## INTRODUCTION TO CUSTOMER RELATIONSHIP MANAGEMENT

#### FITRIX CRM: GENERAL DESCRIPTION

Functions within a business organization are often referred to as 'front-office' or 'back-office' depending upon whether they are 'customer-facing' like an inside sales group or a customer support call center, or are more internally- or supplier-oriented like accounting/finance, purchasing or manufacturing. Fitrix ERP Customer Relationship Management or CRM system addresses the former, and includes capabilities that are intended to help 'customer facing' departments in the company like sales, marketing and customer service/support do their day-to-day jobs.

The main focus of a CRM system is to help ensure that customer needs are met in a timely and efficient manner, so that customer satisfaction is maintained a high levels throughout the organization and with every customer interaction, and so that the company's revenue and profitability goals are able to be met or exceeded. By having CRM integrated with an ERP system, it is possible to gain and maintain a '360 degree view' of your company's customers and to support analysis which helps identify your most important and profitable customers, as well as your less profitable and more costly ones.

The Fitrix Customer Relationship Management module is designed to meet the most critical needs of the three main 'front office' constituents: sales, marketing and service/support personnel. Since companies often vary greatly as to how these operations are organized, all of Fitrix CRM's functions within each of these areas may or may not be utilized by your company, or might be implemented in a 'hybrid' manner to best meet your business objectives. Certain functions like Activity Management might be used by all users in all of these departments, or just those in one or two.

There are sophisticated applications that are designed to be 'best in class' individual or suite-based CRM solutions that include more specialized capabilities than Fitrix CRM has at this time. Fitrix CRM is designed to meet the core CRM needs of the typical discrete manufacturer or wholesale distributor, and to provide close integration between these core CRM capabilities and the other ERP functionality provided within the Fitrix software suite. With this CRM/ERP integration, a '360 degree view' of your customers and their individual impact on your operations and profitability can be accurately measured and optimized over time.

#### **CRM FEATURES/FUNCTIONS HIGHLIGHTS**

- Modular Integration Direct integration with other Fitrix ERP modules
- Account Management Fitrix CRM allows users to enter and maintain various demographic and other information about suspects, prospects and customers, and even other organizations like business partners, associations and competitors. Companies can be organized into hierarchies to track the 'parent-child' relationships of parent companies and subsidiaries at multiple levels.
- Contact Management An unlimited number of contacts can be maintained for each company/account, with one being designated as 'primary' for each Account. Multiple phone numbers, email addresses and physical addresses can be managed for each contact.
- Lead & Opportunity Management Fitrix CRM's Lead and Opportunity management capabilities allow sales and marketing personnel to track interactions and interest with Accounts from the very first (e.g. a trade show 'lead') to multiple individual sales opportunities for different products or services the Account may be interested in, with forecasting and tracking.
- Quotes & Proposal Management With Fitrix CRM you can quickly and easily see quotes and proposals that you have sent your prospects and customers and turn these into sales orders when they are sold.
- **Team Selling Support** Fitrix is designed with team selling capabilities built in that will continue to be enhanced over time to support a robust 'role-based' multi-member Account team model that is typical in more sophisticated sales organizations, but can also be used in more simplified settings with single-member or small sales teams.
- Activity & Project Management Fitrix CRM lets users manages all kinds of Activities within Fitrix like calls, appointments, 'to-do's as well as build their own specialized types of Activities and track them. Projects are templates of reusable sets of Activities that can be scheduled and assigned to all or just Primary Contacts using Fitrix CRM's Campaigns features.
- Campaign Management Fitrix CRM's Campaigns capabilities allow sales, marketing and service/support teams to build robust 'multi-media/multi-modal' campaigns that can be scheduled, assigned and managed to various lists of Accounts based on user-defined criteria.
- List & Query Management The CRM module of Fitrix ERP allows users with proper access the ability to build, use and reuse powerful SQL queries via a standard Query By Example query capability. These lists can then drive Campaigns or feed other applications targeting prospects and/or customers with your company's communications or other interactions.
- Case/Incident Management Fitrix CRM includes a powerful Case Management capability that allows customer service/support personnel to track and manage cases/calls/incidents/issues/etc. Help desk or call center users can assign cases to the most competent/available personnel using a rules-based facility.
- Problem Management Tracking problems and identifying trends so that major customer service issues can be addressed proactively is an important feature that Fitrix CRM's Problem management feature helps automate.
- Sales Lead & Support Call Dispatch Rules can be set up within Fitrix CRM that determine how new sales leads and new support cases are assigned or dispatched, based on factors such as geography or skill set of agents.

• Scheduling Service/Support Calls - This set of programs enables the scheduling of work out in the field. They allow for the dispatcher/service coordinator to enter appointments for customers, print or email the service ticket for the appointment, and then review all active appointments via either an inquiry program or a calendar program in four different views; by employee, by service coordinator, by customer or by type of service being performed. Also included is a suite of reports that can be emailed to the employee, service coordinator, or customer that contain details on active appointments for the date range specified.

## **Chapter 1 CRM SET UP**

This chapter covers the set up required prior to using the Fitrix ERP CRM module

## LOOKUP VALUES

The lookup values come predefined as they are look ups to the various tables behind the scenes. What you must do is define the values for each of these look ups. In the example below the lookup name "Account Source" is the source where your Account came from. When entering Accounts you can select from a list of the source values you have set up.

🔁 Lookup Values		
File Edit View	Navigation Tools Actions Help	
🕘 🖪 🕲 🐼	G # S 4. 🗒 6 🗞 💆 🗷 🛇 4 🖢 4 😂 4	3

It View Detail		
Same		
		OVR
		OW

To update your source values go into Update mode and enter the display sequence number (the order you want the list of sources to display in the programs lookup list) and the source value.

**Important Note #1:** If the lookup is for an activity status (ie- activity status, campaign status, appointment status, etc.), make sure the display sequence has COMPLETED as the last value in the list. Throughout the CRM module when you check that an activity has been completed its status will be set to the last lookup value found in the lookup table which is why COMPLETED should be the last value.

**Important Note #2:** If you also want to block off time for employees personal time off (PTO) on the Services scheduling calendar program so you can see on the calendar the days they are not available to take appointments, set up a service type for this too as shown here.

The CRM screen programs have the following lookup fields.

#### **Accounts Screen Lookups:**

account\_source – the source that your Account came from (ie- trade show). account\_status – account status (ie\_active). account\_type – type of business (ie\_ distributor). account\_rep – account representative address\_type – type of address (ie- work, home) contact\_type – type of contact on the Contacts screen (ie-decision maker). department- the department the contact works in (ie – sales) email\_type- the contact's email type (ie-work, home) industry\_standard – valid values are SIC and NAICS. Industry\_type – type of industry (ie- manufacturing). name\_courtesy – prefix to contact name (ie- MR.). name\_suffix – suffix to contact name 9ie- SR.). phone\_type – contact's phone type (ie- work, home). Title- the contact's title (ie- president).

#### **Opportunities screen Lookups:**

prod\_serv\_category – products or services category (ie-radios).

#### **Activities Screen Lookups:**

activity-type - type of activity (ie-sales call).

#### **Projects Screen Lookups:**

Header screen:

project\_status – project status (ie- active). project\_type – type of project (ie-annual trade show).

Detail screen:

activity\_type – type of activity (ie- sales call) role- what role is assigned to the activity (ie- sales manager)

#### **Proposal screen Lookup:**

proposal\_status- status of the proposal (ie- submitted).

#### Leads screen Lookups:

lead\_type - type of lead (ie-active).
lead\_status- status of the lead (ie- pending qualification).
status - status of lead (ie- quote submitted)
assigned\_to - who the lead is assigned to
team- the team assigned to the lead
lead\_source - where this lead came from (ie- Google search).
category - product category

#### **Campaigns screen Lookups:**

campaign\_status – status of marketing campaign (ie-completed). campaign\_type – type of campaign (ie-direct mail).

#### **Cases screen Lookups:**

case\_status - status of a support case (ie- closed).
case\_priority - priority of a support case (ie- high).
severity - severity of the support case (ie- severe).
type\_major - a way to group cases and find by type (ie- software).
type\_minor - a way to group cases and find by type (ie- hardware).

#### **Service Appointments Lookups:**

appt\_service\_type - type of service being performed appt\_facility - this is the facility that will handle the appointment appt\_status - status of the appointment

#### Alerts/Alarms screen Lookups:

alert\_importance – importance of alert on the alerts reminder screen (ie-critical).

#### **Representatives screen Lookups:**

quota\_type - type of quota (ie- % gross profit).
rep\_type - type of representative (ie- service rep for support calls).
role - the representatives role (ie- support manager).

#### **Teams screen Lookup:**

team\_role - role of the team (ie- service).

#### **Territories screen Lookup:**

territory\_type - type of territory (ie- sales).

#### **TERRITORIES**

Territories are not currently utilized in Phase I release of the CRM module. When they are utilized the user will be able to assign a territory to be in charge of Leads, Opportunities, and Cases. Currently the Cases program uses a geographical hierarchy based on zip code when assigning them to representatives and the Leads and Opportunities programs use a manual selection of representatives and teams.

Territory ID: 2 Name: SOUTHEAST Type:   Countries (1) States/Provinces (4) Area Codes (3) Post Codes (2)  State/Province  SA GEORGIA  FL FLORIDA AL ALABAMA		axt Add Update Dele	te Browse			
State/Province GA GEORGIA FL FLORIDA AL ALABAMA	Territory ID:	2 Name: SC	UTHEAST	T	/pe:	<b>T</b>
GA GEORGIA EL FLORIDA AL ALABAMA	Countries (1)	States/Provinces (4)	Area Codes (3)	Post Codes (2)		
FL FLORIDA AL ALABAMA	State/Province					^
AL ALABAMA	GA	GEORGIA				
	FL	FLORIDA				
SC SOUTH CAROLINA	AL	ALABAMA				
	SC	SOUTH CARO	LINA			

Territory ID – a sequential number assigned by the program.

Name – enter the name of the territory.

**Type**- do a lookup and select a predefined territory type.

**Detail TABS**- to enter country, state, area codes, and post codes assigned to this territory click on each folder tab.

#### REPRESENTATIVES

Use this program to enter representatives that work for your organization. These representatives can be sales reps assigned to Accounts or service reps assigned to support cases.

Name- enter the representatives name.

Title- select a predefined title.

Type- select a predefined type of rep (ie- sales, services, technical support).

**Department** – select a predefined department the rep works in.

Role - select a predefined role the rep plays.

Contact Info - enter contact information.

**User ID** – enter user ID. By associating user ID with a rep ID a task that is assigned to a rep with an alert on it will display for this user id when they are logged in.

**Supervisor**- check whether the rep is a supervisor.

**Service Coordinator** - only employees that have this box checked can be assigned as the service coordinator for appointments.

**Experience Level**- enter the experience level, the higher the number the more experienced.

Team- select a predefined team for the rep.

**Supervisor** –select the rep's supervisor if there is one.

**Detail TABS**- to enter country, state, area codes, post codes, items and item classes they have expertise with, and the service types/calls they are qualified to work on click on each folder tab.

## TEAMS

This program is used to assign representatives to teams and these teams can then be assigned to Accounts, Opportunities, etc.

Team Name: SC	OUTHEAST TEAM	Department:	SALES	
Territory: SO	DUTHEAST +	Role:	PROMOTION	*

#### **Company Info Section**

Account Name (required) – account name

**Parent ID** – if this account is affiliated with one of your existing customers zoom to find the customer id.

**Revenue**- if known enter the account's annual revenues.

Industry Type- drop down list of industries you have previously defined.

Employees - if known enter the account's number of employees.

Standard – valid values are NAICS or SICS.

**Code** – zoom to select the NAICS or SICS code.

Ticker – stock market ticker

Created By – the login ID of the user that created the account.

Date – date the Account was created.

#### **Address Info Section:**

**Type** – drop down list of address types you have previously defined.

Address1 (required) – enter address line one.

Address2 – enter second address line if there is one.

**City, State, Zip, County, Country (required)** – if you enter a zip code that spans more than one city you will receive this prompt:

You can keep the city you entered or change it. Once selected the county and country will be filled in automatically.

#### **Primary Contact Info Section:**

Use this section to enter the address information for the primary contact for this account. This contact information can be edited in Add mode but not in Update mode. To update the primary contact information you must be in Update mode, click on the contacts tab and then click on the contact row you want to change.

Name - drop down list of salutations you have previously defined.

First Name

Last name

Abbreviation - drop down list of abbreviations you have previously defined.

Title- drop down list of titles you have previously defined (ie- president).

**Type** - drop down list of types you have previously defined (ie- decision maker).

Department - drop down list of departments you have previously defined (ie- executive).

Email- drop down list of email types you have previously defined (ie-work).

**Email address** 

#### Info Section:

Account type (required) - drop down list of types you have previously defined (ie- distributor).

Status (required)- drop down list of statuses you have previously defined (ie-active).

Source - drop down list of sources you have previously defined (ie- referral).

Account Rep (required)- drop down list of your company's account reps.

Team - drop down list of your company's teams.

**Credit Limit** – as defined on the customer master program.

Balance – current balance due found in the customer master program.

Yr-to Date - year to date sales.

Lifetime – total sales made to this Account.

#### **Phones Section:**

Enter the company's phone numbers. There can be three defined (main, fax, etc.) The phone numbers for the primary contact are entered on the Contacts screen described next.

#### **Contacts folder tab:**

To access contacts, go into Update mode and click on this folder tab. To edit an existing contact, double click the row that contains the contact you wish to edit. To enter a new contact, double click on a blank row.

Activities can also be added by using the Activities menu option (d) on the Sales menu.

(See the Alerts/Alarms section of this user guide for how to set reminders).

#### Activity History folder tab:

Once an activity is marked completed on the Activities screen it is moved to this folder for viewing. Only active activities stay in the Activities folder.

## Campaigns folder tab (view only):

To access campaigns, go into Update mode and click on this folder tab. To view an existing campaign, double click the row that contains the campaign you wish to view. To enter a new campaign, you must use the Campaigns program on the Marketing menu.

## **Campaigns History folder tab (view only):**

Once a campaign is marked completed on the Campaigns screen accessed from the Marketing menu it is moved to this folder for viewing. Only active campaigns stay in the Campaigns folder.

## **Quotes folder tab:**

Use this folder tab to add quotes or to view any active quotations that have been entered through Sales Order entry for accounts that are customers, and to add or to view proposals entered using the Proposals program on the Sales menu for accounts that are not yet customers.

## Orders folder tab:

Use this folder tab to add orders or to view any active sales orders that have been entered through Sales Order entry for accounts that are customers.

## Leads folder tab (view only):

Use this folder tab to view any leads that were set up using the Leads program on the Marketing menu.

Account ID – enter or zoom to find.

**Description** – description for this opportunity (scrolling field).

Won- check this box when the opportunity is won.

**Forecast** – check this box to include this opportunity in the total forecasted dollars.

Forecast Amount – forecasted dollar amount.

Probability – probability % to win.

**Quote No** – select quotation number if this opportunity is tied to a quote.

**Order No** – select sales order number if this opportunity is tied to a sales order.

**Expected Close** – date you expect to close.

Lead Type – select lead type.

Status – select status.

Assigned to – select assigned to.

Team - select team.

Source - select source.

Category - select category

Contact Name - select the contact name for this account/opportunity.

The folder tabs in the detail section are same folder tabs you can access using the Accounts screen with the exception of the items folder tab. Use this to select inventory items that are associated with the opportunity.

#### ACTIVITIES

This program is used to set up activities that need to be followed up on. You can also set up reminders so that you are automatically notified when an activity requires your attention.

Activity Type – select an activity type.

Status – select a status for this activity.

**Description**- enter a description.

Assigned To – select who the activity is assigned to.

Team – select a team.

Campaign – select a campaign if this activity is associated with one.

List Name – if the activity was generated via a campaign using a list the list name displays here.

Letter - select a letter code for a letter that you want to send.

**Company** – select company.

**Lead/Opportunity** – select one if this activity is associated with one.

**Contact** – select Account contact.

Scheduled Date – enter date.

Duration Days – enter number of days.

Hours- enter number of hours.

Minutes – enter number of minutes.

**Reminder check box**- if you check this, additional fields will display so that you can enter information about the reminder.

-In Advance-

3	8	TRADE SHOW	DO	THE TRADE SH	w	4	12	(	SALES MANAGER		
									1		•

**Project ID** – next sequential number assigned by the program.

Status - select status.

**Type**- select the type of project.

**Description** – enter a description.

Role – select a role from a list of predefined roles set up using the Lookup Values program.

In the detail section enter the sequence, duration, activity type, the role of the person the activity is assigned to, and the type of letter that should be sent.

#### PROPOSALS

Use this program to enter proposals for your Accounts that are not yet customers (versus using quotes for Accounts that are customers).

nd Prev Next	Add L	pdate D	elete Browse Options								
ccount/Address							Info				
Account Number:		9 🔍	J		JOE'S PLUMBING		Proposal ID:	24	Created By:	bettyb

2104		SC	M A SERIES MULSTRIKE		10.00	8.6350	50.00	00	500.00		

Account Number- enter or zoom to find Account number.

Location – select the Account's location.

**Warehouse** – select the warehouse location the items will be shipped from (comes from the Fitrix warehouse table).

**Contact** – select the contact the proposal should be sent to.

Proposal No – enter the proposal number.

**Description** – enter a description for the proposal.

**Discount** – enter % discount off list price.

Status – select a status for the proposal.

In the detail section, enter the items for this proposal and their quantities. The discounted price that is calculated is the list price for the item/warehouse less the default discount percent entered in the header portion of the screen.

You can then use the option button on the toolbar to launch the proposal print program . You can also print the proposal from the Reports menu option.

## **SALES REPORTS**

Fitrix CRM has the following sales reports:

g Reports
💾 a Accounts Overview
b Opportunities Overview
📙 c Opportunities Forecast By Month
📙 d Activities List
📙 f Proposal
🧕 Exit

# **Chapter 3 MARKETING**

This chapter covers the programs used for marketing campaigns

## LEADS

This program is used to create leads that can then be turned into opportunities.

**Type** – select type of campaign.

Status – select a status.

**Description** – enter a description for the campaign.

Manager - select the campaign manager.

**Team** – select a team.

**Complete-** check when the campaign is completed.

Parameters- select contacts from a list, a query, or enter manually. To create a new query click

on the Query Builder . button.

Contacts – select Accounts primary contacts or all contacts.

Project – select a project template.

Start - enter the start date for this campaign.

Name - select list or query name.

Metrics - enter budget, costs, revenues.

**Execute**- click on execute to activate the campaign. This will copy the activities from the folder tab into individual activities for each contact in the Contacts folder tab.

## **CAMPAIGN REPORTS**

Fitrix CRM comes with the following reports:

#### **CRM LETTERS**

The CRM letters submenu has the following options and work just like the AR Dunning letters.

**Update Letter** – use this program to define your letter code and text. You must then use the Update Special Characters program to define the SQL statements that will retrieve the data that will print on the letter from the database. In the example below the special characters \$?1

will pull the Account ID from the database.

Update Letter File Edit View Navigation Tools Actions Help

**Create Letters** - typically letters will be printed from the Campaign or Activities program but you can alternately print them using menu option (c).

# **Chapter 4 SUPPORT**

This chapter covers how to log support cases for your Accounts and how to schedule service calls.

## ACCOUNTS

This menu option calls the same Account program that is accessed from the Sales menu.

## CASES

Use this program to log and track support cases.

**Resolution** – enter the action taken to resolve this case.

Parts- click on detail to enter information on parts and replacement parts.

#### **SCHEDULING**

This set of programs enables the scheduling of work out in the field. They allow for the dispatcher/service coordinator to enter appointments for customers, print or email the service ticket for the appointment, and then review all active appointments via either an inquiry program or a calendar program in four different views; by employee, by service coordinator, by customer or by type of service being performed. Also included is a suite of reports that can be emailed to the employee, service coordinator, or customer that contain details on active appointments for the date range specified.

### **ENTERING APPOINTMENTS**

Now that set up is complete you are ready to start entering your appointments using option (a) on the Scheduling submenu shown here.

Description: REPAIR CIRCUTS						*		
Equipment:						*		

The following fields are required values so that the appointment will display properly on the calendar:

Initiated By Bill To Service Type Priority Service ID Contact Name Scheduled Date Appointment Date, time, and estimated length of appointment Employee ID (comes from the representatives table and will list all employees that have the service coordinator checkbox checked.) Service Coordinator Status – please note that all appointments except those with a status of completed will show up on the employee calendars as open appointments. If you need to cancel an appointment set the status to completed and add notes using the Notes button on the toolbar as to why the appointment was cancelled.

If you enter an appointment and there is a conflict with an existing appointment, you will receive this error message and will need to change the date, time, or employee so there is no conflict.

#### **COPYING APPOINTMENTS**

If you want to create an appointment from an existing appointment, find the existing appointment and

then click on the Copy Appt button on the toolbar. You will then need to change the date, time, or employee so that the newly created apppointment does not conflict with the appointment it was created from.

#### PRINTING OR EMAILING THE SERVICE TICKET

After you have entered and saved the apointment you can print the service ticket by clicking on the

Service Ticket button on the Appointments screen toolbar.

#### Here is a sample of the service ticket

#### **Email Template Programs**

The email alerts discussed above are set up using the Email Template program accessed using option (k) on the Company Setup submenu.

If you would like to change the text that prints in the body of the email you can do that here. You can also optionally set up cc and bcc recipients or a reply to email address for any emailed reports as needed.

Here is the template for the service ticket.

## **SUPPORT REPORTS**

Fitrix CRM comes with the following support reports:

Fitrix Customer Relationship Management User Guide

# **Chapter 5 UTILITIES**

This chapter covers the utility programs

## **ALERTS/ALARMS**

The Alerts/Alarms are used to set up reminders for each user. The reminder can be tied to an activity or not tied to an activity.

Alerts can be turned on one of two ways:

- Click on the
   Start Alarms
   button on the Alerts screen.
- Launch the Activities program from the Sales menu.

In a future release of Fitrix CRM the Alerts will be turned on automatically when the user logs in.

Alerts are set up by checking the reminder box when setting up activities or directly using the Alerts screen program shown here.

Alerts/Alarm	ns

Alert/Alarm			
1.1.2.807.228 #30507.001	12/06/2012	Time: 00:00:00 💠 Time Zone Modifier: 0 💠	
Subject:	CALL AND FOLLOW UP ON PR		
Importance:	HIGH	Recurring Frequency:	-
Activity:			-
Remind Me:	0	Days	
	0	Hours	
	10 💠	Minutes In Advance	
	12 of 12		
			OVR

**Date** – enter the date you want to receive the alert.

Time- enter the time you want to receive the alert.

**Time Zone Modifier** – this is used if the user is in a different time zone than the Company's server. For example, if the user is on the West coast, and the server on the East coast, the user would enter "-3" for their modifier .

**Subject** – subject line for your alert.

**Importance** – choices include:

LOW
MEDIUM
HIGH
CRITICAL

Recurring- check this box if this is a recurring alert (ie- every week).

**Frequency** – displays the frequency codes you have set up using the Frequency of Occurrence program on the Set Up menu.

Activity - select an activity this alert is tied to or leave blank if it is not tied to an activity

**Remind Me** – select the days, hours, or minutes in advance of the alert time you want to be reminded. When the time is met this alert screen will display:

E Alert		- •	×

Email Address: ARM	HAND@CLOCKFACE.COM						

When this box is checked you can then enter the importance and the amount of time in advance of the activity's time you want to receive a reminder alert.

## **IMPORT ACCOUNTS**

Use this program to import your customers into the Fitrix CRM tables from an outside source/software. If your customers are already in the Fitrix database, use this program to create a spreadsheet of customers to be imported into the CRM tables and then import them. **NOTE: make sure there are no spaces in the Excel filename. If there are or you will receive an error when you try to import.** 

The first prompt you receive is this:

Carlion		×
Choose Action		
Cancel	Import Accounts	List Fitrix Customers

**Import Accounts**- this option will import a list of Accounts from a predefined list. The next prompt is this:

📴 Edit or Post	×
Edit	Post
4	

Run the program first in edit mode so that you may map the data in your list to the matching values on the Accounts screen. Once you select edit and select your Excel list from where it is stored on your system (the spreadsheet will open and do not close it) you will see this mapping screen:

First Row O	f Data:	1				
Company	Contact		Address		Phone/Info	
Business Name: A	Name Courtesy:	L	Address Type:	V	International:	AD
Web Site: B	First Name:	М	Address 1:	W	Phone Type:	AE
Revenue: C	Middle:	N	Address2:	X	Phone:	AF
Employees: D	Last Name:	0	City:	Y	Extension:	AG
Stock Ticker: E	Suffix:	P	State/Province:	Z	Rep:	AH
Industry Type: F	Title:	Q	Post Code:	AA	Team:	AI
Industry Standard: G	Contact Type:	R	Country:	AB	YTD Sales:	AJ
Industry Code: H	Department:	S	County:	AC	Lifetime Sales:	AK
Account Type: I	Email Type:	т			Customer Code:	AL
Account Status: J Source: K	Email Address:	U				

**First Row of Data**- change this if the first row on your spreadsheet is not data. For example your first row may be column headings so you would change this value to 2.

**Column Mapping** – in the above example it is assumed that column A of your spreadsheet is the Business Name. If it is not, change it and all other values to their appropriate column. Once done, click OK to begin the data load.

You will receive this message:

If there are any errors in the data, an error listing will display:

You should then fix your list, run the edit again to verify it is fixed, and then run the post.

**NOTE:** The following values are mandatory when setting up accounts and therefore need to be included on your spreadsheet when importing accounts:

Business Name Address Type (i.e.- office, home, etc..) Address1 City, State or Province, zip or post code Account Type Account Status Rep ID

**List Fitrix Customers**- this option will create an Excel spreadsheet of all customers that are currently in the Fitrix database that you can then update as needed before importing.

When you select this option this screen displays so you can narrow down the number of customers if you need to.

File Edit He	• • • • • • • •
Customer Code: Business Name: City:	A*
State/Province: Post Code:	Cancel

You will then be prompted for where you want to save the spreadsheet:

Browse For Folder	×
Choose A Destination Folder	
⊿ III Computer	•
Local Disk (C:)	
▷ 👝 HP_RECOVERY (E:)	
▷ 👝 HP_TOOLS (F:)	Ξ
DVD RW Drive (G:)	
▷ 🖵 share (\\10.0.0.99) (S:)	
🛛 🗣 Network	
\mu CD,DVD	
▶ 🛄 FileZilla FTP Client	Ŧ
Make New Folder OK Cance	<b>.</b>

The Excel spreadsheet is created and you will receive this prompt:

C Notice	- • ×
This Action Created A Spreadsheet Of Customers	
Please Update The Spreadsheet and Save It	
Then Run The Import Process Using The Updated Spreadsheet	
K Close	
	OVR

There is quite a bit of information included on the Accounts screen (ie- annual revenues, industry type, etc.) that is not in the customer master table. You can either update the spreadsheet with this information prior to running the import program or you can run the import and update this information using the Accounts screen. Once your list is finalized you use the Import List option discussed above to import your customers. The only difference is that the column mapping has already been done by the program so the only value that needs to be changed on this screen the First Row of Data should be changed from 1 to 2.

#### **CREATE CUSTOMER FROM ACCOUNT**

G     G     Find Prev ↑	Next Browse			
	Create Customer			
Account ID:	35			
Name:	DIY WAREHOUSE			
Type:	MAIN			
Address:	100 MAIN ST			
	SUITE 400			
City:	ATLANTA			
State/Province:	GA	Post:	30339	Country: US
1	of 1			

Use this program to turn an Account into a Customer so that you may begin processing orders.

Use the Find option to find your Account and click on Create Customer. You will them be prompted to enter a customer code for this Account.

🗾 Enter Customer Code 👝 🔳 💌
Customer Code: DIY
OK Cancel
Enter The Customer Code For This Acci

After you have entered the customer code you will be prompted to enter additional information that is needed by the Customer Master program or choose values if there is more than one to select from (i.e.-the account has multiple addresses so the program will prompt you to select the address to insert into the customer master table.

Now you are ready to create the customer record:

Fitrix Customer Relationship Management User Guide

Confirm	<b></b>
Create Customer Record ?	
Yes Ko	
🗾 Notice	×
Next, Please Update Fields As Necessary :	in The Customer Screen
Close	

When you click OK the customer information screen will display so that you may enter additional information not included in Account information such as salesperson, payment terms, pay method, credit limit, etc.

## **QUERY BUILDER**

This powerful tool allows you to build SQL queries that create lists of Account/Customer contacts to be used in marketing campaigns.

In this example I want to build a list of contacts for all of my Accounts that are wholesalers.

1. In Add mode, type in a name and description for your query.

🔀 Query Builder	
File Edit View Navigation Tools Actions Help	
Find Prev Next Add Update Delete Browse	
Name: WHOELSALE GA	
Description: ACCOUNTS IN GEORGIA WITH INDUSTRY TYE = WHOLESALE	
Generate SQL Verify SQL Preview Results Export To Excel Create List	
SQL Statement:	*
Cancel	
SQL Statement	OVR

2. If you have a working knowledge of SQL you can then type in your query. If not click on the generate SQL button and this screen displays so that you can enter your selection criteria.

Fitrix Customer Relationship Management User Guide
