be posted during the same period.

You can enter documents with future dates. A warning displays indicating that the date is outside the current period, but the document can still be entered. Such a document will not post in the current period, but will remain in the system until the appropriate period. When the General Ledger reaches that future period, the document will post.

Before posting documents to the General Ledger Activity, an Edit List must be run. Data Entry mistakes found on the listing must be corrected through the Update General Journal Documents.

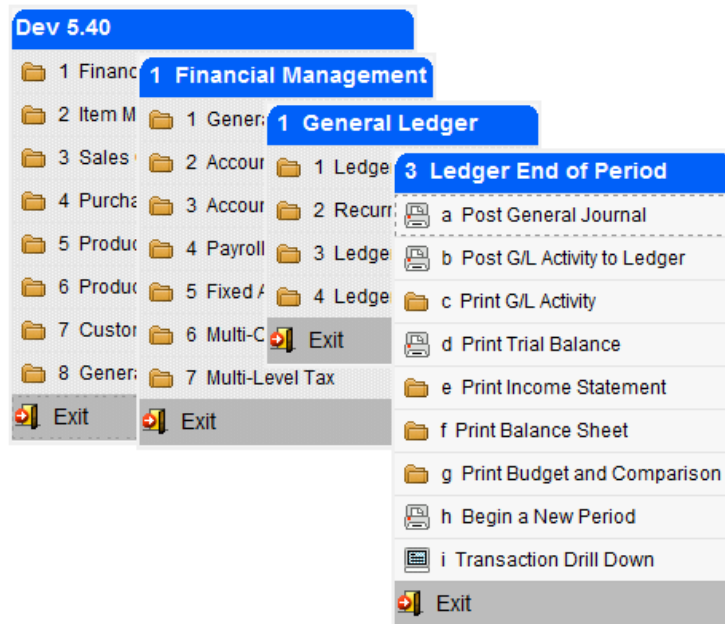

Finally, General Journal documents are posted to the General Ledger Activity tables. A report is printed at the time documents are posted. This report looks exactly like the edit listing, except that General Journal document numbers have been assigned to each posted document.

Reversing Entries

The Begin New Period program runs a sub program that finds all journal entries that are designated EOP = Y and reverses them. However this can create a timing issue. For example, let's say you've opened up the period 01 but you have not yet closed out period 12 and you need to enter accrual journal entries in period 12 that should automatically reverse in period 01. Because you have already opened period 01 these entries will not reverse until you open period 02. By having the Create Reversing Journal Entries programs as a separate menu option, you can reverse entries without opening yet another period. The program looks at all EOP = Y journal entries that have not yet been reversed and reverses them if the current period is after the period the original journal entry was posted to. Using our example above it would reverse all period 12 reversing journal entries into period 01 when run.

End of Period Activities

To view this menu, select **Financial Management > General Ledger > Ledger End of Period**.

The End of Period Activities includes the following steps:

Step	Action
1	Post the General Journals and all other Journals with activity to be accounted for in the current period.
2	Post General Journal posts, and General Journal Documents to the activity tables.
3	Print the G/L Activity Report. (optional) <i>Note:</i> The G/L activity report will report all activity in the Fitrix Accounting system. This activity includes all documents posted from other Fitrix accounting modules installed. The report can be printed in summary or detail.
4	Post the G/L Activity. <i>Note:</i> This posting program posts all documents in the activity table for the current period and updates the ledger account balances so you can then run your financial statements.

Period End Reports

Once the General Ledger Activity is posted and the account balances are updated the following Financial Reports and Financial Statements can be printed:

- Trial Balance Sheet
- Income Statement
- Balance Sheet
- Budget and Balance Comparison

Beginning a New Period

To close out the existing period and begin a new period the following steps must be completed:

Step	Action
1	Select Begin a New Period. <i>Note:</i> If the next period is already defined, it is created automatically. If it has not been defined, then you will be prompted for a period number and period end date before the new period is created. <i>Note:</i> If the next period is a new year, the new year is begun by creating the year end journal for zeroing out revenue and expense accounts. The difference is posted to retained earnings.
2	Reversing documents are created for the new period.

Transaction Drill Down:

This program enables the user to drill down from an account number to the source documents that make up the account number's balance.

Do a (F)ind and enter your selection criteria and press ENTER.

General Ledger Review

- All activity in the Fitrix Accounting system is posted to the General Ledger Activity tables. To update ledger account balances, General Ledger Activity is posted to the General Ledger under the Ledger End of Period menu.
- To update a general ledger account balance you must complete the following steps:
 1. A Transaction must be entered in the General Journal.
 2. The General Journal must be printed. (Edit List).
 3. The General Journal documents must be posted.
 4. The period's activity should then be printed. (Optional).
 5. Post General Ledger Activity.
- The steps to entering a General Ledger Document are:
 1. Create Document
 2. Print Edit List
 3. Post Edit List
- General Ledger Documents can be added through the Update General Ledger Document or by Copying Recurring Documents.
- End of Period Processing includes the following three activities:
 1. Posting General Ledger Activity to update ledger account balances.
 2. Printing the Period End Reports and Financial Statements.
 3. Beginning the New Period.

Lab Exercise a: Setup General Ledger

Update Ledger Defaults

The General Ledger Module Defaults have already been defined for the ABC Company and set to complete.

1. Define two more consecutive accounting periods.

Update Account Balances (GL - Ledger Setup - Update Account Balances)

Beginning Account Balances were entered from this screen at the time the General Ledger Module was implemented and prior to the General Ledger Setup Complete Flag being set to "Y". You will not be able to update any field on the detail portion of the screen except Amount Budgeted once the Ledger Setup is complete.

1. Enter budgeted amounts for the following accounts:

EXPENSES – for whatever the most current accounting period and year is.

700100000-000	Administrative Wages	120,000.00
702000000-000	Utilities	14,000.00
702500000-000	Telephone	8,000.00

2. Add the following General Ledger Accounts:

406000000 Finish Sales	Increase with Credit = Y
507000000 Finish COGS	Increase with Credit = N

Update Source Document Types (GL - Ledger Setup - Update Source Document Types)

1. Add PURCHS as a Source Document Type for the Purchasing Journal.

Update Account Groups (GL - Ledger Setup - Update Account Groups)

1. Update EXINV to include the Accounts Payable account as one of the accounts in this account grouping.
2. Update the INPROD account group to include Parts, Electrical, Phone, and Accessory Sales.

Lab Exercise b: G/L Transactions

General Ledger Document Transaction Processing

1. Make the following General Journal entries using today's date: (GL - Ledger Journal - Update General Journal)
 - Received \$100.00 for Employee and Other Receivables to be deposited into the Cash Account. Source is the Cash Receipts Journal. Both accounts are asset accounts and increase with a debit. When entering the credit to the Other Receivable account change Debit/Credit flag from DB to CR.
 - Purchased \$5,000.00 worth of inventory on account. Select ACTPAY for the source journal for this document. Debit inventory and credit Accounts Payable.
 - Paid \$500.00 cash for Accounts Payable Invoice 386. Select ACTPAY for the source journal and use CASHAP as the account group. Debit accounts payable and credit cash.
 - Purchased office furnishings in the amount of \$2,000.00 on account. Debit furniture and fixtures asset account and credit accounts payable.
 - Enter a transaction from the Cash Sales Journal for the month's cash sales: Debit cash \$61,126.13 and credit sales accounts listed below:

Parts	24,531.34
Stereos	13,856.99
Engines	8,567.80
Electrical	7,600.00
Phones	4,230.00
Accessories	2,340.00

2. Print the General Journal Edit List. (GL - Ledger Journal - Print General Journal Listing)
Redirect to screen.
3. Post Documents to the General Journal. (GL - Ledger Journal - Post General Journal)
Redirect to screen

Lab Exercise c: Recurring Ledger Transactions

Selected Recurring Documents (General Ledger Recurring Documents)

1. Create Recurring Documents. (Option a)
 - Add a recurring document for a bank interest payment that is incurred on a quarterly basis in the amount of \$1,200.00. Debit interest expense and credit cash.
2. Update copy flag using Update Recurring Documents program.
 - Flag the quarterly bank interest payment for copying by entering a “Y” in Select for Copying field in header of document just entered.
3. Print Selected Documents. (Redirect to screen.)
4. Copy the Selected Recurring Document. (Option e).
 - Once the selected documents have been copied into the General Ledger the Select for Copying flag returns to N.
5. Find the copied document in update General Journal. (GL- Ledger Journal - Update General Journal.)
6. Update Document.
 - Update the interest payment amount to include a \$25.00 late charge and code this to bank charges. This update should be made only to the document that will post for this month. The recurring document should not include the \$25.00 late charge in the amount.
7. Print Edit List. (Redirect to screen.)
8. Post Documents. (Redirect to screen.)

All Recurring Documents

1. Print ALL Recurring Documents. (Redirect to screen.)
2. Copy ALL Recurring Documents.
3. Print General Journal Listing. (Redirect to screen.)
4. Post General Journal. (Redirect to screen.)

Lab Exercise d: End of Period Processing

End of Period (General Ledger - Ledger End of Period)

NOTE: REDIRECT ALL PRINT ROUTINES TO THE SCREEN.

1. Post GL Activity to Ledger.
2. Print G/L Activity detail for most recent GL period.
3. Print Trial Balance for all departments for most recent period
4. Print Income Statement detail for all departments for most recent period
5. Print Balance Sheet consolidated for all departments for most recent period.
6. Print Budget and Comparison detail for accounting period 01 through for most recent period.

We will not do this as part of this exercise but once you have entered all transactions and are ready to open a new period you will run option (h) on the Ledger End of Period menu, Begin New Period.

General Ledger Learning Activity

The following points of training were covered in this Chapter. If you feel that you have not mastered all objectives, go back and review those sections.

- How to maintain and balance General Ledger Account Balances.
- Setting up the General Ledger Accounting Modules.
- Record General Ledger documents.
- Period End transaction processing.
- Print Period End reports and financial statements.

CHAPTER 2 - Accounts Receivable

Fitrix Accounting Course Workbook

Learning Objectives

- To become familiar with the type of information maintained in Accounts Receivable.
- To learn about the tasks performed in the Accounts Receivable Module.
- To learn how to setup the Accounts Receivable Module.
- To learn how to add and update Customer Information.
- To learn how to process Accounts Receivable Invoices not related to inventory purchases.
- To learn how to process A/R and Non A/R receipts.
- To learn about the various reports available in this module.

Overview of Accounts Receivable

What Type of Information is maintained in Accounts Receivable?

The Accounts Receivable system tracks two types of information:

- Ledger Information (sales, payments, etc.)
- Customer Information (A/R Aging, etc.)

Ledger Information refers to information relating to the company profit and loss. Customer Information pertains to the specific condition of a customer's account. Entering documents into the system generates both types of information.

What Tasks or Activities are performed in Accounts Receivable?

The major tasks involved with Accounts Receivable document processing include:

- Setting up the Accounts Receivable Module
- Adding and Updating Customer Information Records
- Entering Customers Invoices, Credits, and Debits
- Entering Customer Payments, Non A/R Cash Receipts, and Bank Deposits
- Performing the End of Period Processing and Transactions

What Relation does Accounts Receivable have to other Fitrix Modules?

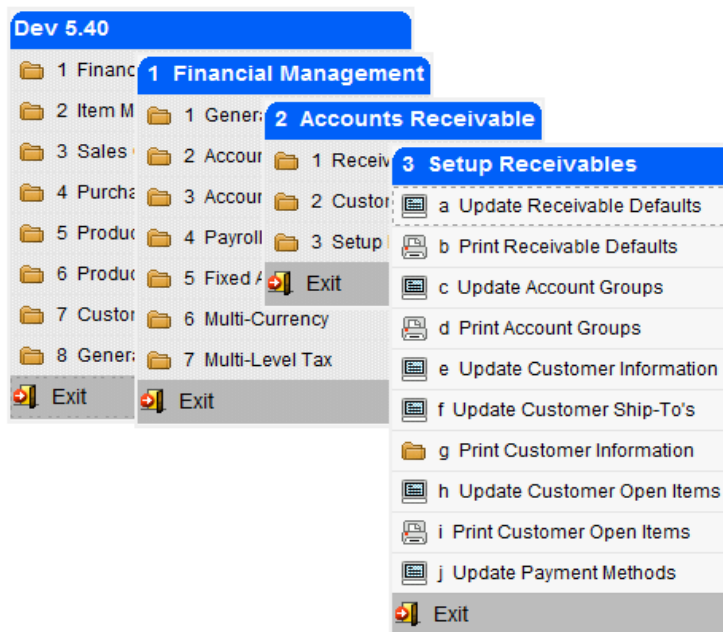

The two modules Accounts Receivable is related to in the overall system are General Ledger and Order Entry. Information flows between these three modules and several programs and data files are shared.

Ledger Information posts to the General Ledger to update general ledger account balances for cash, accounts receivable, sales, etc.

Customer Information and programs are shared with Order Entry. Order Entry posts customer orders to update customer accounts receivable balances.

Accounts Receivable Setup

To view this menu, select **Financial Management > Accounts Receivable > Setup Receivables** (option 3).

The following menu items are used to help you setup Accounts Receivable for your company:

Field	Description
Update Receivables Defaults	Define the Accounts Receivable module defaults.
Update Account Groups	Predefine A/R related general ledger account groups to speed data entry (optional).
Update Customer Information	Add customer information.
Update Customer Ship-To	Adds ship-to information.
Update Customer Open Items	Set up outstanding account balances prior to going live on the Accounts Receivable module.
Update Payment Methods	Set up payment methods such as open account, cash, credit or debit card.

Update Receivables Defaults

To view this screen select Setup Receivables, Update Receivable Defaults (option a).

This entry screen contains the Accounts Receivable Module Default definitions and these are the values used for transactions unless overridden at either the customer or transaction level.

Invoicing and Credit Management Section

Field	Description
Terms Code	Defines the default payment terms code.
Take Discount on	Enter "Y" or "N" here if discount applies to freight charges, sales tax, and miscellaneous charges.
Credit Checking Rules Apply	Check this box to turn on real time credit checking in sales order entry. This can be overridden at the customer level.
Credit Manager	Enter default credit manager here. This can be updated at the customer level. Must be valid user Set up in the security user and group table.
Over Credit Limit Allowed	Enter percent over credit limit allowed. This can be overridden at the customer level.
Hold Code	Enter valid default credit hold code. This can be updated at the customer level.

Multilevel Tax Section

Field	Description
Tax Groups	<p>These fields contain the default multilevel tax code used if no multilevel tax code defined at customer or transaction level.</p> <ul style="list-style-type: none"> • Miscellaneous Tax Group: • Freight Tax Group: • Finance Charge Tax Group: • Invoice Default Tax Group:
Enter Goods Amounts as Gross	An entry of "Y" means the price entered on A/R documents includes tax and the program will calculate a net amount and post tax to appropriate ledger account. An entry of "N" means price entered on A/R documents excludes tax and program will calculate tax for you.
Calculate Tax on Cash Discounts	If an entry of "Y" is entered when paying an invoice, the program will automatically create an entry in the multilevel tax file to adjust the original tax amount down to the actual tax paid by customer. If a "N" is entered, no adjustment is generated when cash discounts are taken.

Account Numbers Section

Specific General Ledger account numbers to be posted to as a transaction progresses through the system.

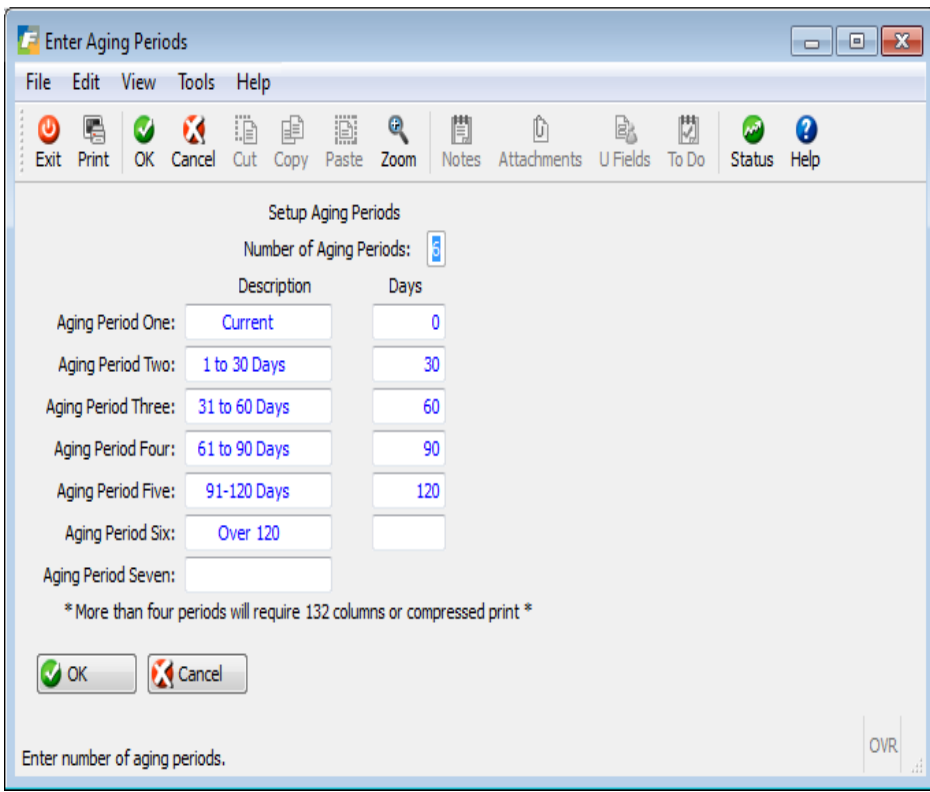

Aging Information Section

Defines how the system reports on customer aging.

Field	Description
Age On	Due Date or Invoice Date. This determines if the customer invoices will be aged based on the invoice date or the due date of the invoice.

The set up required to establish aging periods for AR Aging Reports is as follows:

Step	Action
1	From Update Receivable Defaults screen place the screen in Update mode.

Step	Action
	<p>From the Age On field, click on the  icon. The Setup Aging Periods screen displays.</p> 
3	Enter the number of aging periods in the Number of Aging Periods field.
4	Define the duration of each aging period in the Description and Days fields for each Period.
5	Click the OK button or press ENTER when complete.

Miscellaneous

Field	Description
Is AR Set Up Complete?:	<p>Before setting this flag to yes, all customer open items should be entered and balanced to General Ledger. Once this is set to yes, customer open items will not be accessible to update.</p> <ul style="list-style-type: none"> "Y" indicates open items are balanced. "N" indicates open items are not balanced and no transactions can occur.
Batch – Invoices?:	A "Y" or "N" field which determines whether all AR invoices are batch processed.

Field	Description
Receipts?:	A "Y" or "N" field which determines whether all AR cash receipts are batch processed.
Require Approval to Post?:	A "Y" or "N" field which determines whether batches need approval before being processed.
Approval Code:	The approval code which allows a batch to be processed.
Bank Deposit ID	System maintained value. Incremented each time a bank deposit is created in the Cash Receipts process.
Finance Charge	If this box is checked the Finance Charge flag in the customer master will be set to Y when setting up new customers.
Auto Assign Customer	Check this box if you want the Update Customer Information program to automatically assign the next sequential customer code when adding a new customer.
Next Customer Number	Enter your next sequential customer code when setting up your AR Default values.
Auto Assign Ship To	Check this box if you want the Update Ship To Information program to automatically assign the next sequential ship to code when adding a new ship to.
Next Ship-To Number	Enter your next sequential ship to code when setting up your AR Default values.

Update Account Groups (Optional)

To view this screen press Quit and select (c) Update Account Groups

Allows user to define and maintain 'groups' of G/L numbers.

- An account group is a particular set of ledger accounts used together for a particular type of transaction.
- Each account group can reference up to 100 different account numbers.

Acct/Tax Information

To view, click on the Addinfo icon.

This screen allows you to define customer specific default general ledger account numbers for A/R posting and Tax reporting.

Field	Description
Account Group:	A default account group can be setup per customer. Optional.
A/R Account:	An Accounts Receivable account number can be defined for an individual customer. The customer default A/R account number is used if this account number differs from the A/R Module default. This entry is optional. If nothing is entered, the A/R default account number will be used.
Currency Code:	This code is the default currency code for the current customer record and only applies if the Multi currency module is activated.
Default:	This field provides the default tax setting when adding customer documents. This default can be overridden at the time of document entry.
Credit Manager	The value entered here is the credit manager responsible for this customer and must be a valid login ID. This user id must also be set up in the security table for users (table name is stxsecur) so that the program can find the name associated with the id (See chapter on Security in the Getting Started With Fitrix manual).It is this name that prints on the collection letters sent to the customer.
Send Credit Letters	This value defaults to Y which means a credit letter will be printed for

Field	Description
	this customer. If you do not wish to create credit letters for a specific customer you must change this value to N.

Press ENTER key to return to Customer Information screen.

Open Item/Bal Fwd: O

Finance Charges: Y

Fin. Chrg. Tax Code:

OK Cancel

Enter this customer's credit limit. OVR

When setting up the customer billing information before setup is complete, previous account activity can be carried forward and entered in these fields. Once the A/R defaults are set to complete and transactions have been posted, the following fields are system maintained.

- Statement Date
- Statement Amount
- Last Pay Date
- Balance
- On Account
- Deposits for Sales Orders

The following fields are maintained by the end user:

Field	Description
Credit Limit:	This is the dollar amount of outstanding debt allowed on this account.
Statement Cycle:	This optional field stores a number that is referred to as the "statement cycle number". When you generate customer statements, the program prompts for one or more cycle numbers thereby allowing you to generate statements for a particular class of customers or different time cycles.
Open Item / Bal Forward:	This field accepts an entry of O (open item) or B (balance forward). This code determines the type of statement to be generated for the customer. If left blank, it defaults to O.
Finance Charges:	Determines whether customer is charged a finance charge. If left blank, the field defaults to "Y".
Finance Charge Tax Code:	Enter tax code to be used when finance charge is created.

Press the ENTER key to return to Customer Information screen.

O/E Information

To view, click on the Oeinfo icon.

This screen maintains customer default information that is referenced in the Order Entry Module. This information can be overridden in Order Entry at the time an individual order is placed.

Note #1: The Discount/Customer Class and Discount Level fields are used for customer pricing in Order Entry and is discussed in the Distribution training class.

Press the ENTER key to return to the Customer Information screen.

Ship-To Information

To view, click on the Ship-To icon.

The screenshot shows the 'Ship-To' window in the Fitrix Accounting software. The window has a menu bar (File, Edit, View, Navigation, Tools, Actions, Help) and a toolbar with icons for Quit, Print, OK, Cancel, Cut, Copy, Paste, Zoom, Notes, Attachments, U Fields, To Do, Technical status, and Help. Below the toolbar is a secondary toolbar with icons for Find, Prev, Next, Add, Update, Delete, and Browse. The main area contains various input fields for customer ship-to information:

- Customer Code: 1 (with a search icon) and ACTION AUTOPARTS (in blue text)
- Ship-To: CALIF
- Ship-To Name: ACTION AUTOPARTS WEST
- Route Code: WEST
- Residential: N
- Tax Code: NOTAX (with a search icon)
- Freight Tax Code: NOTAX (with a search icon)
- Misc Tax Code: NOTAX (with a search icon)
- Contact: STAN WAVERLY
- Phone: 805 885 5487
- Address 1: 4389 APPLE WAY WEST
- Address 2: APT 10A
- City, State, Zip: VENTURA CA 93003
- Country: US (with a search icon) and UNITED STATES (in blue text)
- Salesperson: JC (with a search icon) and JIM CARSON (in blue text)
- Discount: (with a search icon)
- Ship Terms: PREPAID (with a search icon) and FREIGHT PREPAID - DO NOT INVOICE (in blue text)
- Cell: (empty field)
- Fax: (empty field)
- Email: (empty field)
- Web Address: (empty field)
- Warehouse Code: (with a search icon)

At the bottom left, it says 'Notes 1 of 3'. At the bottom right, there is an 'OVR' button.

This screen maintains customer ship-to information. If you assign a ship-to during invoice processing, the bill-to and ship-to will print on shipping documents and invoice forms.

Press the ENTER key to return to Customer Information screen.

OK Cancel New Search Detail

OVR

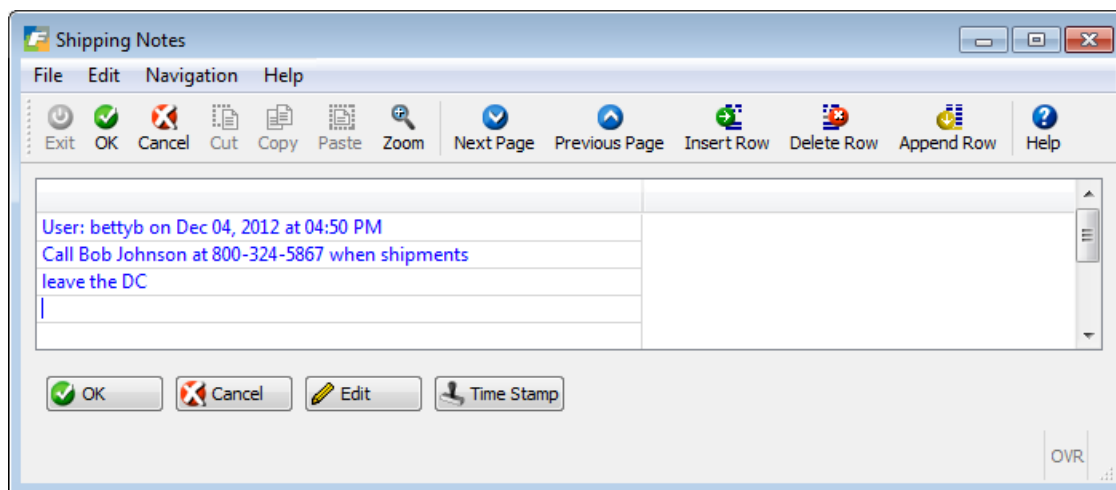

This screen allows you to view customer activity sorted by most current dates first. You can also change the sort order by clicking on the column heading.

You can zoom further into the activity by placing cursor on item you wish to research and clicking on the detail button. If the type of document is IN (Invoice) and you click on detail, the first screen to display is the invoice header information. When you click on activity to zoom further, the screen displays any payments that have been applied to the invoice. If the type of document is CR (Cash Receipt) and you click on detail the screen displays the invoice the payment was applied to.

If you would like to look for a specific document, click on New Search and press the TAB key until the cursor is located in the Inv/Chk No. field, enter document reference number, and press ENTER.

Shipping Notes

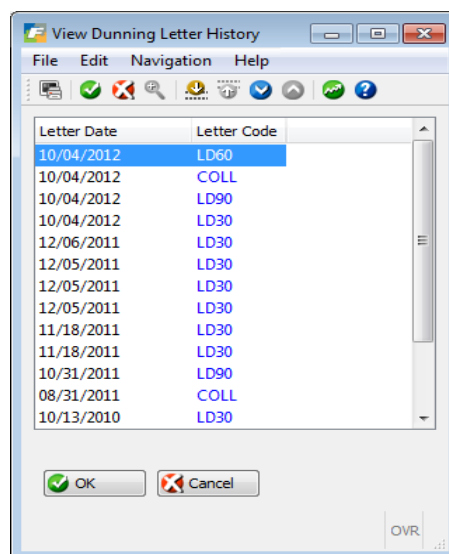

To view, click on the shipping notes icon.

The notes entered here are for special shipping instructions that relate to this specific customer. These notes will display when entering sales orders. When these notes display you have the option of changing the notes and will then be prompted "Store These Shipping Notes (Y/N)". The default is Y and these notes will then print on the picking ticket and packing list. Any changes made to the notes in order entry will not change the default notes stored with the customer record.

Credit Letters

To view, click on the Credit letter icon.

This option lets the user view the code of the credit letters sent to the customer and the date they were created.

Credit Card

To view, click Credit Card icon.

The screenshot shows the 'Update Customer Credit Card' window. It has a menu bar (File, Edit, View, Navigation, Tools, Actions, Help) and a toolbar with icons for Find, Prev, Next, Add, Update, Delete, and Browse. Below the toolbar, the form contains the following fields:

- Customer Code: 8 (with a search icon) and LAKE CITY AUTO PARTS (in a dropdown)
- Payment Method: CCARD (with a search icon) and CREDIT CARD (in a dropdown)
- Card Name: VISA
- Primary Card: Y (checkbox)
- Card No: 6781
- Security Code: (empty field)
- Trans Ref No: (empty field)
- Account No: (empty field)
- Route No: (empty field)
- Social Security: (empty field)
- Driver License: (empty field)
- License State: (empty dropdown)
- Exp. Month: 10
- Exp. Year: 2012
- First Name: BROWN
- Last Name: JOHN
- Address: 8320 SPRING RD
- City: ATLANTA
- State: GA
- Zip: 30339
- Country: US (with a search icon) and UNITED STATES (in a dropdown)
- Telephone: 770 123 4555
- Fax: (empty field)
- Email: johnb@gmail.com

At the bottom of the form, it says '1 of 1' and 'OVR'.

This option lets you view any credit card information that is on file with the customer. This information is set up in the Accounts Receivable module. Credit card is a method of payment used in Accounts Receivable and Order Entry.

Click the OK button (or press ENTER) until you are returned to Customer Information screen, then Quit to return to Setup Receivables screen.

Update Customer Commission Rates

Clicking on the **Comm Calc** icon displays this screen. Use this screen to enter variable commission rates that your salesperson will be paid that are based on the customer code and the item's price rather than the global commission rates stored with the item master record.

The 'Update Customer Commission Rates' window features a menu bar (File, Edit, Navigation, Help) and a toolbar with various icons. It contains a table with the following data:

Item Code	Begin Price	End Price	Commission
12104	2.0000	3.0000	2.00
12104	3.0001	5.0000	3.00

At the bottom, there are 'OK' and 'Cancel' buttons, a text field labeled 'Enter in item code', and an 'OVR' label.

Add Contacts

Clicking on the **Add Contacts** icon displays this screen used to store additional contact information.

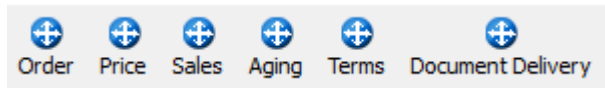

The 'Enter Additional Contacts' window has a menu bar (File, Edit, View, Tools, Help) and a toolbar. It displays a table for contact information:

Contact	Telephone Number
DOUG	404-546-0389

At the bottom, there are 'OK' and 'Cancel' buttons, a text field labeled 'Enter label two', and an 'OVR' label.

Additional Icons on Toolbar

There are additional icons found on the toolbar in the Customer Master record:

Order – launches the Update Customer Orders program.

Price – launches the Update Special Price Defaults program.

Aging- launches the AR Aging report program.

Terms – launches the Update Payment Terms program.

Document Delivery – used to set up how documents are to be delivered to your customer. See the section on Flexible Document Delivery in the *Getting Started with Fitrix User Guide*.

Customer Information

To view this menu, select **Financial Management > Accounts Receivable > Customer Information** (option 2).

The Customer Information Menu contains options for maintaining, inquiring, and reporting customer information.

Field	Description
Update Customer Information	Is the same data entry screen that is located on the Setup Receivables Menu.
Print Customer Information	Prints customer summary or detail information sorted by name or code.
Print Customer Labels	Prints labels with customer's name and address. Can print by name or zip code.
Update Customer Terms	A data entry screen for entering customer payment terms.
Print Customer Terms	Prints the customer terms.
Update Customer Ship-To	Is the same data entry screen that is located on the Setup Receivables menu. Allows for the maintenance and addition of multiple customer ship-to locations.
Print Customer	Generates customer statements. Statements summarize

Field	Description
Statements	activity on a customer account and reflect all activity.
Print Customer Aging	Prints summary or detail format showing the total amount owed by the customer broken down into the aging periods setup in the Receivables Defaults record.
Print Customer Ledger	Prints a report of all customer activity, both invoices and payments in chronological order.
Print Customer Open Items	Prints a report that lists all outstanding invoice balances by customer in chronological order.
Print Customer Activity Detail	Prints a report of all transactions for the date range specified. It lists all invoices that still have a balance and any payments that have been applied to them.
Customer Credit Management	This submenu contains the programs used to manage sales orders on hold and to enter, update, and send credit letters (aka dunning letters) to your customers.
Customer Deposit Report	This report lists deposits your customers have paid you for pending sales orders entered through Order Entry.
Credit Card Information	Used to enter and print customer credit card information.

Update Credit Hold Codes

If you have the Credit Checking Rules Apply turned on in the Update Receivable Default program use this program to set up the hold codes that are then assigned to customers that have Credit Check turned on in the Update Customer Information program. These codes control what can and can't be done to a sales order that is placed on hold because the total due from the customer exceeds their credit limit.

There are two hold code delivered with the product. These can be revised as needed and new codes can be set up if needed.

If the email alert is activated in the Update Email Templates program both the user that entered the order and the customer's sales representative will receive an email notifying them that the order has been released.

The screenshot shows the 'Update E-Mail Templates' window. The menu bar includes File, Edit, View, Navigation, Tools, Actions, Options, and Help. Below the menu is a toolbar with icons for various actions. A secondary toolbar contains buttons for Reply-To, Reports, Recipients, Cc Recipients, and Bcc Recipients. Another toolbar has buttons for Find, Prev, Next, Add, Update, Delete, and Browse. The main form area contains the following fields:
Event Code: CREDIT_APPROVED
Description: SALES ORDER RELEASED FROM CREDIT HOLD
Active: Y
Type: EMAIL
Priority: 1
Message Subject: Sales Order &order_no has been released from credit hold
Below these fields is a list box with a 'Seq' column and a 'Text' column. It contains one entry: '1 Sales Order &order_no for &bus_name has been released from credit hold.' Below the list box, it says '2 of 16'. At the bottom left is a 'View Detail' button. At the bottom right is an 'OVR' button.

If the sales order is attached to a purchase order (i.e. - a drop ship order or it has DRS or DRN line types on it) and the hold code dictates that the purchase order also be placed on hold, it will be released from hold and an email alert sent to the buyer attached to the purchase order or the default buyer code set up in the Update Purchasing Defaults program

The screenshot shows the 'Update E-Mail Templates' window. The menu bar includes File, Edit, View, Navigation, Tools, Actions, Options, and Help. Below the menu is a toolbar with icons for various actions. A secondary toolbar contains buttons for Reply-To, Reports, Recipients, Cc Recipients, and Bcc Recipients. Another toolbar has buttons for Find, Prev, Next, Add, Update, Delete, and Browse. The main form area contains the following fields:
Event Code: PO_RELEASED
Description: PO RELEASED FROM CREDIT HOLD
Active: Y
Type: EMAIL
Priority: 1
Message Subject: PO# &po_no created by &user for SO# &order_no has been released from credit hold
Below these fields is a list box with a 'Seq' column and a 'Text' column. It contains two entries:
1 The sales order that requires this product has been released from credit hold.
2 Please send this PO to the vendor so that the product can be shipped.
Below the list box, it says '14 of 16'. At the bottom left is a 'View Detail' button. At the bottom right is an 'OVR' button.

If the sales order is attached to a production work order (i.e. it has MTO or MTN line types on it) and the hold code dictates that the work order also be placed on hold, it will be released from hold

and an email alert sent to the responsible party assigned to the purchase order or the default responsible party set up in the Responsible Party program.

The screenshot shows the 'Update E-Mail Templates' window. The menu bar includes File, Edit, View, Navigation, Tools, Actions, Options, and Help. The toolbar contains icons for Reply-To, Reports, Recipients, Cc Recipients, Bcc Recipients, Find, Prev, Next, Add, Update, Delete, and Browse. The form fields are as follows:

- Event Code:
- Description:
- Active:
- Type: Priority:
- Message Subject:

The message body is displayed in a list box with two items:

- 1 The sales order that requires this product has been released from credit hold.
- 2 Please process this work order and build the product/job.

The status bar at the bottom indicates '16 of 16' and includes a 'View Detail' button.

Credit Letters

Update Letter

This is where the you define the letter code and the text of the letter. This feature is delivered with standard text for each letter but you can change the wording as needed to fit your business needs. You can also use the F1 and F2 function keys to delete and insert lines to fit the address information to your mailing envelope if a window envelope is being used.

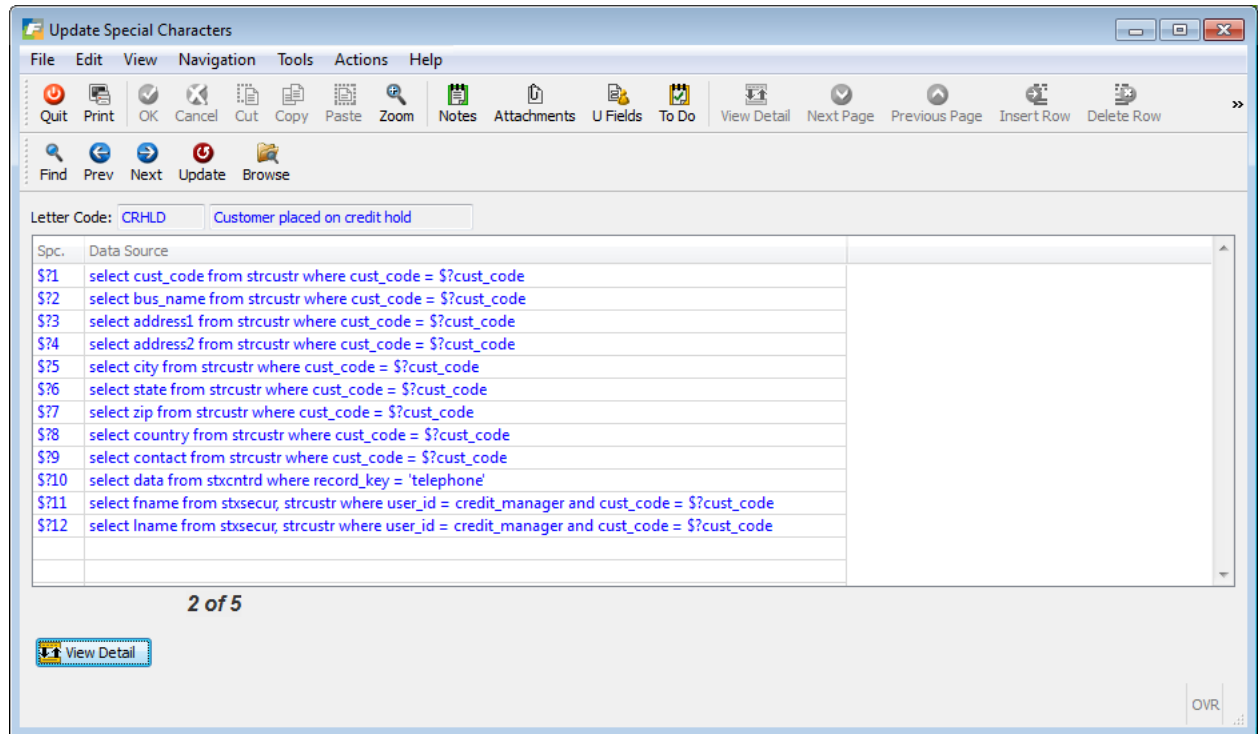

Due Days -determines what invoice detail will print on the letter. In the example above this letter will print for any customer that has invoices that are 121 days or more past the due date.

Credit Hold – this should be set to N for all letters except the letter that is sent when the customer is placed on credit hold.

Minimum Due - If the amount due from the customer is less that this amount, the letter will not print.

Update Special Characters

This is where you create the definition for the special characters used within the letters defined in Update Letter.

Each special character represents an SQL query that retrieves information from the database that will print on the letter. These special characters are inserted into the text of your letter in the appropriate places. For example, in the screen shot above the special characters defined will print the following information on the letter that is printed when the customer is placed on credit hold:

- \$?1 Customer Code
- \$?2 Business name
- \$?3-\$?8 Address information
- \$?9 Contact name found in customer record
- \$?10 Your company's telephone number as found in the Update Company Information program
- \$?11 First name of credit manager
- \$?12 Last name of credit manager

It will also print a list of all invoices that have a balance.

Here is a sample of the invoices over 30 days past due letter:

1110 Sample Street

Dear BILL WALKER

We show the following invoices are now thirty days past due:

Invoice No:	Invoice Date:	Due Date:	Amount Due:
1842	09/11/2012	10/11/2012	2.37
1842-1	09/11/2012	10/11/2012	5.00
1832	09/11/2012	10/11/2012	8.58
1837-1	09/11/2012	10/11/2012	5.00
1832-1	09/11/2012	10/11/2012	18.16
1837	09/11/2012	10/11/2012	2.37
1847-1	09/13/2012	10/13/2012	22.91
1847	09/13/2012	10/13/2012	10.83
1885-1	09/24/2012	10/24/2012	208312.50
MEI-1	09/25/2012	10/25/2012	1991.00

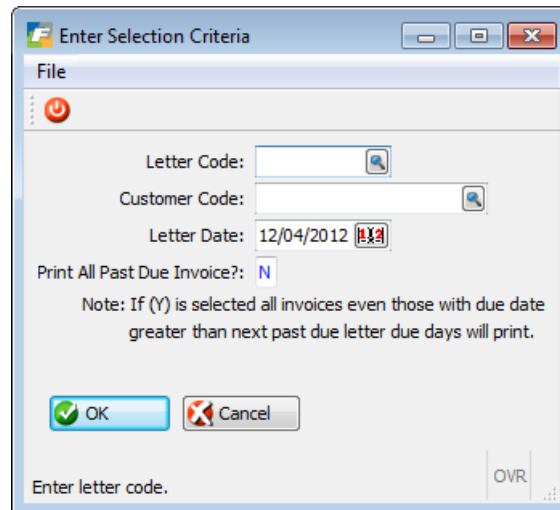

If payment has not yet been sent please send payment in full or
if this information is incorrect please call us at: 573-876-5350

Sincerely,

TOM SMITH

Print Letters

When you run this program you will be prompted for the following information:

A zoom is available from both the letter code and customer code fields. The date is the date that will print on the letter. For example if your are printing the LD30 letter (selects all invoices that are between 30-59 days past the due date) and you enter a date of March 31st , the program will select all invoices that match this criteria as of March 31st.

If you enter a Y in Print All Past Due Invoices all invoices > 30 days past due will print, even those with a due date > than the next past due letter (Past Due 60 Days).

This program will only print letters for customers that have credit letter = Y in their customer record. If this is set to N, no letters will print for the customer.

The letters delivered with Fitrix include:

Credit hold letter (letter code CRHLD) – selects all customers where credit hold flag in customer record = Y and credit hold date = letter date entered. It is recommended that this be set up to run via CRON every night

Past Due 30 (letter code LD30) – customer has invoices that are 30-59 days past due.

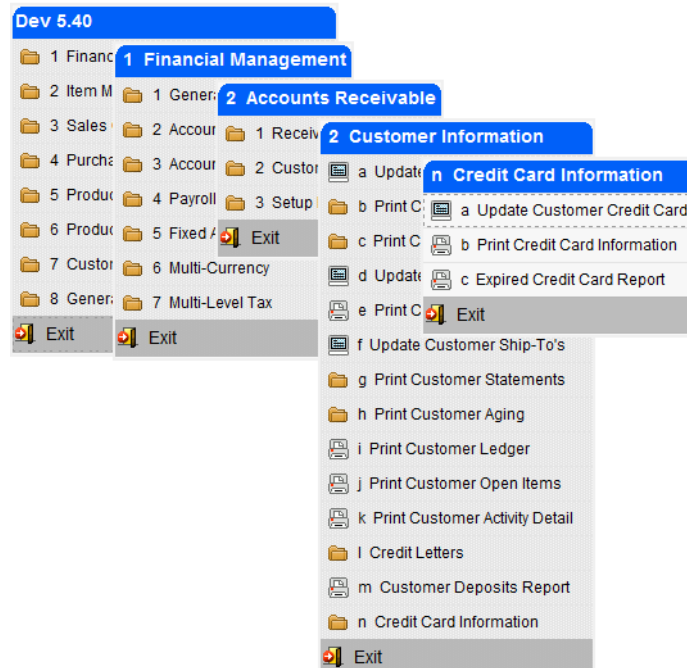

Past Due 60 (letter code LD60) – customer has invoices that are 60-89 days past due.

Past Due 90 (letter code LD90) – customer has invoices that are 90-120 days past due.

Collection Letter (letter code COLL)- customer has invoices that are > 120 days past due and the customer will be turned over to a collection agency .

Credit Card Information

To view this submenu select option n from the customer information menu.

The Accounts Receivable module interfaces with a payment transaction network for automated credit card processing. Credit card information is stored at the customer level. When invoices are entered the invoice information is automatically sent for real time authorization or you can send in batch mode if processing many invoices. The following day you then run the settlement program to settle the transactions.

The documentation herein is for the Fitrix credit card processing functionality through an interface with Skipjack Financial Services. Other interfaces may be supported in the future. Please check with your Fourth Generation sales representative.

Enter Credit Card Information For Customer:

This program is used to store credit card information for the customer. Each customer can have multiple credit cards.

Please note that this program can also be accessed from within the Update Customer Information program.

Email

If the customer has multiple cards at least one must be marked as primary. It is this primary card number that is used if you run invoice authorization in batch since you are not prompted to select the credit card to be charged.

When you store the credit card information you will receive this prompt:

Click on Yes to validate the card with Skip Jack. This will temporarily put a \$1.00 charge on your customer's card that will then be reversed by Skip Jack. This validation is needed to make sure the credit card is a valid card. This also returns a Transaction Reference Number that Skip Jack will use to authorize and settle transactions so that the entire credit card number does not need to be stored in the Fitrix database. Note that when you validate the card, the Trans Ref No is filled in and now only the last four digits of the card number you entered display.

Print Credit Card Information (option b):

This report will list in either summary or detail the credit cards you have on file for your customers. Here is a sample of the detail report:

The screenshot shows a window titled "Print Credit Card Information" with a menu bar (File, Navigate, Help) and a toolbar. The main content area displays a credit card report for "ABC DISTRIBUTION". The report includes a header with the date (09/29/2008), time (14:24:36), and page number (1). Below this is a table with columns: Customer Code, First/Last Name, Card Name, and Number. The table contains one entry for "ACTION SUPPLY" with the name "TOM SMITH", card name "VISA", and number "2225". Below the table, the report lists the expiration date (Exp. Month: 08, Exp. Year: 2009), address (8320 TEST WAY, ATLANTA, GA 30304), country (US), telephone (678 123 4567), and email (test@hotmail.com).

Customer Code	First/Last Name	Card Name	Number
1	TOM SMITH	VISA	2225

Exp. Month: 08
Exp. Year: 2009
Address: 8320 TEST WAY
City: ATLANTA State: GA Zip: 30304
Country: US
Telephone: 678 123 4567
Email: test@hotmail.com

Expired Credit Card Report (option c) -

This report will list all credit cards that are about to expire so that the user can contact the customer and get updated information. User is prompted to enter a date and all credit cards with an expiration date prior to this will print.

Update Customer Terms

To view this screen, select **Update Customer Terms** (option d).

Update Customer Terms is the data entry screen that allows you to add and maintain customer terms. These are reference files used by both Accounts Receivable and Order Entry.

A/R Terms Code:

Description:

Due Days:

Discount Days:

Discount Percent:

9 of 11

OVR

Field	Description
A/R Terms Code	Six-digit alpha/numeric code identifying the type of terms.
Description	Thirty character field for describing the terms.
Due Days	Numeric field that records the number of days that are added to the invoice due date to determine when an invoice should be paid in full.
Discount Days	Numeric field storing the number of days that are added to the invoice date to determine if a discount from the total payment is valid.
Discount Percent	Numeric field stores the percentage that is used in calculating the discount. Entered as whole numbers, (i.e. - 2% entered as 2.0).

Press Quit and ESC key to return to the main menu.

Receivables Transactions

The major tasks involved with Accounts Receivables document processing include:

- Receivable Document: Customer Invoices, Credits and Debits
- Receipts Document: Customer Payments, Non A/R Cash Receipts, Bank Deposits
- Receivables Journal Processing: End of period Processing and Transactions

Receivable Document Transaction Processing Flow

1. Enter Transactions as A/R documents
2. Process credit card transactions.
3. Print Edit Lists and Check for Errors
4. Print Customer Invoices
5. Post A/R Documents

Receipts Document Transaction Processing Flow

1. Update A/R Receipts or Non A/R Receipts. Create Bank Deposits
2. Print Cash Receipts Edit List and Check for Errors
3. Post Cash Receipts

Receivables End of Period Processing

1. Print the Receivables Journal (GL Distribution of all A/R documents.)
2. Print Cash Receipts Journal (GL Distribution of all A/R receipts.)
3. Print G/L Activity (All GL activity generated by A/R transactions.)
4. Create Finance Charge Invoices
5. Create Recurring Documents
6. Print Customer Statements
7. Print Customer Aging

The Receivable Ledger

To view this menu, select Financial Management, Accounts Receivable and then select Receivable Ledger (Option 1).

This menu contains the options related to the processing of Receivable Transactions.

Document Transactions Processing Flow

Field	Description
Update Receivables Documents	The data entry screen for Customer Receivable documents. Used for non-inventory invoice transactions like a monthly service fee.
Print Receivables Listing	Prints an edit list of all receivables documents which are not posted.
Print Invoices	Prints A/R invoices.
Credit Card Processing	Authorize in batch and Settle credit card transactions.
Post Receivable Documents	Selects all un-posted documents and posts ledger information to the G/L Activity Files and Accounts Receivable information to the customer activity files.

Field	Description
Process Cash Receipts/Deposits	The data entry screens for Cash Receipts and bank deposits.
Print Cash Receipts Listing	Prints an edit list of receipts prior to posting.
Post Cash Receipts	Posts A/R and Non A/R Cash Receipts to the Accounts Receivable and General Ledger activity files.

Accounts Receivable Ledger Processing Activities

Field	Description
Print Receivables Journal	Prints the Accounts Receivable Journal for selected dates.
Print Cash Receipts Journal	Prints the Cash Receipts Journal for selected dates.
Print G/L Activity	Prints a summary or detail report of the G/L Transactions originating from A/R unlike the GL activity report that prints from the GL module. This report includes transactions from all Fitrix modules.
Create Finance Charge Invoices	Selects past due invoices to apply finance charges to and creates finance charge documents in the receivable documents file.
Create Recurring Documents	Creates recurring accounts receivable documents.
Batch Maintenance	Used for approving batches if batch control is turned on and batches require approval.

Update Receivables Documents

To view this screen select Update Receivable Documents (Option a).

The Update Receivables Documents is the data entry screen for Customer Receivables documents and is used to enter, modify or delete receivable documents. This screen has three sections.

Header Portion of the Data Entry Screen contains the following document information:

Field	Description
Doc Date	Defaults to system date format mm/dd/yyyy. This is the General Ledger posting date
Inv Date	Defaults to system date format mm/dd/yyyy. This is the customer invoice date and is the date used to age the invoice on the AR Aging report.
Dept. No.	Three character alpha/numeric.
Gross Amount	Default is value set up in Setup Receivable Defaults. If gross amounts are entered, the tax is automatically backed out and the net amount displays in the accounting window at the bottom of the screen.

Field	Description
Posted	"Y" or "N" system maintained.
Customer	Customer code (up to twenty characters).
Customer Name	Display only, name is looked up from the customer code.
Ship-To	Customer default shipping destination, if more than one ship-to, Zoom to select.
Doc Type	(I)nvoice, (C)redit Memo, (D)ebit Memo, (F)inance Charge Invoice.
Invoice	You can assign an invoice number by entering it here. If you do not assign an invoice number it will be assigned by the system when the transaction is saved.
Description	After selecting a document type, the word Invoice, Credit, or Debit displays here. Next to this is a field to enter a document number. If left blank, it will be assigned a number when you print the document.
Recur	If there is a code entered in this field (user-defined code such as M for monthly or Q for quarterly, the program treats this document as a recurring document. Recurring documents are explained in greater detail in Create Recurring Documents section.
Ref. No.	If document type is (C) or (D) enter original invoice document number it applies to and the program will automatically apply the debit or credit to this invoice. If left blank this will create an open item on the customer's account. The invoice document number may be different than the invoice number if you manually entered the invoice number. To find the invoice document number go to the Update Customer Information program and view the activity screen that can be accessed from the toolbar.
Tax	Stores a 6 char field for multilevel tax as defined in customer record or AR defaults.
Description	Description of document.
Acct. Group	Default Account Group entry is optional.
Pay Method	Displays pay method retrieved from the customer master record.
Terms	Stores payment terms code as defined in the customer record, or AR defaults.
Terms Description	Description of Terms Code.
P.O.	Nine character user defined entry which stores an optional P.O. number for tracking the order.
Misc	For any applicable miscellaneous charges to be added to invoice.
Freight	For any applicable freight charges to be added to invoice.
All Other Fields	Maintained by system.

Field	Description
Addl Info icon on toolbar	You can click on this icon to enter invoice notes, a PO date, and to change the discount given if any

Detail Portion of Data Entry Screen:

Field	Description
Item No	Eight-character alpha-numeric. Since A/R documents don't relate to inventory, anything can be entered here.
Qty	Quantity of item sold.
Unit	Unit of measure.
Description	User defined entry.
Tax Cd	Multilevel tax code defined in header.
Price	Unit price.
Amount	System maintained (Price x quantity).

Account Number Section:

The account number and department code will automatically default to the values set up in AR defaults. If you need to change:

Step	Action
1	Place cursor in the Item Code field, and then Click the Zoom button (or press CTRL-Z) or click on the Acctg Info icon on the toolbar. The picker window displays.
2	Place the cursor on the item you wish to change, and then click the OK button (or press ENTER).
3	Enter the new value.
4	Press the ENTER key to save the change.

After documents are entered, run the edit list, print the invoices, and post. Printing of the invoices is optional as it is not needed for the post to run.

Press Quit to return to the Receivable Ledger menu.

Update Non A/R Cash Receipts

To view this screen, select update Non-A/R cash receipts (option a) on the Process Cash Receipts/Bank Deposits submenu.

OVR

Update Non A/R Cash Receipts is the data entry screen which maintains cash receipts that are not related to a customer account (i.e. - don't affect the balance a customer owes you).

Field	Description
Date	This date field records the date that your company received payment from the customer. It defaults to the data entry date.
Check Number	The check number received.
Description	The purpose or amount of payment described.
Posted	A "Y" or "N" field indicating if the cash receipt was posted to the General Ledger.
Receipt Amount	The amount of the check received.

Field	Description
Cash Account	This numeric field stores the ledger account number for your cash account that will be increased by this transaction. It defaults to the account set up for Cash in the Accounts Receivable Defaults program. Refer to "Update Receivable Defaults" under "Setup Receivables Menu" in this manual.
Account	This column stores the ledger account numbers that are affected by a cash receipt (other than the Cash Account listed in the header; the Cash account specified in the header is automatically debited by the account entered for each line in the detail section). The Zoom feature is provided.
Dept.	This three character field stores a department code that identifies a profit center, or a division of the company, etc. Throughout the Fitrix <i>Business</i> modules, you have the option of posting sales and expenses to specific departments. The use of department codes is optional. If left blank, the field defaults to 000. The Zoom feature is provided.
Account Description	This system-maintained field displays the name of the ledger account once a valid ledger account number is entered in the Account field.
Received	This numeric field stores the amount that is posted to an account.
Credit/Debit	The amount that is either debited or credited to the account.
Total Received	This field displays the amount of the figure in the Receipt Amount field that has been accounted for in the detail section.
Balance Remaining	This field displays the difference between the Receipt Amount and the Total Amount..

Update A/R Cash Receipts

To view this screen, select Update A/R Cash Receipts (option b) on the Process Cash Receipts/Bank Deposits submenu.

This is the data entry screen that maintains and updates receipts from customers for payments on their accounts. When updating a customer receipt once the Customer Code is entered, all customer open items appear in the detail portion of the screen.

Enter [Y] to automatically pay the oldest invoices.

OVR

Header Portion

Field	Description
Date	This date field records the date that your company received payment from the customer. It defaults to the data entry date.
Currency Code	The type of currency accepted on this account, normally US dollars.
Customer	The first field is the customer code, the second is the Accounts Receivable name.
Check Number	The check number received.
Description	The purpose or amount of payment described. This description will print on the GL activity report.
Receipt Amount	The amount of the check received.
On Account	System maintained field for payments received from customer but not applied (ie- prepayments).If this amount is positive (customer owes you money) and user selects Automatic Pay they will be prompted "Apply Payment to OA Y/N?"

Field	Description
Deposit	System maintained field for payments received from a customer for an OE sales order that have not been applied. See section below on entering customer deposits.
Automatic Pay	If a "Y" is entered in this field, payment will be applied to oldest invoices first until total receipt amount is applied. If you want to apply payment to specific invoices manually, press Ctrl TAB to enter detail section of screen.
Cash Account	This numeric field stores the ledger account number for your cash account that will be increased by this transaction. It defaults to the account set up for Cash in the Accounts Receivable Defaults file. Refer to "Update Receivable Defaults" under "Setup Receivables Menu" in this manual.
Non-Attached	System defaults to "N" but if you receive a payment you do not want to apply, (i.e., payment in advance and therefore not invoiced), change to a "Y". Once transaction is posted, this amount will be included in the On Account total.

Detail Portion (Ctrl TAB to access) of the screen allows you to update receipts based on line detail information by entering one of the following six characters under the Cmd? column.

Option	Field	Description
(1)	Auto payment	Is credited to current invoice allowing for any discounts if applicable.
(2)	Disc payment	Is credited to current invoice with discounts allowed regardless of date.
(3)	No Disc. Payment	Is credited to current invoice with no discounts allowed.
(4)	Man. payment	Amount to pay on the invoice is manually entered and applied.
(I)	Invoice Detail	Pulls up the details of the line item selected.
(C)	Customer Information	Pulls up a screen with detailed customer information.
(P)	Paid Invoice	Allows you to search for a paid invoice to apply the payment to (duplicate payment). Using this option will reopen the invoice on the customer account with a negative balance.
Ctrl Z	Zoom to browse	If the customer has many open invoices, you can use Ctrl Z to find a specific invoice instead of scrolling through the entire list

Press Quit to return to the submenu.

After Cash Receipts transactions are entered, the next step is to print cash receipts listing (option c) to verify information is correct and then run Post Cash Receipts (option d).

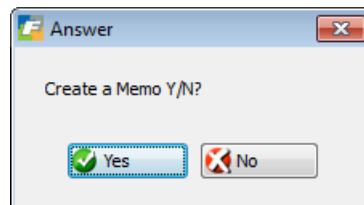

Creating Charge backs and write-offs in cash receipts.

This feature allows you to create customer charge backs and write offs while in the cash receipts program.

For example, a customer pays \$300 of a \$500 invoice, taking a \$200 deduction. You have three options:

1. Create a chargeback debit memo- instead of short paying the invoice and leaving a balance due on it, pay off the entire \$500 invoice and create a new open item for \$200 until the research can be done to determine whether a credit is due to the customer.
2. Create a write off credit memo to clear the balance.
3. Short pay the invoice leaving a balance due.

If customer short pays an invoice, you are prompted as follows:

If N is entered, a balance will be left on the invoice. If a Y is entered a memo screen displays:

Enter Memo Information

File Edit Navigation Help

Memo Entry

Invoice Balance: 11.99 Memo Amount: 11.99

Ln	Type	Date	Memo No.	Description	Amount
	C	09/21/2011	CB5001	FRT CHARGE DISPUTE	11.99

OK Cancel

Enter the amount for the memo. OVR

Memo Type- defaults to C for chargeback and this type will leave a balance on the customer's account. The other valid entry is W for write off. If W is used when the receipt is posted a credit memo will automatically be created to clear the balance not paid on the invoice.

Memo Number – you must enter and it must be a unique value.

Memo Date – this will default to the date of the invoice the memo is being generated from so that it will age the same as the invoice on the AR Aging report. You do have the option though of changing this to another date.

Description – free form text entered by you.

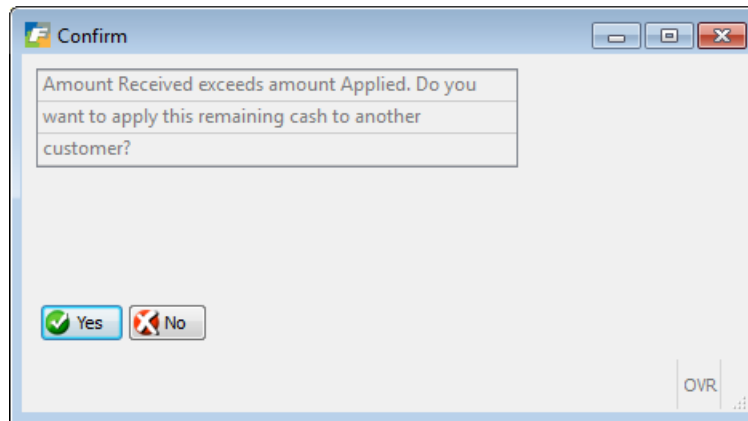

Memo Amount – the difference between the invoice amount and the amount applied to it. You can change this amount though and enter another memo or store the transaction and leave a balance due on the invoice.

When the cash receipt is posted the post program automatically creates the chargeback debit memo or the write off credit memo. At the end of the report will be a listing of any memos created.

Applying Cash to Multiple Customer Codes:

On occasion you may need to apply a single cash receipt to multiple customer codes. An example of this is when a corporate office is paying for multiple divisions and you have each division set up as an individual customer code. If this is the case you will want to carry over unapplied cash to another customer code.

In Update A/R Cash Receipts program if the amount received is greater than the amount applied you will receive the following prompt when you try to store the transaction:

If you enter N, the excess amount will be applied On Account. If you enter Y, a new cash application screen displays with the carry over information (cash amount remaining, check number, etc.) Enter Add mode to enter the new customer code and apply the cash. This process continues until all cash received is applied.

Press Quit to return to Receivable Ledger menu.

Entering and Applying Customer Deposits:

This all assumes there is a sales order in the system prior to the deposit being entered in Update AR Cash Receipts program and only one deposit per order can be entered at a time unless it is a contract. If it is a contract then the deposit entered will be split amongst all orders on the contract.

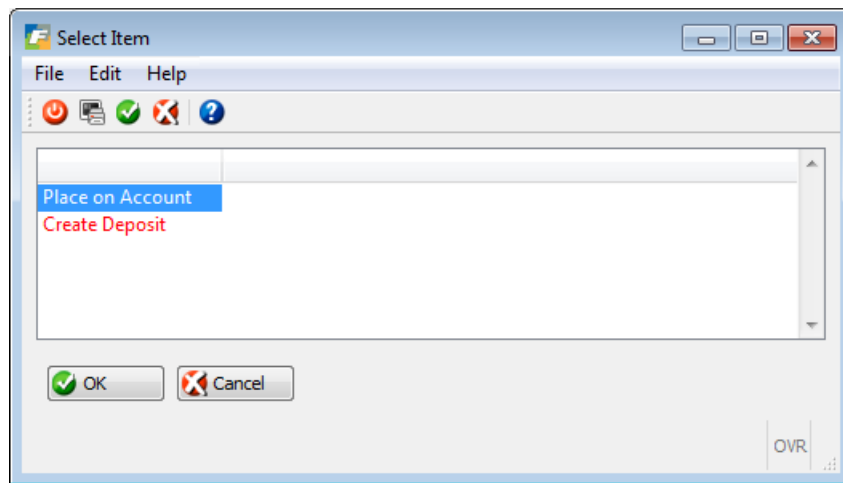

Entering a Customer Deposit (option f on the Receivable Ledger menu):

Note: If you receive a deposit from a customer prior to entering the order it will need to be handled as follows:

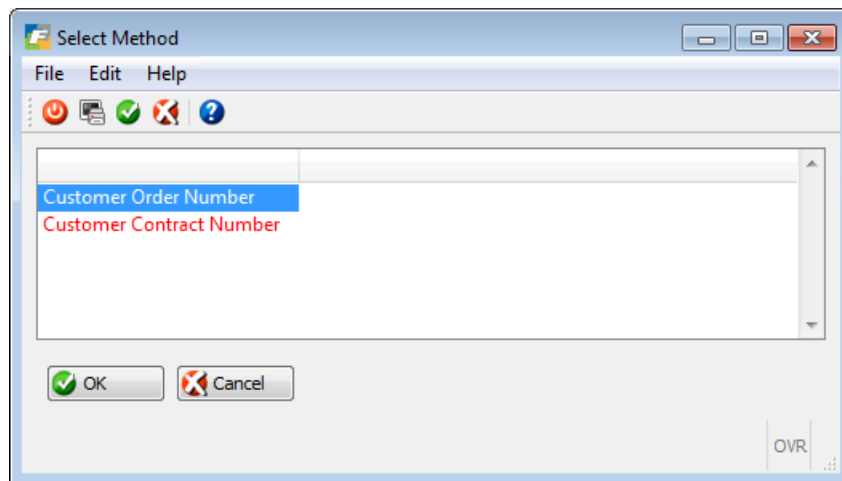

1. Enter the deposit as a Non Attached payment using the Update AR Cash Receipts program and post the transaction. This will post the deposit amount to the customer's On Account balance (unapplied cash).
2. When you do have the order in the system, reverse the On Account amount by entering a negative Non Attached payment and post the transaction. This will clear the existing On Account.
3. Enter deposit, select the order(s) it is to be applied to, and post the transaction.

To apply a deposit to an order or several orders on a contract, the orders must first be entered in the system. Once entered, go to the Update Cash Receipts program and enter the payment amount as a Non Attached payment.

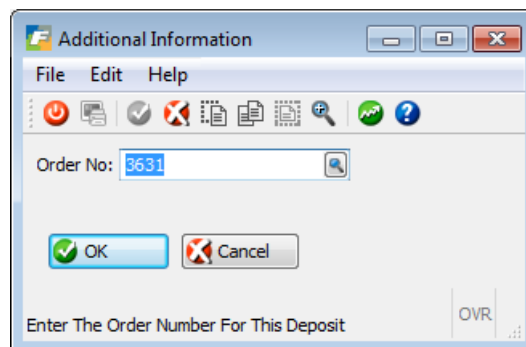

Once you enter a Y in the Non Attached field, the following screen will display:

Select Create Deposit and this screen will display:

If you are applying the deposit to a single order, select Customer Order Number and this screen will display so you can enter the customer order number:

When you press Enter or click on OK this screen displays:

The screenshot shows a software window titled 'Additional Information' with a menu bar (File, Edit, Navigation, Help) and a toolbar. The main area is titled 'Deposit Entry' and contains two input fields: 'Deposit Amount:' with the value '4000.00' and 'Deposit Balance:' with the value '0.00'. Below these is a table with three columns: 'Order No.', 'Order Amount', and 'Deposit Amount'. The first row contains the values '3631', '12000.00', and '4000.00' respectively. At the bottom of the window are 'OK' and 'Cancel' buttons. A status bar at the very bottom says 'Enter the amount for the deposit.' and has an 'OVR' indicator.

Order No.	Order Amount	Deposit Amount
3631	12000.00	4000.00

Click on OK and then click on OK from the main cash receipts screen to save the transaction.

If you want to apply the deposit to multiple orders on a contract, select Customer Contract Number on the Select Method screen above rather than Customer Order Number. When selected, this screen will display:

Order No.	Order Amount	Deposit Amount
1316	3750.00	2500.00
1317	3750.00	2500.00
1318	3750.00	2500.00
1319	3750.00	2500.00

The amount of the deposit will be evenly distributed amongst all orders on the contract but the amounts can be changed if needed. Any changes made must equal the amount of the total deposit.

When the transaction is posted it creates this General Ledger entry:

Debit Cash
Credit AR

Display of Deposit Information:

The deposits entered display in several programs:

Update Customer Information- a field has been added to the Billing Information screen for Deposits:

The 'Extension ...' dialog box contains the following fields and values:

- Statement Date: 01/04/2008
- Statement Amount: 49.95

Partial shipments:

If you are unable to ship and invoice the entire shipment due to the merchandise not being available, it could happen that the deposit amount exceeds the invoice amount of the first shipment. For example, the order amount is \$100,000, you have applied a deposit of \$50,000 to it, and the first shipment is for \$30,000. When this happens \$30,000 of the \$50,000 deposit will be applied to the invoice (net invoice amount that prints will be zero), and the remaining deposit amount of \$20,000 will be applied to future shipments for this order.

Applying Deposits When Applying Cash Receipts:

Go into the Update AR Cash Receipts program. Select the invoice that your customer is paying.

Debit AR
Credit Cash

When you write a check to your customer to refund the deposit, the GL account you debit should be the same Cash account credited by the posting report.

Create Bank Deposits

You can group cash receipts by deposit ID so that a single entry is made into the check reconciliation table for multiple cash receipts.

To create a bank deposit, select option (e) from the menu below:

Go into Add mode and enter:

Deposit Date

Bank Code

Branch- if there is just one branch the branch code will auto fill this field. If there are multiple branches, you will need to enter a branch code.

Once the bank name and branch are filled in, the rest of the information associated with them will display.

A list of all cash receipts posted that have not been assigned a deposit ID will display in the detail section of the screen. To add receipts to a deposit go to this detail section and change the Include flag from N to Y. The deposit total in the header section of the screen will display a cumulative total as receipts are selected.

The screenshot shows the 'Update Bank Deposits' window with the following fields and values:

- Deposit Date: 10/02/2012
- Deposit ID: (empty)
- Bank Code: BOA
- Description: BANK OF AMERICA
- Branch: BRANCH #1
- Description: CUMBERLAND
- Account Name: ABC DISTRIBUTION
- Account Number: 0291038109
- GL Account No: 100000000
- Department Code: 000
- Deposit Amount: 90287.88
- Posted: N

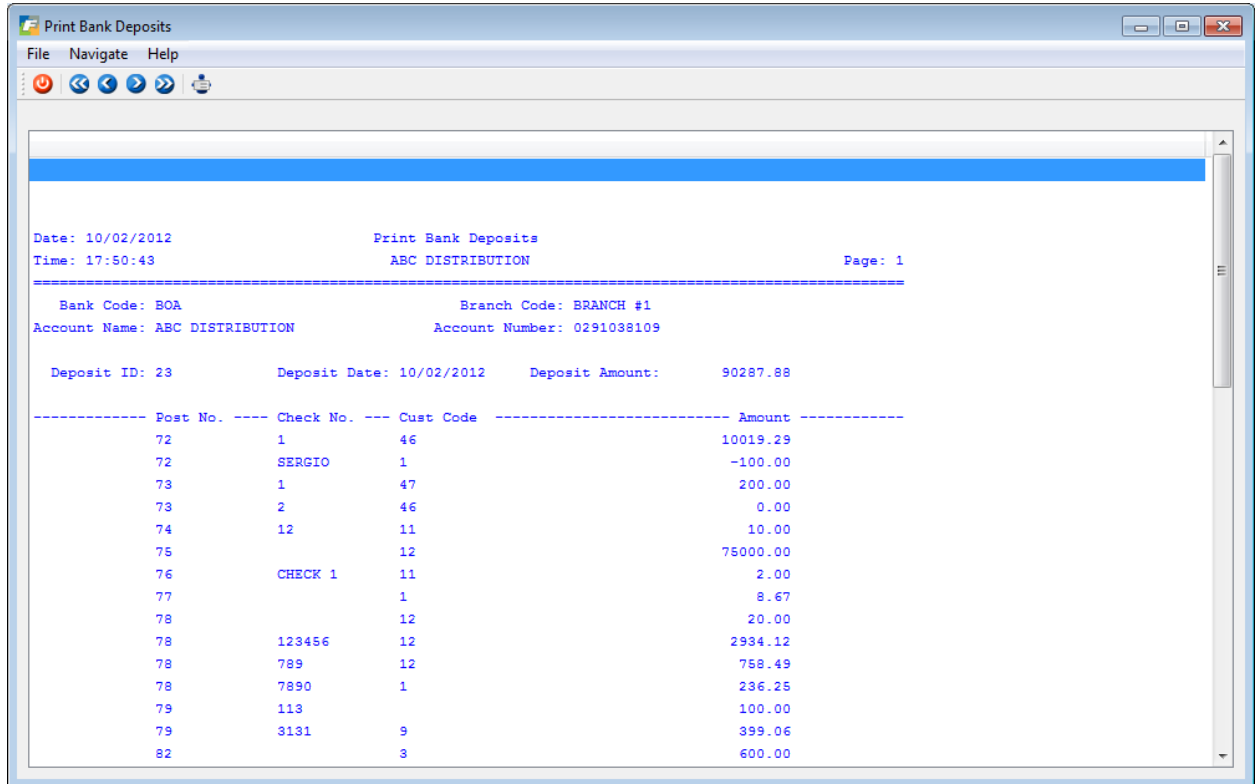

Include	Post No.	Amount
Y	73	200.00
Y	74	10.00
Y	75	75000.00
Y	76	2.00
Y	77	8.67
Y	78	3948.86
Y	79	499.06
N	80	24.95

Processing Credit Card Transactions:

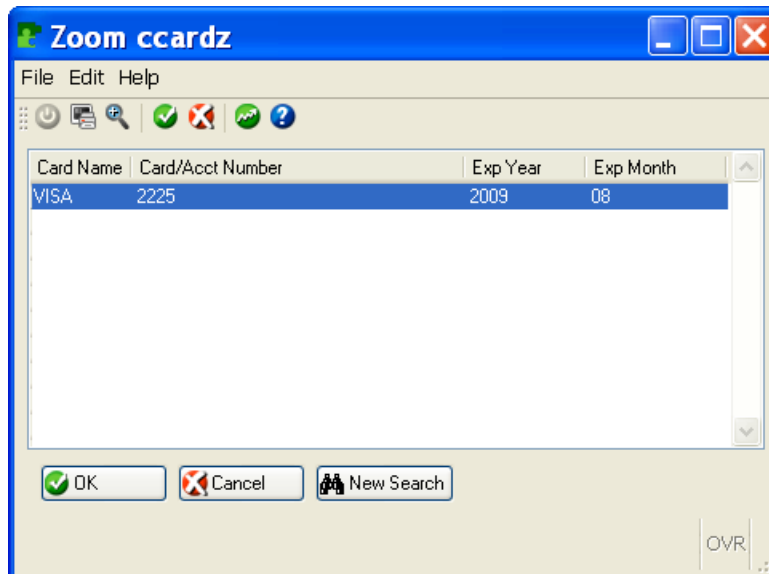

REAL TIME INVOICE AUTHORIZATION:

If an invoice is entered for a customer that pays via credit card or debit card, user will be prompted "Authorize Credit Card Now Y/N?" when the invoice is stored.

If an N is entered the invoice will be stored without credit card authorization. Each time an invoice that is paid via credit card is updated and stored and no authorization code is found, the user will receive this prompt.

A list of valid credit cards for the customer will display when the user stores the invoice. From this list, select the credit card the customer is using based on the type of credit card and the last four digits of the card the customer is using.

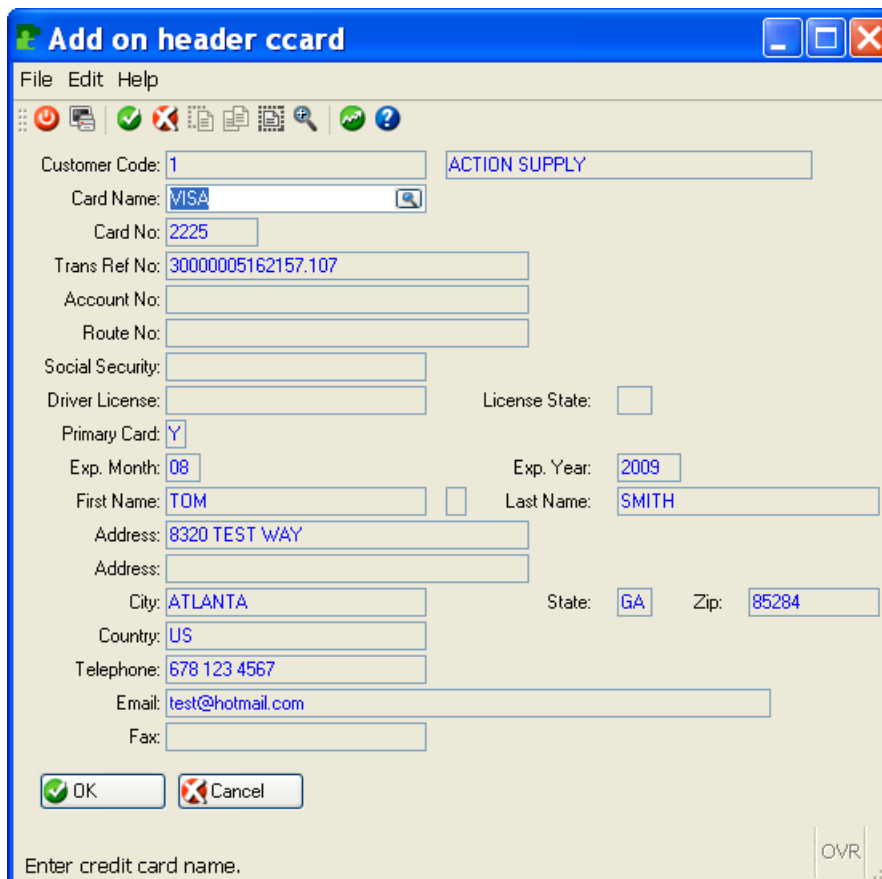

The 'Zoom ccardz' window displays a table with the following data:

Card Name	Card/Acct Number	Exp Year	Exp Month
VISA	2225	2009	08

At the bottom, there are buttons for 'OK', 'Cancel', and 'New Search'. An 'OVR' button is located in the bottom right corner.

Select the credit card and click on OK. The next screen displays additional information to confirm you are using the correct credit card. To authorize the invoice, click on OK.

The 'Add on header ccard' window contains the following fields and values:

- Customer Code: 1
- Card Name: VISA
- Card No: 2225
- Trans Ref No: 30000005162157.107
- Account No: (empty)
- Route No: (empty)
- Social Security: (empty)
- Driver License: (empty)
- License State: (empty)
- Primary Card: Y
- Exp. Month: 08
- Exp. Year: 2009
- First Name: TOM
- Last Name: SMITH
- Address: 8320 TEST WAY
- City: ATLANTA
- State: GA
- Zip: 85284
- Country: US
- Telephone: 678 123 4567
- Email: test@hotmail.com
- Fax: (empty)

Buttons for 'OK' and 'Cancel' are at the bottom left. An 'OVR' button is at the bottom right. A status bar at the bottom left says 'Enter credit card name.'

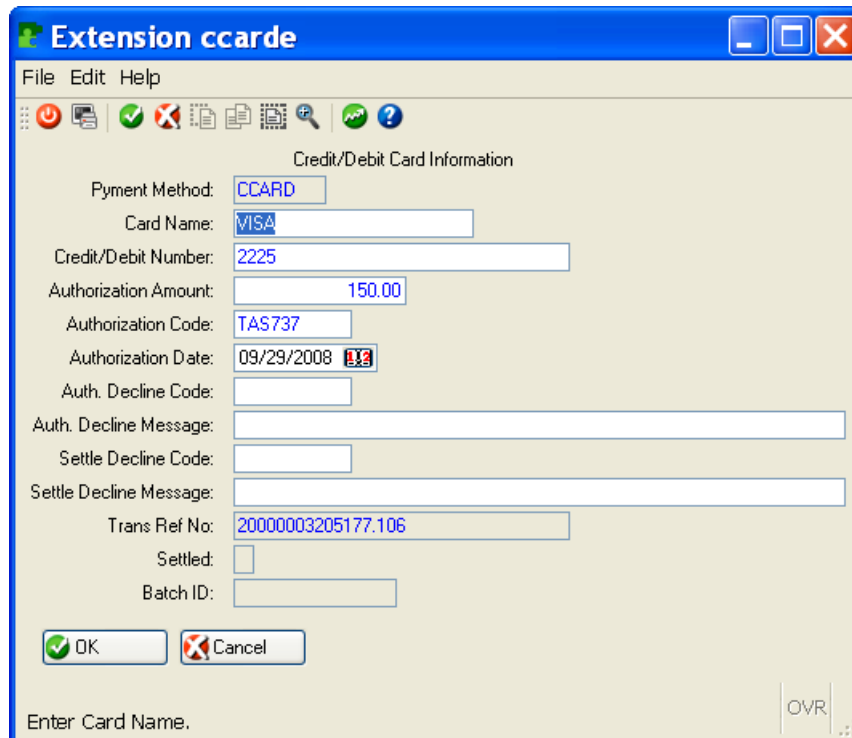

1. If the credit card is approved the invoice will be stored with the following information (to view this information click on the Credit/Debit card icon on the toolbar):

Credit Card No. – last four digits of the credit card number

Auth Code – authorization code returned by Skipjack

Auth Date – authorization date returned by Skipjack

Auth Amt- amount authorized

The screenshot shows a Windows-style dialog box titled "Extension ccard". It has a menu bar with "File", "Edit", and "Help". Below the menu bar is a toolbar with various icons. The main area is titled "Credit/Debit Card Information" and contains the following fields:

- Pymnt Method:
- Card Name:
- Credit/Debit Number:
- Authorization Amount:
- Authorization Code:
- Authorization Date:
- Auth. Decline Code:
- Auth. Decline Message:
- Settle Decline Code:
- Settle Decline Message:
- Trans Ref No:
- Settled: ☐
- Batch ID:

At the bottom left are "OK" and "Cancel" buttons. At the bottom right is an "OVR" button. A status bar at the very bottom says "Enter Card Name."

If the invoice number was left blank, one is automatically assigned since the invoice number is required by Skip Jack to authorize the invoice.

If email is turned on with Skipjack, an email is sent from SkipJack to the email address stored with the credit card used.

2. If the credit card is declined the following screen displays and user has the following options:

Retry –check this box if you would like to try to authorize again using the same information.

Enter New Credit Card- check this box if you would like to return to the list of credit cards for this customer and select another card to use.

Hold – check this box if you do not want to try to authorize again at this time. The invoice will be stored with the decline code.

Enter New Pmt Method- check this box if you want to change the payment terms to a term other than credit/debit card. You will be returned to the Invoice screen to enter a new payment method.

Enter Authorization Code Manually – check this box if you want to enter the authorization code manually and you will be returned to the Invoice screen. This will require a telephone call to SkipJack to get the authorization code.

Cancel Invoice- check this box if you want to cancel the invoice.

Update Card Information- check this box if you want to update the card information for the card being used (ex-update expiration date, etc.) and resubmit for authorization.

The screenshot shows a Windows-style dialog box titled "Select ccst". It has a menu bar with "File". Below the menu bar, there is a "Decline Code:" label followed by a text box containing "-20". Below that is a "Message:" label followed by a text box containing "Declined". To the right of these are five checkboxes, each with a label: "Retry:", "Enter New Credit Card:", "Hold:", "Enter New Pmt Method:", and "Cancel Invoice:". At the bottom left are two buttons: "OK" (with a green checkmark icon) and "Cancel" (with a red X icon). At the bottom right is a button labeled "OVR". At the very bottom, there is a small text note: "Check with (X) to retry credit card".

If the card is declined and email is turned on with Skipjack, an email is sent from SkipJack to the email address stored with the credit card used.

Note: If the credit card is declined you will receive a decline code of 20. There is no reason given by Skipjack and this is to prevent fraudulent activity. You must call Skipjack to find out why the card was declined.

3. If you increase the invoice amount after it has been authorized, you will be prompted "Authorize Additional Amount Y/N?" If you decrease the invoice amount you will be prompted "Reduce Authorized Amount Y/N?".
4. You also have the option of changing the customer's payment method to Credit card for a specific invoice by entering the payment method on the

invoice screen. If there is credit card information in the system for the customer a list of these credit cards will display. If there is not, a screen will display so that you may add the credit card information.

BATCH INVOICE AUTHORIZATION:

This program is used when you want authorize a batch of invoices rather than each individual invoice. An example of this would be if you import a batch of invoices into the Fitrix database and want to authorize them all at once in batch mode.

From the Receivable Ledger menu select option K, Credit Card Processing. Then select option A, Authorize Credit Card Invoices. This program will find all invoices that have a pay method of either CCARD or DDEBIT that have not yet been authorized and sends the invoice information to Skip Jack.

Once you have run the authorization program you must now run Option B, Receive Authorization Status. This program returns the authorization code, date, and amount and stores them with the invoice.

SETTLEMENT PROCESS

Send for settlement:

Once you have run the edit listing and printed your invoices, the next step is to run the Settle Credit Card Invoices program. This program sends the batch of invoices to Skipjack for settlement and marks the invoice settlement flag to S for "sent". This is option E on the Credit Card Processing submenu.

Settle Credit Card Invoices

File Navigate Help

Date: 09/29/2008 Credit Card Settlement Process Page: 1
Time: 14:01:52 ABC DISTRIBUTION
Settlement Batch ID:

Invoice No.	Doc No.	Invoice Amount	Settlement Amount	Status
980	382	20.00	0.00	Sent to SkipJack
983	385	10.00	0.00	Sent to SkipJack
984	386	5.00	0.00	Sent to SkipJack
986	388	50.00	0.00	Sent to SkipJack
987	389	50.00	0.00	Sent to SkipJack
Grand Totals:		135.00	0.00	

Receive Settlement Invoices:

Due to the time it takes to settle invoices with the credit card processor, you post invoices after the send process is run and then run this receive program the following morning after adequate time has lapsed. This is option F on the Credit Card Processing submenu. This program sets the invoice settle flag to Y for those that settled successfully, to D for those that were declined, and prints out the settlement report.

Any invoices that did not settle will have a null settlement amount. This report can be used to reconcile to the amount wired from your bank and to also apply cash receipts.

If email is turned on with Skipjack, the customer will receive an email confirming that their payment was settled.

Any invoice that does not settle will print on the invoices not settled report (option G on the Credit Card Processing submenu). The customer should be contacted to make alternative payment arrangements.

If email is turned on with Skipjack, the customer will also receive an email notification that payment was declined.

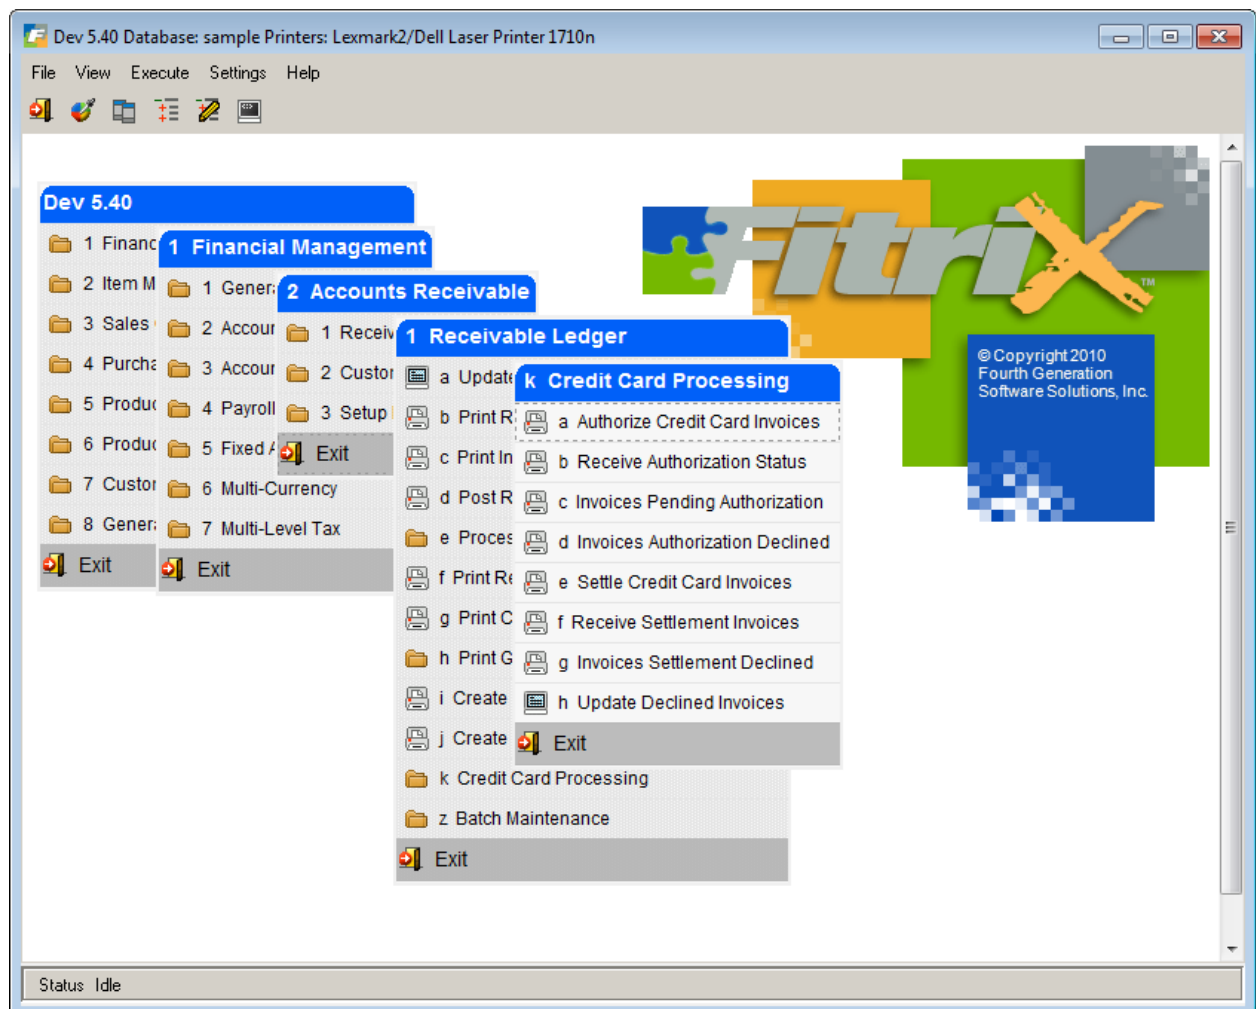

Update Declined Invoices:

As previously mentioned, invoices declined will have their settlement flag set to D and because of this they will print on the Invoices Not Settled report indefinitely. Use the Update Declined Invoices program (Option H on the Credit Card Processing menu) to reset this flag as follows:

Null- set to null if you wish to resend to Skipjack.

C – set to C if you wish to cancel and arrange alternate payment terms with the customer.

Invoices Pending Authorization- option (c) on menu below.

This report lists all open invoices that have not yet been authorized through Skipjack.

Invoices Pending Authorization

File Navigate Help

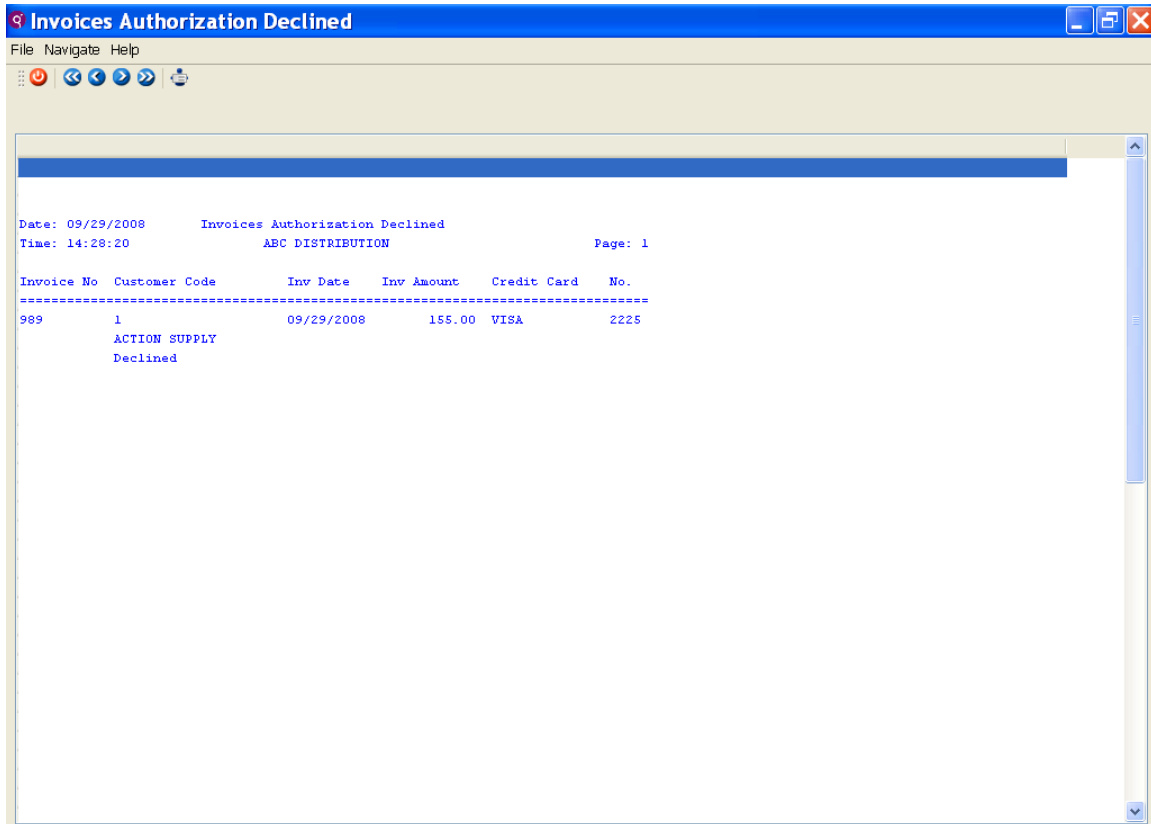

Date: 09/29/2008 Invoices Pending Authorization Page: 1
Time: 14:26:59 ABC DISTRIBUTION

Invoice No	Customer Code	Inv Date	Inv Amount	Credit Card	No.

ACTION SUPPLY					

Inbox - Microsoft Outlook

Credit Card Orders Declined- option (d) on menu above.

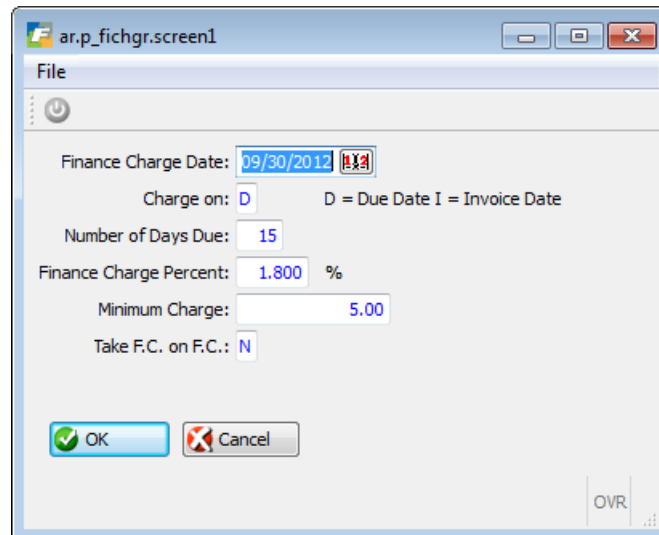

This report lists all invoices where authorization has been declined and alternative payment arrangements should therefore be made with the customer.

Create Finance Charges

To view this screen, select **Create Finance Charge** invoices (option i) and redirect to the screen.

Finance Charges are created prior to running customer statements and will be created for all customers that have Finance Charges flag set to "Y" in their Customer Information file.

Field	Description
Date	Date you want assigned to the finance charge, typically same date as the statement date.
Charge On	Due date or invoice date.
Number of Days Due	Number of days beyond due date or invoice date allowed before finance charge will be calculated (i.e., - if 30 is entered, finance charge will only be calculated on those invoices 30 days past either invoice date or due date.).
Finance Charge Percent	If 18% per annum, enter 1.5. Minimum Charge - Any calculated finance charge that falls below this minimum charge will be converted to this minimum charge.
Minimum Charge	Any finance charge calculated that is less than the minimum charge amount entered here will be converted to this minimum amount.
Take FC on FC	Enter "Y" if you want finance charges to calculate on previously charged finance charges.

This program creates open documents that must then be posted just like AR invoices.
Press ESC key to return to the Receivable Ledger Menu.

Create Recurring Documents

This option is Option J on Receivable Ledger Menu.

Recurring documents are documents that occur frequently or periodically (i.e., monthly maintenance fee). These documents are initially entered in Update Receivable Documents (option a on Receivable Ledger Menu) and assigned a recur code.

When this copy program is run, the post flag is set back to "N" thereby creating new documents to be posted. You will now be prompted for the following in Create Recurring Documents:

- a) Invoice date – you select a date for recurring documents instead of the date defaulting to the date that this program is run.
- b) Line Item Description – you enter a line item description that will globally apply to all documents for the recur code selected. For instance if you created recurring documents for monthly dues and the description used was "June Dues ", the next month you create these documents you will type in a Line Item Description of "July Dues". All recurring documents generated will have the description " July Dues" so that you do not have to go into each document and manually update from "June Dues" to " July Dues".

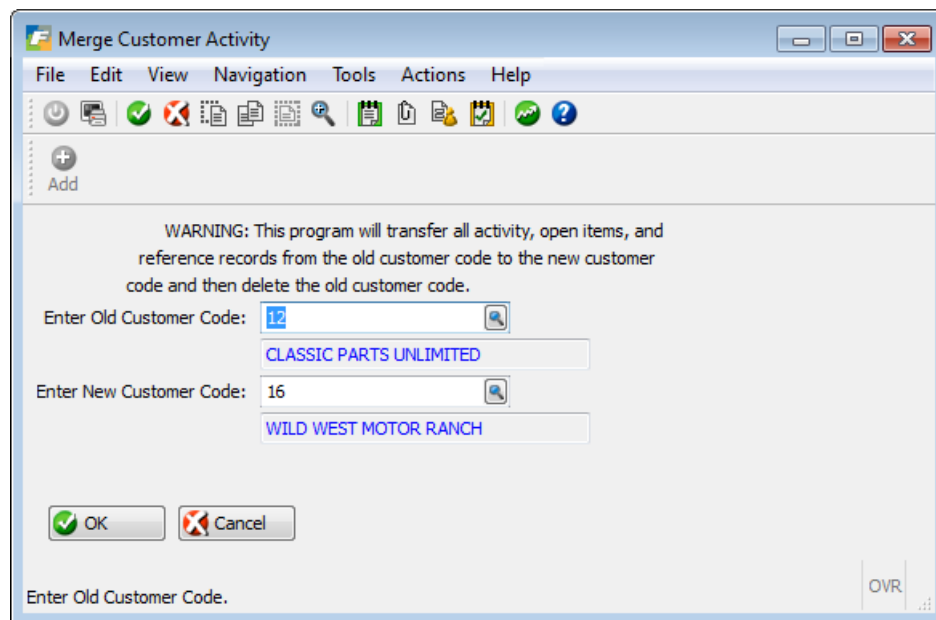

The program will automatically assign the next sequential invoice number. To continue processing these invoices through to the applicable AR and GL tables, run the print receivable listing, print invoices (optional), and post receivable documents programs.

Customer and Ship-To Code Maintenance

Transfer of Customer Codes and Activity/History

To view this program from the main menu, select General/Administration, System Administration, and then select P (Purge Activity) and then H (Merge Customer Activity).

This program is useful when a company changes names and you want to set up a new customer code that reflects the new company name and then transfer all sales history/activity to the new code.

To return to the previous menu, press Quit.

Print Duplicate Customer Information

After running the merge program above, the next step is to run this report program. This report program will list any information that could not be merged into the new customer code because it is a duplicate. For example, if old customer 2 has a ship-to code 01 and new customer 12 also has a ship-to code 01, ship-to 01 can not be merged. What you will need to do in this case is set up a new ship-to code under customer B for this shipping address.

Merge Ship-To Activity

To view this screen select option J form the Purge Activity menu.

This program transfers all sales history/activity to the new code and then deletes the old code.

Merge Ship-To Activity

File Edit View Navigation Tools Actions Help

Warning: This program transfers all activity and reference records from the old ship-to code to the new ship-to code and then deletes the old ship-to code.

Enter Customer Code: 1 ACTION AUTOPARTS

Enter Old Ship-to Code: CALIF ACTION AUTOPARTS WEST

Enter New Ship-to Code: WASH

OK Cancel

Enter the target ship-to code merge with. OVR

Press Quit, and then ESC key until you are returned to the main menu.

End of Month Reports

- **Print Receivable Journal (optional)** - Lists AR documents by document number and details GL Distribution.
- **Print Cash Receipts Journal (optional)** - Lists cash receipts by document number and details GL Distribution.
- **Print GL Activity (optional)** - Lists all AR activity by ledger account number.
- **Print Customer Aging (optional).**
- **Print Customer Statements (optional)** – if you enter a value in the days past due field on the print selection screen a statement will print only for those customers that have invoices this number of days past due or greater.

Accounts Receivable Review

- v Accounts Receivable stores Ledger Information and Customer Information.
- v Accounts Receivable tasks include:
 - Setting up the Accounts Receivable Module
 - Adding and Updating Customer Information Records
 - Entering Customer Invoices, Credits and Debits
 - Entering Customer Payments and Non A/R Cash Receipts
 - Processing Credit Card Transactions
 - Performing the End of Period Processing and Transactions
- v Setting up Accounts Receivable includes defining reference files or codes, defining the Accounts Receivable defaults, adding customer information and multiple ship-to's, adding Customer Open Items or beginning balances and changing the Setup Complete to Y.
- v Adding Customer Information includes entering data for the customer record. In addition to the main data entry screen there are several screen programs launched from the toolbar that store customer data including billing information, multiple ship-to addresses, accounting and multilevel tax defaults.
- v Accounts Receivable Documents go through the following three steps to become Customer Open Items:
 - A document is entered in Update Accounts Receivable Documents.
 - An Edit List is printed prior to posting to check for data entry errors.
 - Documents are posted and become A/R open items.
- v Two types of receipts are processed through the system A/R and Non A/R receipts. A/R receipts are cash receipts on customer accounts. Non A/R receipts are any cash receipts that are not applied towards customer accounts.
- v Accounts Receivable Ledger end of period processing includes the following steps:
 - Print the Receivables Journal
 - Print Cash Receipts Journal
 - Print G/L Activity
 - Create Finance Charge Invoices
 - Create Recurring Documents
 - Print Customer Statements
 - Print Customer Aging

Lab Exercise a: A/R Setup Activities

Update Account Groups (AR-3-c)

1. Add an Account Group for Rental Income:

- ☐ Group Code = RENTIN Description = Rental Income
110000000 000 Accounts Receivable
450000000 000 Rental Income

Press Enter or click on OK to store.

Update Customer Information (AR-2-a)

1. Add a new customer

- ☐ Customer Code: 22

Billing info:
Disposal Control Service, Inc. Credit Limit: \$5,000.00
888 W. Illini Street, Austin, TX 899997561 Finance Chg: Y
Contact: Bobbi Good Tax Code: SEATX
P: 512-268-1356 F: 512-268-9954
Salesperson: Bill Johnson (CTRL-Z to find code)
Credit Terms: Net 30 (CTRL-Z to find code)

Press Enter or click on OK to store.

Update Customer Ship-To (AR-2-f)

1. Add a ship-to address for this customer.

- ☐ Customer Code: 22
Ship-to: SEA
Disposal Control Service, Inc.
Tax = SEATX
Ralph Grath 206-545-8892
3467 Industrial Way

Tukwila, WA 98008

Sales Person: Tom Mack (CTRL-Z to find code)

Lab Exercise b: A/R Documents Processing

Enter Transactions as A/R documents

(NOTE: Press Enter to store after each transaction is entered or click OK.)

1. Create a monthly recurring A/R invoice for rent for office space using the RENTIN Group. (AR-1-a)
 - ☐ Customer 18
Recurring code "M"
Monthly amount \$2,500.00 with Net due 30
2. Create a receivables invoice for services rendered. (AR-1-a)
 - ☐ Customer 14
Amount \$180.00
Credit the Non-classified Sales Account for services rendered using department code 000.
3. Create a receivables invoice. (AR-1-a)
 - ☐ Sale to Classic Parts Unltd. for car stereo parts (Zoom to look up the Cust Code)
Sony Car Stereo \$677.00 (Zoom on Acct. No. to look up the Stereo Sales Acct.)
Stereo Accessories \$23.00 (Zoom on Acct. No. to look up the Accessories Sales Acct.) Tax = SEATX
 - ☐ Sale to Customer #21 (Discount 10% Auto) for engine parts (Zoom on Acct. No. to look up the Engine Sales Account)
2 Ford engines
Tax = SEATX
\$1,200 each
 - ☐ Sale to Action AutoParts for auto parts (Zoom on Acct. No. to look up the Parts Sales Account)
100 ft. radiator hose
\$1.23 per foot
 - ☐ Sale to Mecca New and Used Auto Parts for phone sales (Zoom on Acct. No. to look up the Phone Sales Account).
Cellular Phone and battery \$325.00
4. Add a receivables document for a debit memo. (AR-1-a)
 - ☐ DM-1 for Ravenna Motors for correction of doc number 26 for engine sales in the amount of \$53.56 (Zoom for correct account number)
5. Add a receivables document for a credit memo. (AR-1-a)
 - ☐ CM-I for Sherry Auto Supply for return of merchandise for doc number 24 in the amount of \$113.86 (Zoom for Returns and Allowances account number)

Print Edit List (AR-1-b) (Redirect to screen)

1. Print the Posting Edit List. (redirect to the screen).
2. Review the Accounts Receivable Documents for errors. If there are any errors, a message will print at the end of the report. Any transactions containing errors will not post until corrected and a new edit list printed.

Print Customer Invoices (AR-1-c). Redirect to screen.

1. Print all customer invoices.

Post A/R Documents (AR-1-d). Redirect to screen.

1. Post the Accounts Receivable documents.

Lab Exercise c: Receipts Processing

Update Non A/R Receipts (AR-1-e-a)

NOTE: Press Enter after each transaction is entered to store.

1. Add a Non A/R Receipt Document for \$500 received from Frank Aldorf for Employees Receivable. (Zoom to find account number for Employee Receivables).
2. Add a Non A/R Receipt Document for the following weekly cash sales:

The total receipt amount is \$30,300.00. You will need to Zoom to find each sales account number.

<input type="checkbox"/>	Parts Sales	\$5,800.00
<input type="checkbox"/>	Stereo Sales	\$3,500.00
<input type="checkbox"/>	Engine Sales	\$5,500.00
<input type="checkbox"/>	Electrical Sales	\$9,500.00
<input type="checkbox"/>	Phone Sales	\$2,500.00
<input type="checkbox"/>	Accessory Sales	\$3,500.00

Update A/R Receipts (AR-1-e-b)

NOTE: Click OK after each transaction is entered to store.

1. Receive a customer payment and automatically apply it towards the open invoice from the header portion of the screen.
 - Action Autoparts received \$104.00 for Invoice 1
2. Receive a payment that is not attached to specific invoices.
 - Fisher Supply received \$10,000.00 on account
3. Receive a payment for invoices.
 - Wild West Motor Ranch Invoice 9 payment amount \$1995.00
4. Receive a partial payment and create a chargeback.
 - Classic Parts Limited – pay \$ 1750.00 on invoice number 84 and the \$50.00 short payment is for a freight dispute.

Run the edit and post programs

5. Carry Over Cash.

- Run a detail aging report, find two different customers and write down an invoice number and the amount for each one. Receive a payment for the total of the two invoices using one of the customer codes and do an auto apply to the invoice number you selected. Then apply the remaining payment to the other customer code/invoice number.

6. Apply a Duplicate Payment.

- Go to the Update Customer information screen and find customer code 10. Look in the activity screen and write down the invoice number and amount of any invoice that shows a zero balance. Receive a payment for amount of this invoice and reopen the invoice with a negative amount.

7. Print Cash Receipts Edit List and check for errors (AR-1-e-c). Redirect to screen.

8. Post Cash Receipts. (AR-1-e-d). Redirect to screen.

9. Credit Hold Letter.

- Customer code 8 has exceeded their credit limit. Place them on credit hold and send them a letter to notify them that they are on credit hold.

Lab Exercise d: Finance Charge Invoices

Create Finance Charge Invoices (AR-1-i)

1. Create finance charge invoices with:
 - ☐ Date = today's date
Charged on invoice due date plus 20 days
Finance Charge 1.5% with a minimum charge of \$2.00
Do not take finance charge on finance charges
2. Review the Finance Charge Invoices in Update Receivables Documents. Go to Update Receivable Documents, select Find, enter today's date, and press Enter to view all documents.
3. Print the Receivables Documents Edit List. (AR-1-b) Redirect to screen.
4. Post the Receivable Documents. (AR-1-d). Redirect to screen.

Lab Exercise e: A/R End of Period

Accounts Receivable End of Period

NOTE: Redirect all reports to screen.

Complete the Accounts Receivable End of Period activities.

1. Print the Receivables Journal from the beginning of the year through today (AR-1-f).
2. Print Cash Receipts Journal from the beginning of the year through today (AR-1-g).
3. Print G/L Activity from the beginning of the year through the most current GL period (AR-1-h).
4. Print Customer Statements. (AR-2-g) Press enter when prompted for cycle number, enter today for the statement date, and press Enter to select all customers.
5. Print Customer Aging Summary (AR-2-h-a) Use today for aging date, base it on due date, and press Enter to select all customers.

Accounts Receivable Summary

The following points of training were covered in this Chapter. If you feel that you have not mastered all objectives, go back and review those sections.

- Accounts Receivable maintenance and overview.
- Accounts Receivable Module tasks and processes.
- Setup the Accounts Receivable Module.
- Add and update Customer Information.
- Process Accounts Receivable Documents.
- Process A/R and Non A/R receipts.

CHAPTER 3 - *Accounts Payable*

Fitrix Accounting Course Workbook

Learning Objectives

- To learn the major tasks performed in Accounts Payable
- To learn the steps to setup the Accounts Payable Module
- To learn how to process Accounts Payable Documents
- To learn the steps in Processing Checks
- To learn the procedures for completing Accounts Payable Month End

Overview of Accounts Payable

What type of Information is maintained in A/P?

The Accounts Payable module tracks two kinds of information:

1. Ledger - refers to information relating to company's P/L Statement and Balance Sheet.
2. Vendor - pertains to the specific conditions of a vendor account.

Both types of information are maintained by entering documents into the system. There are four types of documents:

- Vendor Invoice
- Vendor Credit
- Vendor Debit
- Checks to Vendors

Another type of document that affects only the ledger account information is the "Non A/P check" or cash disbursement. This document records the payment of money, but the payment has no effect on any vendor.

What Tasks or Activities are performed in Accounts Payable?

The major tasks in Accounts Payable include:

- Entering Vendor Invoices, Credit memos and Debit memos
- Processing Automatic Checks for Vendor Payments
- Maintaining Vendor Information
- Performing the End of Period Accounting Activities

What Relation does Accounts Payable have to Other Fitrix Modules?

The two modules that Accounts Payable is most closely related to in the Fitrix accounting system are General Ledger and Purchasing. Ledger information posts to the General Ledger activity to update ledger account balances for cash, accounts, payable, inventory purchases, etc. Vendor Information and programs are shared with Purchasing. Purchasing processes vendor invoices for purchase orders to create accounts payable open items.

Accounts Payable Setup

To view this menu, select **Financial Management > Accounts Payable > Setup Payables** (option 4).

The Accounts Payable Setup Menu contains the options for setting up the Accounts Payable System.

Basic setup for Accounts Payable includes entries of A/P default, vendors and pay-to address and entry and verification of existing open items. Default tax rates, the ledger account number for cash and discounts for A/P are Setup through the Company Setup programs.

Before entering payable defaults, all ledger accounts and vendor terms codes that will be payable defaults must be defined. The Update Ledger Accounts and Update Vendor Terms options are available for entering ledger accounts and term codes.

Vendor Information and vendor pay-to addresses are usually entered during setup. Existing open items for these vendors may also be entered at this time. Existing open items can be added only during the setup phase or prior to setting the Accounts Payable default setup to complete. Once the system is set to complete, open items can no longer be entered through the Update Vendor Items. Open Items must be created by posting an accounts payable document. Setup is also an appropriate time to designate certain cash ledger accounts and 1099 reporting. This is an optional setup activity that can be done either before or after setup is complete.

The final step to completing the Accounts Payable setup is to set the Setup Complete flag, in Accounts Payable defaults to "Y". Completion of the setup is accomplished through a field at the very bottom of the Update Payable Defaults screen. This Y/N field, when set to Y, automatically totals existing items, displays this amount and prompts the user to verify that no additional A/P

setup entries will be needed. Entering Y tells the system to proceed with posting of all A/P open items.

If A/P setup is complete and additional setup open items are found and need to be entered, this field may be reset to "N". Doing this will pull up a warning and prompt the user to continue. Entering "Y" to continue will un-post all transactions from the Accounts Payable posting tables. If transaction processing has not been started, no harm is done since only setup open items have been posted. Now the additional open items may be entered and setting Setup Complete to Y can be done again. These additional open items plus the original open items will post at this time.

If transaction processing has been started and the setup complete field is reset to N, all posted transactions are deleted from the A/P posting tables. It is generally not a good idea to change the setup complete flag back to "N" once you have started using the system.

OVR

Invoicing Section

Field	Description
Terms Code	The system default payment terms code which must be set up in the Terms Code reference files. This will be used unless a terms code is found at the vendor level.
Description	Description of the Terms Code.

Multilevel Tax Section

Field	Description
Default Tax Code	This is the default tax code used for the Update Payable Documents if a tax code cannot be found in the Vendor Pay-To file or the Vendor Information file.
Gross Invoice Entry	<p>This field determines the default mode for entering amounts for the Update Payable Documents and Update Non-A/P Checks options. It is the default for the Gross Amt Entry field found on the Payable Documents and Non-A/P Checks screen programs.</p> <p>If set to "Y", amounts entered include the tax. The net amount is computed and this is the amount posted to the GL activity for the line item.</p> <p>The tax is posted to a different account, as determined by the Accounts Payable account specified for the Multilevel Tax code with Update Multilevel Tax Code.</p>
Tax Entry on Detail	Entering a "Y" in this field allows you to assign a Multilevel Tax code to each detail line of the documents entered through Update Payable Documents.
Calculate Tax on Cash Discounts	<p>This field determines the behavior of the Update A/P Checks option. If a "Y" is entered, a Multilevel Tax transaction is generated to automatically back out the tax discounted when discounts are taken on A/P invoice.</p> <p>This is necessary because when an A/P invoice is posted, an entry is posted to the Multilevel Tax activity file for the full amount of tax charged, regardless of any discount available for the timely payment. When a discount is taken on an invoice, the full amount of tax for the invoice is posted and a separate entry to the Multilevel Tax activity file is required to show the effect of the discount. If the Calculate Tax on Cash Discounts field is set to "Y" a transaction is automatically generated to adjust the Multilevel Tax information.</p> <p>The ledger account that these adjustments are posted to is the ledger account entered as the A/P Discount Account in Update Multilevel</p>

Field	Description
	Tax Codes. If this field contains an "N", no such adjustment is generated when cash discounts are taken.

Account Numbers Section

Field	Description
A/P	The default general ledger account A/P documents and checks will post to. This can be overridden at the vendor level.
Cash	The default general ledger account A/P check processing will post to. This can be overridden at the vendor level.
Discount	The default general ledger account A/P documents and checks will post to.

Aging Information (Determines how outstanding invoices are aged)

Field	Description
Age On	Determines how outstanding invoices are aged. The only two valid entries are; "D" for Due Date and "I" for Invoice Date.
Description	The description fields are used to define the descriptions for four aging periods. Each description that you enter here appears as a heading on the Vendor Aging reports.
Days	The actual number of days the aging will break on and be distributed within.

Tax Reporting Section

Field	Description
Federal Tax ID Number	The tax ID number required by the Federal Government for your company.
Vendor Default for 1099 Reporting?	(Y)es or (N)o. A "Y" in this field means the 1099 Required field on the Vendor Information form will default to "Y" if not filled in.

Miscellaneous

Field	Description
Is A/P Setup Complete?	When setup is complete and the open items have been entered and balanced. After changing to "Y" the system will prompt you for responses to messages.
Batch – Invoices?	This field is asking, "Should A/P invoices be grouped into batches, "Y" or "N"?"
Payments?	This field is asking, "Should A/P payments be grouped into batches, "Y" or "N"?"
Require Approval to Post?	If Batch – Invoices? or Payments?: is set to "Y", then the options here are "Y" or "N" if you wish to require approval to post.
Approval Code	Enter an approval code for Accounts Payable batches. The Require Approval to Post?: field must be set to "Y".

Click on Quit to return to Setup Payables Menu

Update Vendor Open Items

To view this screen, select **Update Vendor Open Items** (option h).

Enter all invoices with outstanding invoice balances that will be loaded on the system at the time of setup. Prior to setting the Control Table to "Y" you will be able to enter all information on the screen. After setting the control table to "Y" you will only be able to enter "To Pay Information".

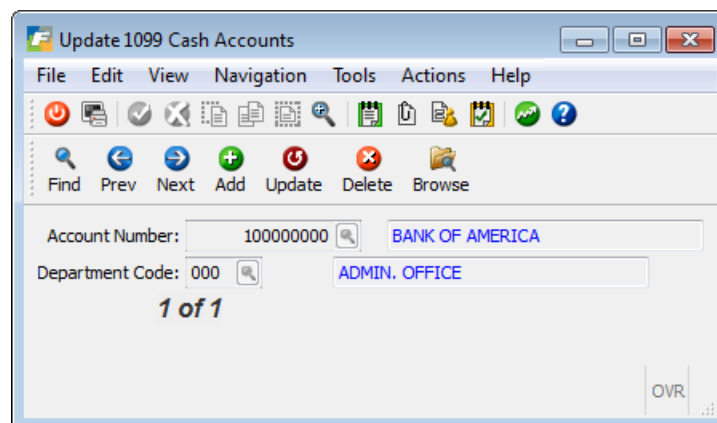

Field	Description
Vendor Code	Twenty-character alphanumeric field. This code must have been previously set up using the Update Vendor Information option.
Pay-To-Code	Six-character alphanumeric field. This code must have been previously set up using the Update Vendor Pay-To's option. This pay-to code is used if the vendor address that prints on the check (pay-to code) is different than the vendor code's address.
On Account	This is the amount that you owe a vendor that is not associated with a

Field	Description
	particular invoice (i.e.; you've made a payment on account). During setup, you can enter the amount here or in the on account field in the Vendor Information form.
Balance	Amount due vendor. System updates this field as open items are entered.
Invoice	Twenty-character alphanumeric field stores vendor invoice number.
Description	Optional
Date	Date vendor issued invoice.
Original Amount	Original amount of vendor's invoice before any payments are made.
Original Discount	Amount of discount available if paid by due date.
Invoice Balance	Amount currently due on the invoice.
Discount Balance	Amount of discount still available.
Due Date	Calculated by system based on invoice date and vendor payment terms.
Discount Date	Last date you are able to receive a discount. When this date is filled in, the Date to Pay field defaults to this date.
To Pay Information	System fills these fields in based on information previously entered.

Click on Quit to return to the Accounts Payable menu.

Update 1099 Cash Accounts

This option allows you to identify any cash accounts whose cash disbursements must be reported to the IRS.

Account Number:

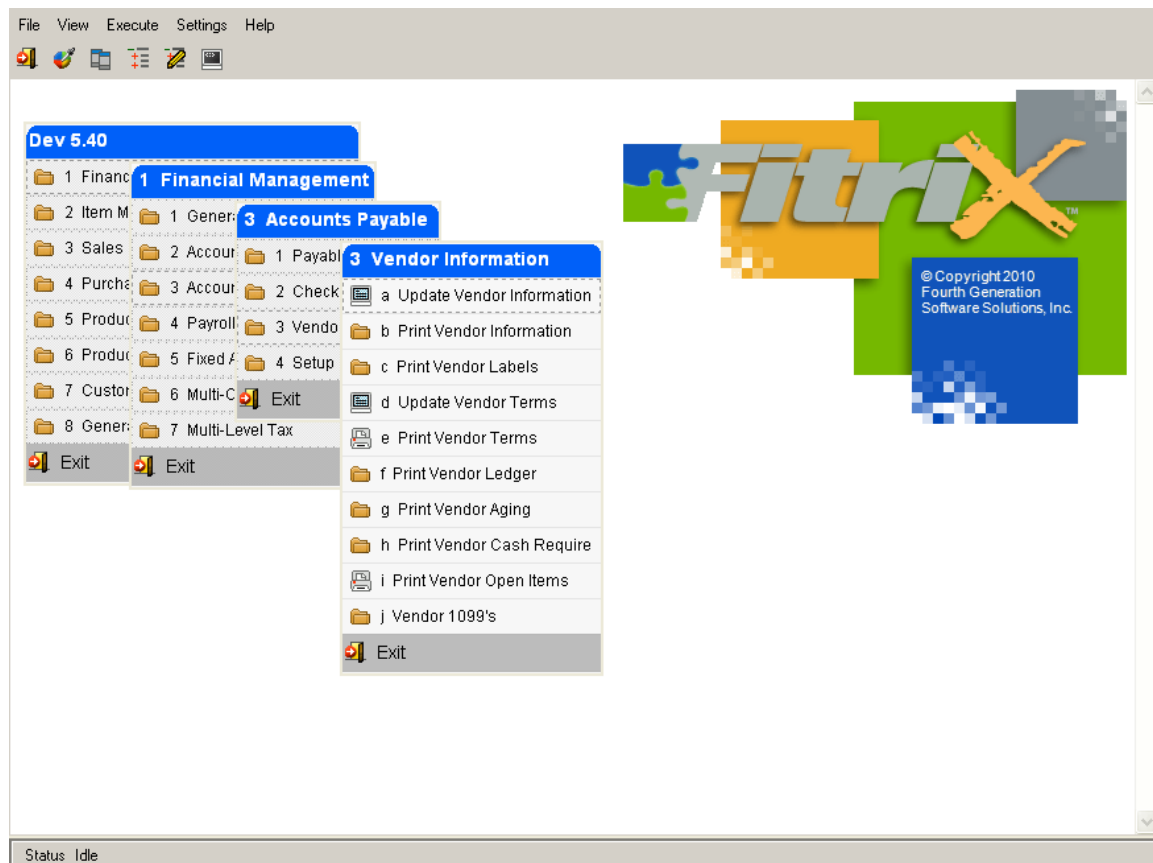

Contains the number of the ledger account affected by 1099 reporting. Zoom is available.

Department Code:

Contains the department code associated with the ledger account. Zoom is available.

Vendor Information

To view this menu, select Financial Management > Accounts Payable > Vendor Information.

There are menu options for:

- Maintaining Vendor Information and printing Vendor Information and Vendor Labels.
- Maintaining Vendor Payment Terms.
- Printing Ledger Information including Vendor Ledger, Vendor Aging and Cash Requirements.
- Other vendor reports including Open Items and Vendor 1099's.

Update Vendor Information

To view this screen, select Update Vendor Information (**option e**).

The Update Vendor Information option is used to add and maintain information about vendors.

The fields on the Vendor Information screen are described below:

Field	Description
Vendor:	This field holds the code that identifies the vendor. Once a vendor has transactions in the system, you cannot change that vendor's code, nor delete the vendor record. This field holds up to twenty alphanumeric characters, and utilizes the Zoom function.
Business Name:	This field stores the business name of the vendor. If you do not enter a Pay-To address for the vendor, the information in this field appears on checks, and also on many reports and forms. This field holds up to 30 alphanumeric characters.
Account No	This is your account number with the vendor (entry optional). This account prints on both the Vendor PO and the Vendor AP Check.
Contact:	This field stores the name of the person that you most frequently telephone concerning payments to this vendor. This field holds up to 20 alphanumeric characters.
Phone/Cell/Fax	This field stores the telephone, cellular, and facsimile numbers of the contact person. This field holds up to 20 alphanumeric characters.

Field	Description
Currency:	If you are using multicurrency, the Currency Code defaults to the home currency as defined in Update Multicurrency Defaults. If you are not using Multicurrency, the Currency Code field defaults to null. You cannot change the currency code of a vendor that has posted any activity. This is to ensure that the balance and activity for the vendor remain in a single currency. This is a required field.
Address:	This field stores the first line of the main address for the vendor. If you do not enter Pay-To Addresses, the main vendor address appears on checks. Up to 30 characters.
C/S/Z/C	This row stores the vendor City (up to 20 alphanumeric characters), State (2 characters), Zip Code (Up to 10 alphanumeric), and Country (up to 20 alphanumeric).
Email/Web:	These fields contain the email address for the contact person, and the web address for the company.
Tax Code:	This field is the multilevel tax group code for the vendor. It is the default multilevel tax group code for the Update Payable Documents and Update Non-AP Checks options. This field holds up to six alphanumeric characters, and utilizes the Zoom function.
Bill Ins.:	The Billing Instructions field can be used to record any special payment instructions from this vendor. This field holds up to 50 alphanumeric characters.
Last Pay:	This is a system-maintained, Last Payment Date field (mm/dd/yyyy). It displays the date on which a payment was most recently made to this vendor. The field is updated when a check is posted to the vendor's account via Accounts Payable.
Hold:	The Hold Payment field accepts an entry of Y or N or it can be left blank. When set to Y, it prevents the creation of automatic checks for a vendor.
Take Disc.:	This single-character Take Discount field accepts an entry of A, Y, or N to control how discounts are taken when Automatic Checks are created. If this field contains an A, discounts are taken even if the payment is after the discount date. If this field contains a Y, discounts are taken only if the payment is made on or before the discount date. If this field contains an N, discounts are not taken. The discount taken may be changed manually before checks are printed.
Discount:	This field is currently not functional.
Balance:	This numeric field displays the total amount owed to the vendor. This amount does include the On Account amount. This is a system-maintained field.
On Account:	This numeric field shows you the amount that you have paid the vendor on account; in other words, the amount that you have paid the vendor that is not associated with a particular invoice.
A/P Terms:	This field stores the Accounts Payable Terms code for the vendor. The vendor's terms are used to calculate when invoices are due, what discounts are allowed, and when those discounts are lost. The terms code must previously have been set up in the Terms file using the Update Vendor Terms option of the Vendor Information Menu in A/P. This field utilizes the Zoom function.
Limit:	This numeric field contains the maximum amount, if there is one, which this vendor allows you to owe.
Acct. Grp.:	This field stores the default Account Group to use for this vendor. Account Groups, the groups of related ledger accounts that can be used automatically in invoice entry, are generally used to specify different categories of purchase. Account Groups entered must have previously been set up in the Account Groups file in G/L.
FedTax ID:	This nine-digit numeric field stores the Federal Tax Identification Number used for 1099 reporting purposes. The proper format for this field is xx-xxxxxxx and xxx-xx-xxxx .
1099 Required:	This Y/N field determines if you want to report 1099 information for this vendor. If

Field	Description
	this field is set to Y then transactions with this vendor will be printed on the 1099 report.
On PO	Display only field of total \$ amount of open purchase orders for this vendor.
YTD Purchases	System maintained field that stores YTD \$ purchases. It is reset every fiscal year.
Lifetime Purchases	System maintained field that stores Lifetime \$ purchases
A/P:	<p>The first section of the A/P Account field is a numeric field that stores the default account payable vendor code. This is the account that appears in the Update A/P Checks, Update Non-A/P Checks, and the Payable Documents. If you do not make an entry in this field, the A/P account number from the Accounts Payable Defaults table is used. The number that you enter must be a valid account number in the Ledger Accounts field. The Ledger Accounts are maintained with the Update Ledger Accounts option on the Setup Company Menu.</p> <p>The second part of the A/P Account field is the default department code for this vendor. If you are using department codes, this field allows you to link the activity of a vendor with a department. This column defaults to the 000 department code. In order to use the department code feature, department codes must have previously been set up using the Update Company Information option of the Setup Company Menu.</p> <p>This field utilizes the Zoom function.</p>
Cash:	This field stores the ledger Cash account used to pay this vendor. Any entry must correspond to an established cash account. If you do not enter an account number in this field, the default Cash account from the Accounts Payable Defaults table will be used for this vendor. A department code can be entered in the unlabeled field to the right of the Cash account field. This field holds up to nine alphanumeric characters, and utilizes the Zoom function.
EXP-COG:	This field stores the Expense Account/Cost of Goods Account used for purchases from this vendor. An unlabeled field next to the Expense field stores a department code associated with this Expense/Cost of Goods Account. This field holds up to nine alphanumeric characters, and utilizes the Zoom function.
Rebate	This is the account debited when Month End Rebate processing is run. If left blank the default Rebate Recv account number will be used. See the section of this training guide that discusses manufacturer's rebates.
Credit Card Template	If the vendor has a credit card template code then the vendor can be used in the credit card statement importing process. See Chapter Six for more information on the Credit Card Import programs.

To determine how purchase orders are to be sent to your vendors, click on the

Icon on the toolbar and this screen displays:

Document	Title	Print	Subject	E-Mail	Address	FAX	Number
puo_order	Purchase Order	<input checked="" type="checkbox"/>	Purchase Order	<input type="checkbox"/>		<input type="checkbox"/>	

OK Cancel

Check document delivery method

When setting up new vendors the delivery method will default to Print and the PO will be mailed.

To view what makes up the detail of the On PO dollar amount click on the  icon on the toolbar and this screen will display:

PO Number	Date	Item Code	Description	Stg	Open Quantity	UM	Cost	Total

Update Pay – To Information

To view this screen, select Update Pay-To Information (**option f**).

In addition to the information on the Vendor Information screen, you may enter one or more separate Pay-To Addresses for a vendor. This feature is often used when you want to keep one vendor account for a number of different vendor locations. The Pay-To address is where you will send the purchase orders and payments.

The screenshot shows the 'Payto' application window. It has a menu bar (File, Edit, View, Navigation, Tools, Actions, Help) and a toolbar with icons for Find, Prev, Next, Add, Update, Delete, and Browse. The main form contains the following fields:

- Vendor Code: 123457 (with a search icon) and CHAMPION INC (in blue text)
- Pay-To: EAST
- Pay-To Name: EAST COAST OFFICE
- Contact: BOB JONES
- Phone: 800-458-7800
- Address1: 100 SPRING WAY
- Address2: (empty)
- City/State/Zip: NEW YORK NY (with a search icon)
- Country: US (with a search icon) and UNITED STATES (in blue text)
- Email: (empty)
- Web Address: (empty)
- Bill Ins.: (empty)
- Bckord: (empty)
- Tax: NOTAX (with a search icon)
- Take Disc.: N
- ETA Days: 30
- Buyer: CATHY (with a search icon) and CATHY SELIN (in blue text)
- Discount: (empty)
- Pay Method: AP (with a search icon) and ACCOUNTS PAYABLE (in blue text)

At the bottom left of the form area, it says '1 of 2'. At the bottom right, there is an 'OVR' button.

Field	Description
Vendor Code	This field holds the code that identifies the vendor. Once a vendor has transactions in the system, you cannot change that vendor's code, nor delete the vendor record. This field utilizes the Zoom function.
Pay-To Code	This field stores the unique code that identifies this Pay-To Address for this vendor.
Contact	This field stores the name of the person that you most frequently telephone concerning payments to this vendor. This field holds up to 20 alphanumeric characters.
Phone	This field stores the telephone number of the contact person. This field holds up to 20 alphanumeric characters.
Address Fields	This field stores the first street address line of the Pay-To address. This is the first line of the address that will appear on checks for this Pay-To location. The entire address consists of the fields Address 1, Address 2, City, State, Zip, and Country.
Email and Web	The email address of the Vendor contact and the Web Address of the company.
Bill Ins.	This Bill Instructions field stores any special payment instructions that this vendor may have.
Bckord.	In this Backorder field, enter a Y if you will allow backorders from this vendor.
Tax	This tax field accepts the multilevel tax group code for this vendor pay to location.

Field	Description
	This field holds up to 7 alphanumeric characters.
Take Disc.	This single-character Take Discount field accepts an entry of A, Y, or N to control how discounts are taken when Automatic Checks are created. If this field contains an A, discounts are taken even if the payment is after the discount date. If this field contains a Y, discounts are taken only if the payment is made on or before the discount date. If this field contains an N, discounts are not taken. The discount taken may be changed manually before checks are printed.
ETA Days	This field holds the Time of Arrival in days in terms of how long it takes you to receive items from this vendor.
Buyer	Enter the Buyer code for the person who ordered from this vendor.
Discount	This field is currently not functional.
Pay Method	This field holds the Payment Method code for this vendor.

Press Quit to return to the Accounts Payable submenu.

Print Vendor Information (option b on submenu)

Prints Vendor Information.

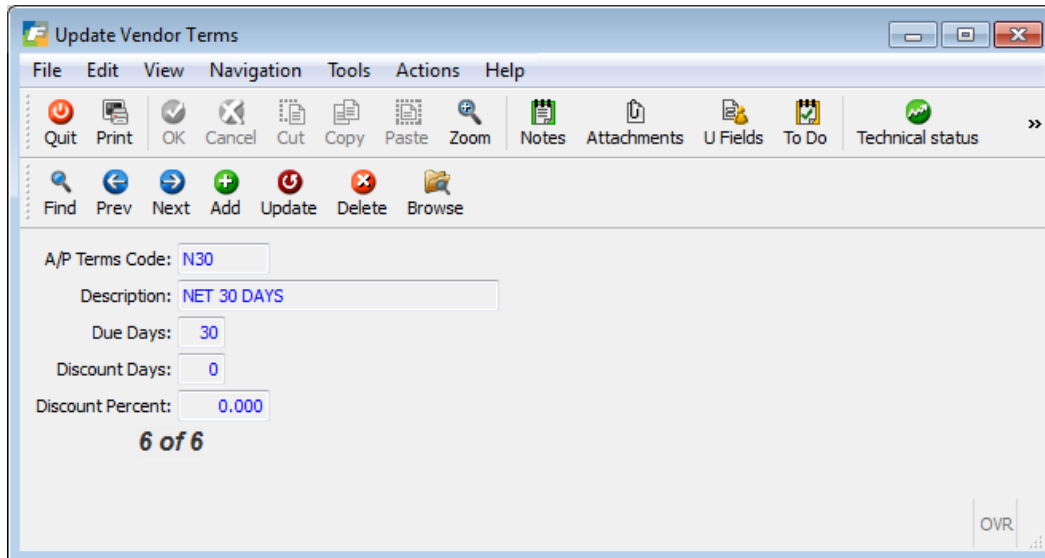

- Summary by Name
- Summary by Code
- Detail by Name
- Detail by Code

Summary information is different in that it lists consolidated Vendor information without details.

Update Vendor Terms

To view this screen, select **Update Vendor Terms** (option d).

Used to (A)dd or (M)odify payment terms.

Field	Description
A/P Terms Code:	This is a 6 character field, identifying types of Terms.
Description:	The description of terms defined by the A/P Terms Code.
Due Days	The number of days added to the invoice date to determine the date payment is due.
Discount Days	Identifies the number of days added to the invoice date to determine the discount date.
Discount Percentage	Numeric field that is the percentage of the discount. Two percent should be entered as 2.00 not .02.

Press Quit to return to submenu.

Print Vendor Terms (option e).

Allows you to print out entered information n Vendor Terms. Sorts by Terms Code.

Print Vendor Ledger (option f).

Prints Vendor Activity (all posted transactions). Sorts by Date, Transaction Number within Date. Begins with the Beginning Balance. Adds or Subtracts each transaction. Ends with ending balance.

Print Vendor Aging (option g).

Produces an aging report of vendor open items. Lists current and past due invoices and memos. The report can age on either (D)ue or (I)nvoice date. If the default (control record) is set up as "D" for due date aging, this will be the default for the report. This can be overridden with a "Y" for Invoice Date aging. Next, the system prompts user for the aging date. This field is the cutoff date, beyond which no invoices will be on the report. (If the aging date is greater than either the Due Date or Invoice Date, whichever is chosen, then any invoice that is dated after this date will not be on the report.)

Print Vendor Cash Requirements (option h).

Prints a report showing when Vendor Open Items are due to be paid. Can be printed in a SUMMARY or DETAIL format by VENDOR NAME or VENDOR CODE. Because it shows future aging, the selection criteria is same as for the aging report.

Print Vendor Open Items (option i).

Prints a list of open items for selected vendors.

Create Vendor 1099's (option j).

This option totals the cash amount paid to selected Vendors who require 1099 reporting. The report prints a summary of the amounts. Cash accounts affected must first be setup through the Update 1099 Cash Accounts option on Setup Payables menu.

- **Update Vendor 1099's.**
- Allows user to modify the 1099 report that was created with the create program.
- **Print Vendor 1099 Report.**
- Allows user to print all information relating to the Vendor and the 1099 accounts.
- **Print 1099 Forms - continuous or sheet (laser printer).**

Click on Exit twice until back to the main menu.

Merge Vendor Activity

Menu path 8-2-p-d. This program is useful when a company changes names and you want to set up a new vendor code that reflects the new company name and then transfer all payment history/activity to the new code.

The screenshot shows a software window titled "Merge Vendor Activity". It has a menu bar with "File", "Edit", "View", "Navigation", "Tools", "Actions", and "Help". Below the menu is a toolbar with various icons. A vertical sidebar on the left contains an "Add" button. The main area of the window contains a "WARNING:" message: "This program will transfer all activity, and reference records from the old vendor code to the new vendor code and then delete the old vendor code." Below the warning are two input sections. The first is labeled "Enter Old Vendor Code:" and contains a text box with "123457" and a dropdown menu showing "CHAMPION INC". The second is labeled "Enter New Vendor Code:" and contains a text box with "123475" and a dropdown menu showing "AUTOTOY INDUSTRIES INC.". At the bottom left are "OK" and "Cancel" buttons. At the bottom right, there is a label "Enter Old Vendor Code." and a field containing "OVR".

Accounts Payable Transactions

Accounts Payable Document processing is broken into three categories, Vendor Ledger, Check Processing, and End of Period Processing.

Payable Ledger

Accounts Payable Documents

1. Enter Accounts Payable Documents
2. Print Payable Edit List
3. Post Payable Documents (Creates Vendor Open Items)
4. Credit Card Import and post

Check Processing

Creating Automatic Checks

1. Print Payments Due Report (optional)
2. Update To-Pay Information (optional)
3. Create Automatic Checks
4. Update Non A/P Checks
5. Update A/P Checks
6. Print Check Listing
7. Print Checks
8. Post Checks

Reconciling Bank Statements

1. Update Reconciled Checks against Bank Statements
2. Print and Post Check Reconciliation
3. Print Check Register

Voiding Checks

1. Void Posted Checks
2. Print Void Check Edit List
3. Post Voided Checks

End of Period Processing

1. Print the Payables Journal (GL Distribution of all A/P documents by document number).
2. Print G/L Activity (GL Distribution of all A/P documents by account number).
3. Create Recurring documents.
4. Print Vendor aging.

Update Payable Documents

To view this screen, select Financial Management, Accounts Payable, Payable Ledger, Update Payable Documents.

This is the data entry screen used to enter vendor invoices, debit memos, and credit memos.

OVR

HEADER

Field	Description
Date:	Defaults to the system date format mm/dd/yyyy.
Gross Amt Entry:	Defaults to the value set up in Setup Payable Defaults. Y means the gross amount is entered and the tax is backed out by program. "N" means the net amount is entered and the program calculates tax for you.
Dept:	Three character alphanumeric. Defaults to department set up in Set Up Payable Defaults.
Posted:	System maintained. "Y" if posted, "N" if not posted.
Vendor:	The Vendor Number is an alphanumeric code, and the Company Name is the proper name to which remittance is made.
Pay – To: (optional)	If left blank Pay-To field defaults to PAYTO and the associated address information. This is normally the Vendor code address. If the remittance address that prints on check is different than the Vendor code address, the Pay To code associated with this address would be entered.
Doc. Type:	One character field. When you enter the code, its description displays beside it. Note the list of valid codes at the bottom of the screen.
Invoice:	Vendor Invoice Number.
F. Date:	Used for recurring documents. If a Y is entered, the date will be fixed when the recurring document is copied. For example, if a bill is always due on the 15 th of the month, set this field to Y, enter a code in the Recur field, and set the due date to the 15 th . When this recurring document is copied next month, due date will be the 15 th regardless of the processing date.
Recurrent Code:	See section on Create Recurring Documents.
Recurrent Times:	If this a recurring document (i.e.-monthly lease payment) and it is only to automatically recur a set number of times (i.e.- 36 months), enter that value here. Each time the recurring document is created this value will be decremented by one. When this value equals zero the document will no longer be created by the Create Recurring Documents program.
Ref No.:	Only used for debit memos and credit memos. If the document number of the invoice the memo is related to is entered here, it will automatically be applied to this invoice. If left blank, an open credit or debit memo will be created on the vendor's account.
Description: (optional)	Thirty character alphanumeric. This description will print on the GL activity report.
Invoice Date:	Date of vendor's invoice.
Terms:	Defaults to terms code set up for this vendor but can be changed.
Default Tax;	Defaults to tax code set up for this vendor or if none found, defaults to

Field	Description
	tax code in Setup Payable Defaults.
Pay – On:	System calculates based on invoice date and terms.
Due:	System calculates based on invoice date and terms.
Disc;.	System calculates based on invoice date and terms.
PO No.: (optional)	Your PO number if applicable.
Acct Grp:	Defaults to code set up for this vendor.
Cash:	Defaults to cash account number set up for this vendor.

DETAIL (press Ctrl TAB key to access Detail Section)

Field	Description
Account:	This is the ledger account number this transaction should affect.
Dept:	Defaults to department code set up in Set Up Payable Defaults.
Description:	System displays ledger account number description.
Code:	Multilevel tax code. Defaults to tax code in Header Section.
Amount:	Enter amount to be distributed to ledger account number for this line item.
Order	If this invoice is a miscellaneous cost to be added to a production work order, enter or search for the production work order number.
Rel	Enter the release number of the production work order.
Element	Enter or search for the miscellaneous cost element that this cost is for.

Press Quit to return to submenu.

Print Payable Listing (option b)

Prints an edit list of all the Payable Documents to check the accuracy of the documents. Must be printed prior to posting. Document numbers are unassigned.

Post Payables Documents (option c)

Selects all un-posted invoices, debit and credit memos and posts them to the vendor's account and the GL activity file. Requires edit list to be printed first. Once posted, the document can no

longer be changed. After posting is completed a report is printed. This report is similar to the edit list with two major exceptions:

- Has documents assigned
- Has posting sequence assigned

Create Recurring Documents

The Create Recurring Documents option automatically creates payable documents based upon the contents of the Recur field of the Payable Documents screen. This field is used in the Update Payable Documents option on the Payable Ledger menu.

When the Create Recurring Documents option is run, it creates a new payable document from the original document specified by its Recur code.

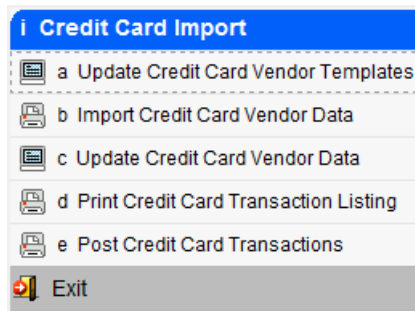

Once recurring documents have been created, they may be printed and posted with the Print Payable Listing and Post Payable Documents options of the Payable Ledger menu, like non-recurring payable documents. If you wish to keep recurring documents separate from other payable documents, you should post one type before creating the other type.

After selecting Create, a Selection Criteria screen displays allowing you to specify one or more recurring codes.

After you enter a recurring code, the program searches for all documents with that character in the Recur field. After selecting OK the program creates new non-posted versions of the documents and prints a listing of the payable documents created. Clicking OK without entering a recurring code results in the new payable documents being generated for each posted recurring document stored in the payable document table.

Credit Card Import

These programs allow you to import data from your credit card vendor for payment and place the activity with the specific vendors paid. For example, if you use a company credit card to pay for airline tickets for your sales people, this data can be imported so that you pay the credit card company but the expense put on the card will be listed under the vendor code for Delta Airlines.

Update Credit Card Vendor Templates

Use the Update Credit Card Vendor Templates program to map the columns in your vendor's credit card data download to database columns in Fitrix. Entering Credit Card Vendor Templates is the first step.

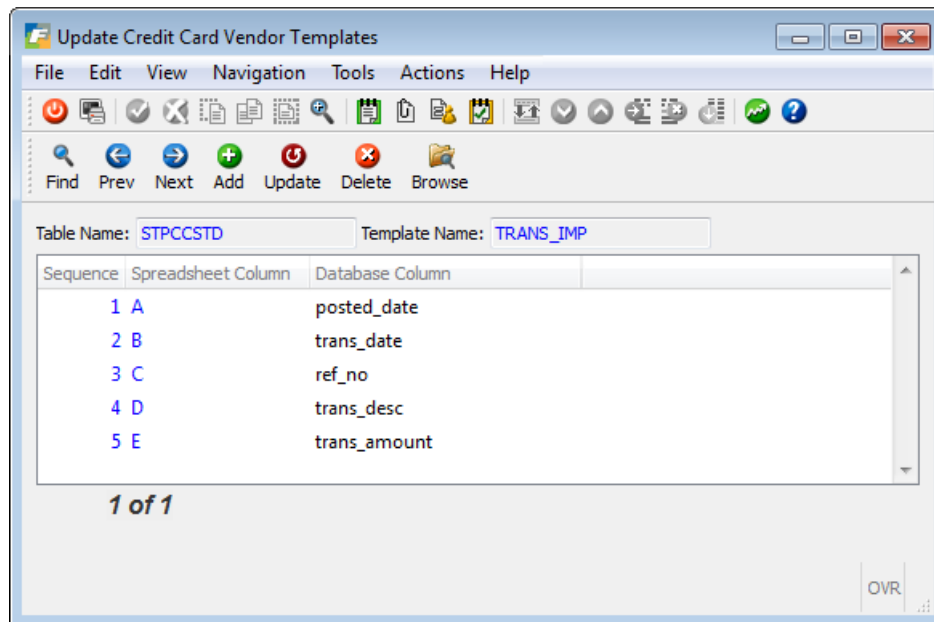

Table Name – enter STPCCSTD for credit card statement detail.

Template Name – enter a value unique to this template.

Spreadsheet – Enter the column from the spreadsheet or text file

Database Column – Enter the column from table stpcstd that is to receive the data

NOTE 1: All columns in the spreadsheet or test file must be defined on this screen. If any columns containing data are not included, it is possible that incorrect data will be loaded into the database columns.

NOTE 2: It is not necessary that the spreadsheet/text columns be defined in the order by column. The program will rearrange the columns after maintenance is completed, by assigning a unique sequence number to each column.

When you import credit card data you create a .csv (comma separated values) file. You can create this file by loading your credit card data download into a spreadsheet program. Below is an example of a credit card data download.

	A	B	C	D	E	F

Two fields are for credit card imports. These fields are:

Credit Card AP Account: This field is optional. If you want to use a different AP account than the account defined in Update Vendor Information, enter that account here. You can use the Zoom feature.

Department Field after Credit Card AP Account: This field is optional. If you want to use a different AP account department than that defined in Update Vendor Information, enter that department here. You can use the Zoom feature.

Processing Credit Card Vendor Data

When you have created Credit Card Vendor Templates, entered a Credit Card Template code for your Credit Card Vendors, and entered any data required for the Credit Card Vendor Pay-To's, you are ready to process Credit Card Vendor Data. The steps to processing Credit Card Vendor Data are:

1. Import Credit Card Vendor Data.
2. Update Credit Card Vendor Data. You must enter a valid vendor and vendor pay-to for each item.

3. Print Credit Card Transaction Listing. When you do this step, you see any items you missed in step 2.
4. Post Credit Card Transactions.

Import Credit Card Vendor Data

You must fill out the following selection criteria form.

Enter Selection Criteria

File

Load Flat File

Enter Vendor Code:

Enter Pay-To Code:

Enter the name of the file to be loaded:

Choose the delimiter that is used in your data file:

☒ Pipe (|)(Default)

☐ Comma

☐ Tab

☐ Tilde (~)

OK Cancel

Enter the vendor code OVR

Notice the Pay-To code. You must define a separate Pay-To code for each individual credit card and import the credit card data separately for each card. This is so a separate AP and/or department can be assigned correctly.

When you import the credit card statement data, past vendors are looked up based on the description. In this manner, as many vendor and vendor Pay-To codes as possible are assigned from prior imported data. In addition, credit card entries are checked for duplication using the reference number. Duplicate entries are not reimported.

The fields on the selection criteria form are as follows.

Enter vendor code: Vendor Code to be used. The Credit Card Vendor Template used is determined by the vendor.

Enter Pay-To code: Vendor Pay-To Code to be used.

Enter the name of the file to be loaded: The file containing the spreadsheet or text data must be placed in a specific directory on the server's system. Work with your system administrator to place the file in the correct directory (\$fg/data/load). Once you verified the proper location, enter the name of the file, including the extension assigned to the

Choose the delimiter that is used in your data file: Select one of the choices, based on the character you used to separate the columns in your spreadsheet or text file. For Microsoft Excel spreadsheets, the most common separators are: comma (save as a 'Comma-separated' file) or tab (save as a 'Tab-delimited' file).

Click OK to process the file.

Update Credit Card Vendor Data

When you import credit card statement data, it is imported into intermediate tables. You import each credit card statement separately. If you have a single credit card account with a separate card for each employee, you import each employee's credit card statement data separately. Each employee's credit card must be setup with a vendor pay-to code. This is so a separate AP and/or department can be assigned correctly.

Before you can post the items on a credit card, you can update the intermediate tables to:

- Assign vendor and vendor pay-to codes. You must assign vendor codes and pay-to codes to each credit card data line before it can be posted. Posting means that invoices are created for the vendors and the credit card vendor.
- Add notes to lines that are posted to the respective invoices. This is useful to record those attending meals for meals and entertainment expenses.
- If the line item is expensed to more than the default expense account for the vendor/pay-to, then you can split the expense out to one or more GL accounts.
- Determine which line items to post. In cases where the period ending date does not coincide with the date the last statement items were imported, you can flag items to not post that are past the statement ending date. This way the outstanding open items for the credit card correspond exactly to the statement ending balance. The Post (P) checkbox to checked. You can uncheck items that you do not want to post. Later on, you can check the post (P) checkbox.

The fields in the header portion of the Update Credit Card Vendor Data window are all no entry fields and are as follows.

Credit Card Vendor: Vendor Code you entered when you imported the data . The field following Credit Card Vendor displays the vendor's business name.

Credit Card Vendor Pay-To: Vendor Pay-To code you entered when you imported the data. The field following Credit Card Pay-to displays the Pay-To name.

Import Doc No: The import Doc No is automatically assigned when you import the credit card data.

Import Date: The Import Date is automatically assigned when you import the credit card data.

Import User ID: The user id of the user who imported the credit card data.

When you update credit card vendor data you are taken to the detail portion of the window. This is because all of the fields in the header portion of the window are not enterable. The fields in the detail portion of the window are as follows.

Posted Date: Date the transaction was posted by the credit card company. Display only field.

Transaction Date: Date of the transaction. Display only field.

Reference Number: Reference number of the transaction. Display only field.

Description: Description from the credit card company. Display only field.

Amount: Amount of the transactions. Display only field.

Post: If the Post field is checked, the transaction will be selected for printing and posting. Transactions are imported with the post field checked. If you wish to hold a transaction for posting later, uncheck the Post field. You might want to not post a transaction if you are importing transactions after the statement date and you want the credit card vendor invoice to exactly match the credit card statement.

Post Date: Post date is the date the transaction was posted to Accounts Payable. Post Date is display only field.

Transaction Vendor: Enter the transaction vendor code. You can use the Zoom feature.

Transaction Pay-To: Enter the transaction vendor's pay-to code to use. You can use the Zoom feature.

Account No: If there is only one expense account number, then the expense account number is displayed. If there are multiple expense accounts, "Multiple" is displayed. Display only field. To enter expense account detail, click the Expense Detail button.

Dept: If there is only one expense account number, then the expense account department is displayed. If there are multiple expense accounts, "Mul" is displayed. Display only field. To enter expense account detail, click the Expense Detail button.

To enter expense account details, click the Expense Detail button. The Expense Account Detail window appears. Use the Expense Account Detail to enter one or more expense account and departments. The total of the amounts in the Expense Account Detail window must match the transactions Amount field.

Expense Account	Department	Amount	Description
590000000	000	10.00	ADD FOR WAREHOUSE PERSON
638000000	000	15.00	ADD FOR CUSTOMER SERVICE

Print Credit Card Transaction Listing

Use Print Credit Card Transaction Listing to print all the credit card transactions marked for posting. Use Print Credit Card Transactions to see any errors that need to be corrected before the credit card transactions are posted. Possible errors that would need to be corrected are:

- No Transaction Vendor Code.
- No Transaction Vendor Pay-To Code.
- GL Amounts Do Not Equal Transaction Amount.

This report has the same format as Post Credit Card Transactions that follows.

Post Credit Card Transactions

When credit card transactions are posted, the following occurs.

1. For each credit card transaction an invoice is posted to transaction vendor/payto for the credit card statement line item. The expense account and department data are used for this invoice.
2. An attached debit memo is posted to the invoice posted in step 1. This attached debit memo completely offsets the invoice posted in step 1. The reason for posting the invoice in step 1 and the attached debit memo is so you can track the payments to these vendors in addition to the regular AP invoices.
3. An invoice is posted to the credit card vendor for all transactions.

The result is history of the credit card transactions on the vendors paid with the credit card and an open item for the credit card vendor for the posted amount. In this manner the correct expense accounts are recorded and the open item is payable to the credit card vendor.

The Post Credit Card Transactions report:

Check Processing

To view this menu, select Check Processing (option 2)

Follow these steps to process checks:

- **Print Payments Due Report (optional)**
- **Update To-Pay Information (optional)**
- **Create Automatic Checks**
- **Update Non A/P Checks**
- **Update A/P Checks**
- **Print Check Listing (Edit List)**
- **Print Checks**
- **Print Remittance Advices if applicable**
- **Post Checks**

Other items that relate to Check Processing are:

- **Reconcile Checking Accounts**
- **Print and Post Reconciliation reports**
- **Print Check Register**
- **Void Posted Checks**

Print Payments Due Report (option a)

This report is run to give you a list of invoices due by a certain date.

To print this report you must enter a Check Run Date and the Next Check Run Date. These dates are used to select the current invoices for payment and to determine whether or not discounts are valid. If the Check Run Date is past the Discount Date, the discount is shown on the report as lost and the discount is only taken if vendor record is set to Take Discount "A" for Always.

The next prompt is for Vendor Code. You can Click the OK Button (or press ENTER) to select all vendors or use wildcards to select certain vendors.

The last prompt is for Cash Account. You can Click the OK Button (or press ENTER) to select all Cash Accounts or enter a specific cash account. The cash account is the cash account the documents were previously posted to which is the same account set up in each Vendor's information file.

Update to Pay Information (option b)

To view this screen, select option b, choose "Find" and Click the OK button (or press ENTER) to find all records.

This option allows you to change only the following fields using the Update command:

1. **Amount to Apply**
2. **Discount To Take**
3. **Date To Pay**

Press Quit to return to menu.

Create Automatic Checks (option e)

This option creates checks and stores them in the check file for printing. It also prints the Automatic Checks Report that has the same format as the Payments Due Report and will reflect any changes you made in the Update To-Pay Information program.

It is important to use the same parameters for this report (i.e.; check date, etc.) as you did when you printed the Payments Due Report.

After automatically creating checks, you can still modify these checks using the Update A/P Checks option.

Update Non-A/P checks (option d)

To view this screen, select option d.

Update Non-A/P Checks

This program allows you to enter checks for items not entered into the AP System through Update Payable Documents.

HEADER:

Field	Description
Date	Date of Check
Print Check	This field defaults to "N" because many users enter payment information here to record payments for checks already written. If a check needs to be printed, change the default to Y.
Vendor	Vendor Code, and Vendor Name
Posted	Indicates whether the payment has been posted to the General Ledger.
Pay-To Code	This code determines the address that will print on the check and is therefore used if this address is different than the Vendor Code Address.
Check Number	Enter check number for handwritten checks or leave blank if this check will be printed because check number will be assigned at time of printing.
Send to Positive Pay	Check this box if the check should be included on the file that is sent to your bank if you are using Positive Pay.
Description	Optional reference field. Information entered here will print on the GL activity report.
Cash Account	Enter the G/L account number you wish to decrease when check is posted.
Tax Code	Defaults to the value set up in the Vendor Information file.
Gross Amt Entry	Defaults to the value set up in the Setup Payable Defaults. Y means the gross amount is entered and the tax is backed out by program. "N" means the net amount is entered and the program calculates tax for you.
Tax Department	Defaults to 000. This is the department code used when posting the Multilevel Tax amounts.

DETAIL (press Ctrl TAB key to access):

Field	Description
Account	Ledger account number that is increased by this transaction.
Dept.	Defaults to 000. Zoom feature is available if you need to change.
Account Description	Displays ledger account description.
Cd	Tax code. Defaults to the value in the header section of screen.

Field	Description
Paid	Amount to be disbursed to this ledger account number.
Credit / Debit	Display only based on ledger account number. Can be modified by user.

Press Quit to return to menu.

Update A/P Checks (option e)

This option allows you to change and delete automatic checks (select Find to find and revise or delete) or manually enter AP checks (select (A)dd to add).

HEADER:

Field	Description
Date	Date of Check
Mailed Date	This will default to the check date but can be changed if you want to track the fact that you mailed the check to the vendor at a later date (check was held for some reason).
Print Check	Enter Y if check will be printed, or "N" if check has already been written.
Vendor	This is a twenty character code associated with the vendor record, followed by a description field for the vendor name.
Pay-To Code	Code for remittance address that will print on check. If this address is same as vendor code address, no Pay-To code needed and system defaults to "PAYTO"
Cash Account	Enter G/L account number you wish to decrease when check is posted.
Currency	Defaults to currency code set up in Vendor Information file if Multicurrency module is installed or defaults to STD.
Check Number	Enter check number for handwritten checks or leave blank if this check will be printed because check number will be assigned at time of printing.
Send to Positive Pay	Check this box is the check should be included on the file that is sent to your bank if you are using Positive Pay.
Description	Optional reference field.
Automatic Pay	When vendor code and Pay-To code are entered, all open A/P items display in detail section of the screen. If a Y is entered here, the system will pay all invoices (beginning with oldest) and take all available discounts. An entry of N, or no entry means you intend to specify specific invoices.
Take Discount	Display only field that defaults to the value set up in Vendor Information file.
Pay On Account	Enter amount in this field if you do not want to apply payment to any invoices. The amount will be placed On Account and can be applied at a later date. An example would be a deposit.
On Account	This display only field shows how much the vendor owes you or you owe the vendor in addition to outstanding open items.

DETAIL (press Ctrl TAB to access):

Cmd? - The command entered here determines how to pay the invoice. 1,2,3,4 and I are the only valid entries for this field.

1 = Pay the invoice, taking the discount if the date of the check is on or before the discount date.

2 = Pay the invoice, taking the discount even if the check date is after the discount date.

3 = Pay the invoice and do not take the discount.

4 = Manually enter the amount of cash to apply to the invoice and manually enter the amount of discount to take (can also un-apply payments made in error by selecting 4 and entering Ø for the payment amount.)

I = Displays information about this invoice.

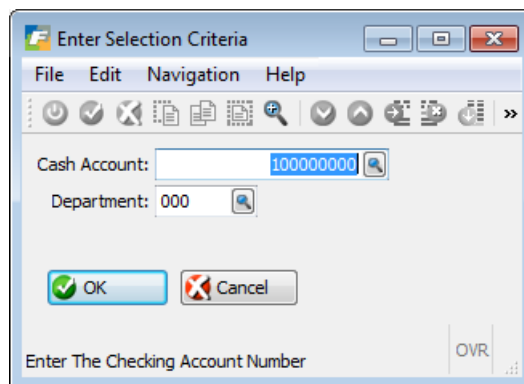

Press Quit to return to the menu.

Print Check Listing (option f):

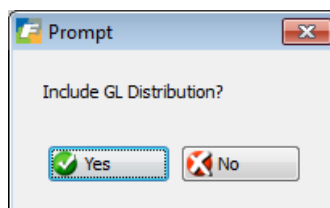

This listing is an edit list of all current check entries and must be printed before you print or post checks. This is a required edit list. If you change any documents after this listing is run, you must rerun this listing or the modified documents will not post.

Print Checks (option g and then (a) for continuous forms or (b) for laser forms):

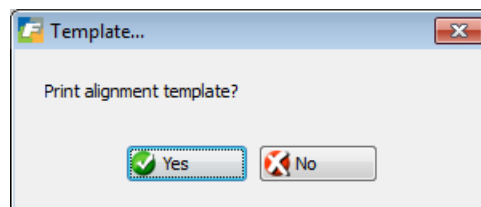

This option is used to print checks. You will be prompted for the following information:

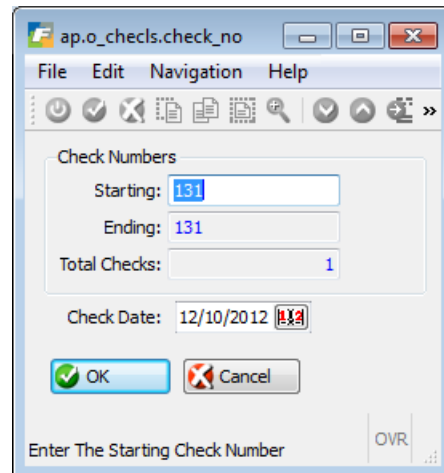

The 'Enter Selection Criteria' dialog box has a menu bar with 'File', 'Edit', 'Navigation', and 'Help'. Below the menu bar is a toolbar with various icons. The main area contains two input fields: 'Cash Account:' with the value '100000000' and a search icon, and 'Department:' with the value '000' and a search icon. At the bottom are 'OK' and 'Cancel' buttons. A label 'Enter The Checking Account Number' is at the bottom left, and 'OVR' is at the bottom right.

The 'Prompt' dialog box asks 'Include GL Distribution?'. It has 'Yes' and 'No' buttons with checkmark and X icons respectively.

The 'Template...' dialog box asks 'Print alignment template?'. It has 'Yes' and 'No' buttons with checkmark and X icons respectively.

There is a remittance advice created if the number of invoices being paid is greater than the number of lines that will fit on the remittance portion of the checks. The words "See Attached Remittance Advice " prints on the remittance portion of the check. When checks are done printing, you will be prompted if there are any remittance advices pending. If there are, you can change paper in the printer and press enter to continue.

Print Remittance Advice (option g and the (c)):

The remittance advice prints immediately after the checks are printed. However if for some reason you need to reprint them before the checks are posted, use this program to do so.

Post Checks (option h):

The post checks option stores the accounting information, adjusts the balances of the paid open items, and updates the Last Payment Date and Balance fields in the Vendor Information file.

Check Processing Reports (option i):

The following menu options are available when requesting reconciliation reports.

Print Check Register (option a):

This report lists all posted checks and the amount by check number. You define cash ledger account and date range.

Print Cash Disbursement Journal (option b):

This report lists all posted checks for a user defined date range and the GL distributions associated with them.

Print Outstanding Checks(option c):

This report lists all checks that have not cleared your bank and have therefore not been reconciled using the reconciliation program discussed below.

Print Positive Pay File(option d):

Positive Pay is an automated fraud detection tool offered by the Cash Management Department of most banks. When a check is presented to your bank and they do not have a “match” in the file received from you, you must first authorize payment before the bank will honor the check.

For more information go to <http://www.positivepay.net/>.

The use of Positive Pay in Fitrix is optional and works as follows.

1. If you use the automated check creation program all checks created will be checked that they will be sent to Positive Pay (if you don't use Positive Pay no harm is done).
2. If you select what you are paying manually these checks to will be checked that they will be sent to Positive Pay but can be unchecked as needed (An example of a transaction that may be unchecked would be an automated debit from your account (ie- a payroll service, etc.) as those would not need to be sent to your bank for validation prior to payment.

To create the .txt file that you will send to your bank select option (d) on the Check Processing Reports submenu.

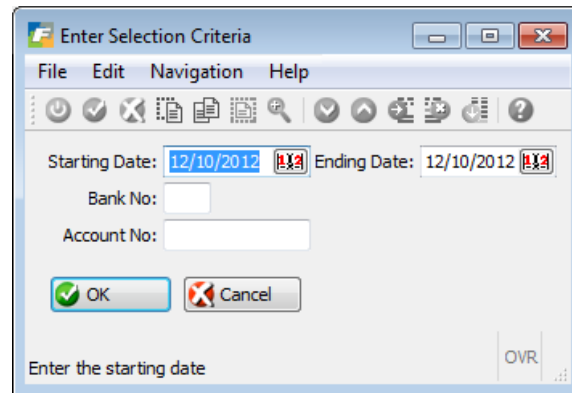

Please note this important message on the Printer Dialog box. It's imperative that you check the editor radio button before creating the report or the output will not be a .txt file.

Print positive pay file

IMPORTANT
This file must be a .txt file to be accepted by your Bank.
Please redirect this report to Word Pad by checking the
Editor radio button before clicking on Create/Direct report.
Failure to do so will result in a file format that is
unacceptable.

☐ Screen pager
☐ PDF viewer
☐ Export (i.e. Excel)
☒ Editor
☐ Host Printer Lexmark2 Copies: 1
☐ Client Printer

Next you will be prompted for this information:

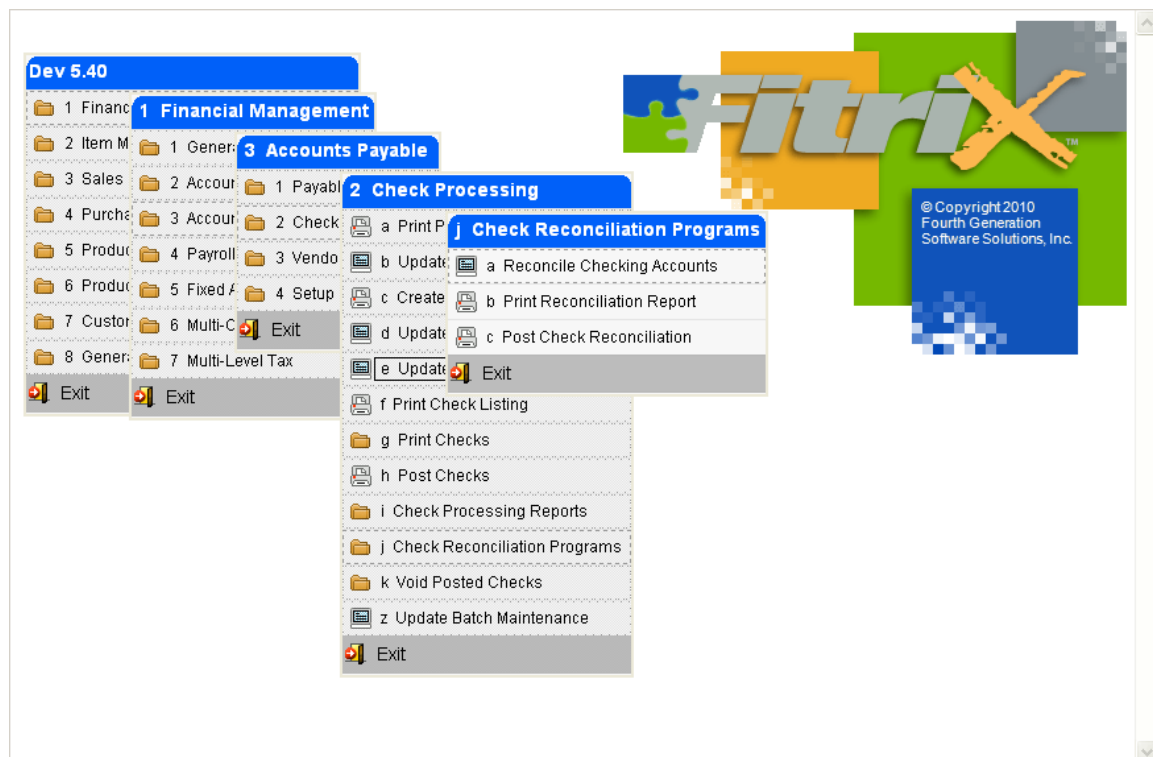

Be sure to save the .txt file created on your work station/server so that you can then log onto your bank's website and import your file.

Once you have run this program any checks that were dated within the starting and ending dates you entered will be marked as sent to positive pay to avoid duplicate transmissions.

Reconcile Checking Accounts (option j):

To reconcile the checking accounts select option (a) from the menu below:

Reconcile Checking Accounts

The Checkbook Reconciliation screen:

Bank Code: BOA BANK OF AMERICA

Branch: BRANCH #1 CUMBERLAND

Account Name: ABC DISTRIBUTION

Account Number: 0291038109

GL Account No: 100000000 Department Code: 000

Statement Date: 08/31/2012

GL Balance: 258778.16

Not Reconciled: 153752.74

Adjustments: 50.00

Statement Balance: 105075.42 Reconciled: N

Act	Date	OJ	Chk/Dep ID	Document Description	Amount
N	02/01/2012	CR 17		CASH DEPOSIT	-100.00
N	02/02/2012	CR 18		CASH DEPOSIT	100.00
N	02/02/2012	CR 19		CASH DEPOSIT	1995.00
N	02/02/2012	CR 20		CASH DEPOSIT	-27.05
N	02/24/2012	CD 107		AUTOMATIC CHECK	-142500.00
N	02/24/2012	CD 108		AUTOMATIC CHECK	-264.00
N	02/24/2012	CD 109		AUTOMATIC CHECK	1000.00
N	02/24/2012	CD 110		AUTOMATIC CHECK	-2500.00

(New Document)

OK Cancel Detail

Enter the bank code

OVR

Go into Add mode and enter bank name and branch code. The rest of the information will be retrieved from the Update Checking Accounts table. Next enter the bank statement date. Once this date is entered all transactions that have posted to your General Ledger through this date but have not yet been reconciled (cleared your account) will list in the detail section of the screen.

Warning!

Up to 10,000 items can be reconciled at any given time. If more than 10,000 items are outstanding, the checkbook cannot be reconciled. Make sure that you run this option often enough to prevent your reconciliation program from growing larger than 10,000 items. If you have any problems trying to run this option, contact your system administrator, or your authorized Fitrix reseller.

GL Balance- GL balance as of the statement date entered.

Not reconciled – total of items in the detail section of the screen.

Adjustments – enter any adjusting amounts that need to be made (ie- bank charges, etc.)

Statement Balance – GL Balance +/- Not Reconciled +/- Adjustments.

To mark the items in the detail section as cleared, click on Detail or Ctrl TAB to enter the detail section of the screen and change the Act flag from N to Y.

Note in the example above there is an adjusting entry of \$50.00 for bank charges. The reconciliation will not post until an entry has been made for the Adjustments amount.

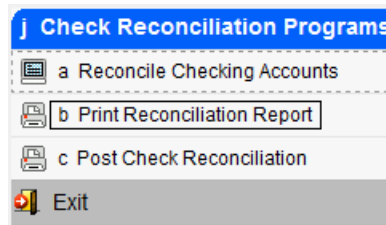

Store the reconciliation as is by clicking OK or pressing enter.

Entering Adjustments:

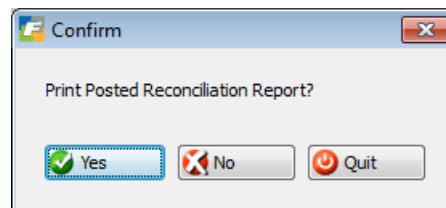

1. Enter a journal entry for bank charges and post this entry to your General Ledger.
 2. Go back to the Bank Reconciliation program, do a Find to find your reconciliation, and then go into Update mode. The journal entry will now display in the detail section of the screen as an item not yet reconciled.
 3. To reconcile the bank charges set the Adjustment amount to 0 and mark the journal entry for bank charges as reconciled (change Act value from N to Y).
 4. Save the reconciliation by either clicking OK or pressing enter.
-

Posting Your Reconciliation:

Now that the adjustments have been reconciled, you may post your reconciliation by running option (b) and then cb) on the menu below.

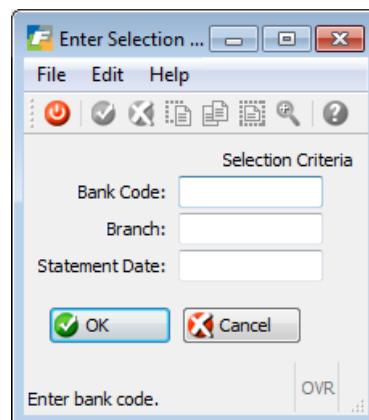

Here is the first prompt you will receive:

If you want to reprint a reconciliation report for a reconciliation that has already been posted, select Yes. If you are printing a reconciliation report for a reconciliation that has not yet been posted select No.

Next enter the bank code, branch, and statement date for the reconciliation report you want to print.

Once you have printed the reconciliation report and verified the information is correct, you may now run the posting program. This will mark the reconciliation as posted.

Void Posted Checks (option K):

Submenu contains following options:

- a. Update Void Checks
- b. Print Void Check Listing
- c. Post Void Checks

Update Void Checks - To View this screen select **Update Void Checks** (option a).

Step	Action
1	Click Zoom (or Ctrl-Z), and then select the document number of the check to be voided.
2	Once a transaction has been selected, the screen populates with detailed information about that check.
3	In the Void Document Date field, enter the date on which the check is to be voided. <i>Note:</i> This date is the date this transaction will post to GL activity.
4	Click the OK button or press enter to store the transaction.

Press Quit to return to menu.

When all checks to be voided have been entered, the next step is to print the Void Check Listing (option b) and then Post Void Checks (option c). The post program adds the AP invoices paid by the check back as an open item.

Press Quit and then the ESC key to return to the main menu.

End of Period Processing

End of Month Reports

- **Print GL Activity (option E on the Payable Ledger menu. Optional)** - Lists all AP activity by ledger account number.
- **Print Payables Journal (option D on the Payable Ledger menu. Optional)** - Lists AP documents by document number and details GL distribution.
- **Print Cash Disbursements Journal (option B on the Check Processing Reports menu. Optional).** –Lists AP and Non AR checks by document number and details distribution.
- **Print Vendor Aging (option G on the Vendor Information menu. Optional)**

Accounts Payable Review:

- v The Accounts Payable Module maintains and processes two types of data: Vendor Information and Ledger Activity Information.
- v The major tasks performed in Accounts Payable are:
 - Setting up the A/P system.
 - Maintaining Vendor Information.
 - Processing Vendor Invoices or Accounts Payable Documents.
 - Processing checks for Vendor or Non Vendor Payments.
 - Completing month end procedures.
- v Setting up Accounts Payable Module includes:
 - Defining A/P related reference files like Vendor Payment Terms and Account Groups.
 - Entering Vendor Information and Vendor Pay-To Addresses.
 - Entering Vendor Open Items.
 - Setting the A/P setup to complete.
- v Processing Accounts Payable Documents includes:
 - Receiving vendor invoices and entering them as Accounts Payable Documents.
 - Printing the Edit List to review documents for accuracy.
 - Posting A/P documents to create Vendor Open Items
 - Importing credit card payment information.
 - Creating recurring invoices.
- v Processing Accounts Payable Checks includes the following steps:
 - Print a list of payments due for a specified period of time.
 - Update the payment due information per invoice prior to creating checks through the Update Pay-To Information menu option.
 - Create automatic checks.
 - Review all invoices to be paid by this check run and update or delete any checks prior to printing.
 - Print check listing
 - Print checks
 - Post checks to update Vendor Balance and General Ledger Activity
- v End of Period Processing includes the following steps:
 - Print GL Activity (optional).
 - Print Payable Journal (optional).
 - Print Vendor Aging (optional).
 - Reconcile Checking Accounts

Lab Exercise a: Setup Accounts Payable

Update Account Groups

Objective: The purpose is to teach the end-user what information needs to be setup prior to processing transactions through Accounts Payables. Add an account group called PHONE that credits Accounts Payable and debits two Telephone expense accounts.

1. Chose #3 (Accounts Payable) from main accounting menu.
2. Choose #4 (Setup Payable).
3. Choose #c (Update Account Groups).
4. (A)dd and Account Group called PHONE for Phone Expenses
Account # = "702500000" Department # = "000"
Account # = "702500000" Department # = "300"
Note: You do not have to setup AP account in this account group. When used in Updating AP Documents, the default AP account will automatically be used to offset the above accounts.
Press ENTER to store
5. Press Quit to go back to menu.
6. If desired Choose 'd' to print out the Account Groups listing. (Redirect to screen).

Setup Vendor Information

The ABC Distribution database has several vendors already setup. From the Update Vendor Information find all existing vendors.

Objective: the Purpose of Exercise II is to acquaint the user with what vendor information needs are necessary for transactions to be processed.

1. Add a new vendor: (option e on the Set Up Payables menu):

☐ Vendor Code: 123477
MEGUIAR'S INC.
2465 ARLINGTON WAY
IRVINE, CA 92714 USA
COLLIN ROBERTS
Phone: 813-567-8989
Tax Code: NOTAX
Limit: 5000.00
Pay Method: AP ACCOUNTS PAYABLE
A/P: 200000000-000
Cash: 100000000-000
COG: 500000000-000

Press ENTER to store

2. Setup a Vendor for AT &T Telephone for monthly phone bills, using the account group PHONE as the vendor default.

Press ENTER to store, and Q key to return to Accounts Payable menu.

Update Accounts Payable Defaults

Select Accounts Payable - Setup Payables.

Objective: To setup the defaults that will be used by the A/P system as transactions are processed.

1. Select option 4 and then option 'a' to Update Payables Defaults. Make any changes to categories that you would like.
2. Press ENTER to store and then click Quit and Exit to return to the main menu.

Lab Exercise b: Processing A/P Transactions

Update Payable Document

Objective: The purpose of the following exercise is to show how documents entered in the A/P system are processed through the posting phase.

1. From the main menu select Financial Management, 3,1,a.
2. Choose (A)dd to add a new document and enter the following:
 - ☐ Add an invoice for Vendor AT &T
Invoice 100 for Phone Services for April
Invoice Date: today's date
Acct Grp: PHONE
Press Ctrl TAB or click on detail to move to the section for detail lines
Enter: \$100.00 for each line item.
5. Press "ENTER" to save document.
6. Add the following Accounts Payable Transactions:
 - ☐ Invoice #101 - Purchased from Alpine Radio 2000.00 in car stereo parts...
 - ☐ Invoice #102 - Purchased 200.00 worth of furniture from Cobra Corp.
7. Print the Edit List. (Option b. Redirect to screen).
8. Post the transactions. (Option c. Redirect to screen).

Creating Recurring Documents

Objective: To create and store a recurring type document for later use by the system.

1. Choose "a" for Update Payable Documents
2. Create a "Recurring Document" by entering a document with the following:
 - For current month setup an invoice for "ALLIED SIGNAL" in the amount of 150.00
 - Fill in the "Recur" field when entering the document. Use "M" for the code.
 - Code to GL account # 704000000.
3. Save the document as you would when entering a non-recurring document, edit, and post.
4. Go back to Update Payables Document and search on the Recur field for a code of "M"
Notice that the item is posted.
5. Choose "h" for Create Recurring Documents
This step creates a new document. Use recur code = M and today's date.
6. Repeat step 4 above.
Notice that the newly created recurring document has new dates and is not posted.
Changes can be made to this new document.
7. Run the edit and post.

Click Exit to return to the main menu.

Lab Exercise c: Processing Checks

Objective: To create checks from posted invoice documents and process checks through the posting process.

Print Payment Due

1. Choose (3) Accounts Payable, (2) Check Processing, (a) to 'Print Payments Due Report'.
2. Redirect output to the screen. This report is optional; it allows the user to batch all checks with certain criteria.
3. There are two dates that this report needs.

Check Run Date - This date prints out on the Payments Due report and determines whether or not the discounts are taken.
INPUT date of today

Next Check Run Date - This date is used to select invoices for payment. This is used as the upper, range of invoice dates to be used for the printing of checks.
INPUT date of 30 days from today.

5. The "Select Vendor" screen allows the user to print out this report for select vendors or for all Vendors. Press "ENTER" to select all Vendors.
7. Press "ENTER" to select all cash accounts/departments. This allows a selection for specific cash accounts/department(s) if a selection is desired.

Update Payment Information

1. Choose "b" to 'Update To Pay Information'. This is optional and is chosen only if the user wants to change the 'to pay' information at the bottom right of the screen. No other information on this screen can be changed.
2. Press Quit to return to the menu.

Create Automatic Checks

1. Choose "c" to 'Create Automatic Checks'. This option creates the check record and stores them in the check file. It also prints the Automatic Check Report. The 'Create Automatic Checks' option will ask for the same two dates you entered on the 'Payments Due Report'.
2. Redirect to screen.
3. Enter the same two dates.

Enter the Vendor selection criteria and press ENTER to select all Vendors and then ENTER for all cash departments.

Update Checks

1. Choose "e" to 'Update A/P checks'. This will allow the user to modify a check that was not created with the automatic option.
2. Do a find on vendor code 123457. Change the amount to pay on invoice # 7572361 to \$900 because the remaining balance is under dispute by your company.
3. Press "ENTER" to save document.
4. Press "(Q)uit" to Quit menu.

Print Check Edit List

1. Choose "f" to print the check edit listing.
2. Redirect to the screen. The Check Number will be unassigned at this point. Based on this report you can update the Checks if needed and reprint this report. NOTE: If a change is made to the checks through 'Update A/P Checks' this report MUST be reprinted.

Print Checks

1. Choose 'g' and then b to print the checks and redirect to screen.
2. Press "ENTER" for all cash accounts.
3. Press "n" to 'Print alignment template'.
NOTE: Printing the alignment template may cause the check numbering to be off.
4. Enter 'starting check number' of 10.
5. Enter date of today for the 'Check Date' .

Post Checks

1. Choose "h" to 'Post Checks'.
2. Redirect to screen. There are no selection criteria on this option.

Lab Exercise d: Voiding Checks

Void Posted Checks (option K)

1. Void the following check:
Note: Use the Add Mode
- Void a check you did today

Print Void Check Listing (Redirect to screen)

1. Print the Void Check Edit List.

Post Void Checks (Redirect to screen)

1. Post the Voided Checks.

Exercise e: Period End Activities

NOTE: Redirect all output to Screen

1. Print Payable Journal. (option d on Payable Ledger menu) Use date range of 01/01/2012 through today.
2. Print G/L Activity. (option e on Payable Ledger menu) Use date range of 01/01/2012 through today.

Accounts Payable Summary

The following points of training were covered in this Chapter. If you feel that you have not mastered all objectives, go back and review those sections.

- Accounts Payable Modules overview.
- Operational tasks performed in Accounts Payable
- Setup the Accounts Payable Module
- Process Accounts Payable Documents
- Procedure for Processing Checks
- Procedures for completing Accounts Payable Month End
